

New Exam XK0-005 Materials | New XK0-005 Exam Vce

P.S. Free & New XK0-005 dumps are available on Google Drive shared by Exam4Docs: <https://drive.google.com/open?id=1DcBwMCjrEJaiP-WDB-e1oNu4pAdjxWZm>

We update our XK0-005 test prep within one year and you will download free which you need. After one year, we provide the client 50% discount benefit if buyers want to extend their service warranty so you can save much money. If you are the old client, you can enjoy some certain discount when buying XK0-005 Exam Torrent so you can enjoy more service and more benefits. Our update can provide the latest and most useful XK0-005 prep torrent to you and you can learn more and pass the XK0-005 exam successfully.

Many clients may worry that if they buy our product they will fail in the exam but we guarantee to you that our XK0-005 study questions are of high quality and can help you pass the exam easily and successfully. Our product boosts 99% passing rate and high hit rate so you needn't worry that you can't pass the exam. Our XK0-005 exam torrent is compiled by experts and approved by experienced professionals and updated according to the development situation in the theory and the practice. Our CompTIA Linux+ Certification Exam guide torrent can simulate the exam and boosts the timing function. The language is easy to be understood and makes the learners have no learning obstacles. So our XK0-005 Exam Torrent can help you pass the exam with high possibility.

New XK0-005 Exam Vce & XK0-005 Exam Actual Questions

The interface is made simple and convenient for the users. In the web-based practice exam, you will be given conceptual questions of the actual CompTIA XK0-005 exam and gives you the results so that you can improve it at the end of every attempt. This sort of self-evaluation will help you know your exact weak points and you will improve a lot before the actual XK0-005 Exam. It is compatible with every browser. All operating systems also support the web-based practice exam.

CompTIA Linux+ Certification Exam Sample Questions (Q474-Q479):

NEW QUESTION # 474

A Linux administrator is troubleshooting a memory-related issue. Based on the output of the commands:

Which of the following commands would address the issue?

- A. free 8321
- B. top -p 8321
- C. kill -9 8321
- D. renice -10 8321

Answer: C

Explanation:

The command that would address the memory-related issue is kill -9 8321. This command will send a SIGKILL signal to the process with the PID 8321, which is the mysqld process that is using 99.7% of the available memory according to the top output. The SIGKILL signal will terminate the process immediately and free up the memory it was using. However, this command should be used with caution as it may cause data loss or corruption if the process was performing some critical operations.

NEW QUESTION # 475

A systems administrator wants to test the route between IP address 10.0.2.15 and IP address 192.168.1.40. Which of the following commands will accomplish this task?

- A. ip route get 192.168.1.40 from 10.0.2.15
- B. route -n 192.168.1.40 from 10.0.2.15
- C. route -e get to 192.168.1.40 from 10.0.2.15
- D. ip route 192.168.1.40 to 10.0.2.15

Answer: A

Explanation:

The command ip route get 192.168.1.40 from 10.0.2.15 will test the route between the IP address 10.0.2.15 and the IP address 192.168.1.40. The ip route get command shows the routing decision for a given destination and source address. This is the correct command to accomplish the task.

NEW QUESTION # 476

A Linux system is having issues. Given the following outputs:

```
# dig @192.168.2.2 mycomptiahost
; <<>> DiG 9.9.4-RedHat-9.9.4-74.el7_6.1 <<>> @192.168.2.2 mycomptiahost
; (1 server found)
;; global options: +cmd
;; connection timed out; no servers could be reached
# nc -v 192.168.2.2 53
Ncat: Version 7.70 ( https://nmap.org/ncat )
Ncat: Connection timed out.
# ping 192.168.2.2
PING 192.168.2.2 (192.168.2.2) 56(84) bytes of data.
64 bytes from 192.168.2.2: icmp_seq=1 ttl=117 time=4.94 ms
64 bytes from 192.168.2.2: icmp_seq=2 ttl=117 time=10.5 ms
Which of the following best describes this issue?
```

- A. The DNS service is currently not available or the corresponding port is blocked.
- B. The Linux engineer is using the wrong DNS port.
- C. The name mycomptiahost does not exist in the DNS.
- D. The DNS host is down.

Answer: A

Explanation:

Explanation

The ping command shows that the Linux system can reach the DNS server at 192.168.2.2, so the DNS host is not down. The dig and nc commands show that the Linux system cannot connect to the DNS server on port 53, which is the standard port for DNS queries. This means that either the DNS service is not running on the DNS server, or there is a firewall or network device blocking the port 53 traffic. Therefore, the DNS service is currently not available or the corresponding port is blocked. NEW QUESTION # 477

A systems administrator is receiving complaints about slow performance and system crashes. The administrator suspects memory and CPU issues. Which of the following is the first action the administrator should take to troubleshoot and resolve these issues?

- A. Remove and replace the CPU and memory components to address hardware issues.
- B. Reboot the server to clear any CPU and memory congestion.
- C. Look through the system logs and error messages to find any faults involving the CPU and memory.
- **D. Run resource monitoring tools like top or htop to view the current CPU and memory use.**

Answer: D

Explanation:

The initial troubleshooting step when experiencing slow performance and potential memory or CPU issues is to analyze the current resource usage. Running tools like top or htop allows the administrator to observe real-time data on CPU, memory, and processes, providing insights into high resource usage. This is a non-invasive first step, helping to identify whether issues are due to overuse, application memory leaks, or specific processes. CompTIA Linux+ recommends understanding system resource behavior before taking further action. Reference: CompTIA Linux+ Study Guide.

NEW QUESTION # 478

A Linux administrator needs to remove software from the server. Which of the following RPM options should be used?

- A. rpm -s
- B. rpm -d
- **C. rpm -e**
- D. rpm -q

Answer: C

Explanation:

The RPM option -e should be used to remove software from the server. The rpm command is a tool for managing software packages on RPM-based Linux distributions. The -e option stands for erase and removes the specified package from the system. This is the correct option to use to accomplish the task. The other options are incorrect because they either do not exist (-s or -d) or do not remove software (-q stands for query and displays information about the package). Reference: CompTIA Linux+ (XK0-005) Certification Study Guide, Chapter 16: Managing Software, page 489.

NEW QUESTION # 479

.....

No one can be responsible for you except yourself. So you must carefully plan your life and future career development. Our XK0-005 training quiz might offer you some good guidance. Maybe you never find out your real interest in the past. Now, everything is different. With our XK0-005 Study Guide, you will find that studying knowledge and making a progress is quite interesting and easy. And the most important is that you will get the best reward according to the XK0-005 certification.

New XK0-005 Exam Vce: <https://www.exam4docs.com/XK0-005-study-questions.html>

Gradually, you will find that our XK0-005 practice test materials deserves you trust, If you choose XK0-005 study guide, you will find the test questions and test answers are certainly high-quality, which is the royal road to success, After almost 10 years' research and development, we are finally able to guarantee that our XK0-005 pass-sure guide files will be your trustful partner in your preparation, These features of the CompTIA Linux+ Certification Exam XK0-005 PDF format enable you to prepare for the test anywhere, anytime.

You can use Online Test Engine in any electronic device, And he broke them out and he said, They are reporting to me, Gradually, you will find that our XK0-005 Practice Test materials deserves you trust.
