Microsoft Dynamics 365: Finance and Operations Apps Solution Architect Sample Questions (Q59-Q64):

NEW QUESTION # 59

You need to determine user licensing options for Dynamics 365 Finance + Operations (on-premises) .

Which type of license should you recommend? To answer, drag the appropriate licenses to the correct users.

Each license may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation

NEW QUESTION # 60

A client is implementing Dynamics 365 Finance.

You need to help the client understand which Microsoft Azure tools to use to perform various tasks. What should you recommend?

To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation

NEW QUESTION # 61

You need to recommend a solution to meet the requirements for the globalization features. Which feature should you recommend?

- A. Release validation program
- B. Product Roadmap
- C. Preview early access program
- D. FastTrack program
- E. First release program

Answer: E

Explanation:

Note:

* The CTO has learned that there are updates to globalization features in Dynamics 365 Finance. The IT staff has been tasked with ensuring that they are the first group to receive these updates.

* The IT department has decided not to code for globalization issues because they are in an upcoming service update. They are closing in on go-live and need to make sure that the updates are applied in time.

Service updates are continuous, touchless updates that provide new features and functionality. You are in control and manage how your organization receives these updates. For example, you can sign up for the First Release program so that your organization receives updates first. You can apply the updates to any of your environments manually (self-update) or remain on the default release schedule and receive the auto-updates when you schedule them using LCS.

NEW QUESTION # 62

Your company has a Microsoft 365 subscription.

You need to prevent temporary employees from using the chat feature in Microsoft Teams.

Solution: You create an app permission policy and assign the policy to the users.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

An app permission policy in Microsoft Teams is used to control which apps are available to users. This policy allows you to block or allow certain apps, but it does not specifically control the chat feature within Teams.

For controlling chat capabilities, a messaging policy would be more appropriate.

Reference: Assign policies to users and groups

NEW QUESTION # 63

A company implements Dynamics 365 Finance.

A sales order confirmation report does not meet the company's branding standards. The report must include header notes and a colorful logo.

You must enable modern design for additional reports created by users in the future.

You need to meet the branding standards and enable additional forms and reports to be created by users.

What should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

□

Answer:

Explanation:

□

Explanation:

Box 1: Modern reports branding details

Modern report designs in Microsoft Dynamics 365 for Finance and Operations . The logos, color schemes, and notes are setup in "Organization administration"->"Setup"->"Document branding"->"Branding details".

Box 2: Business document management

Business document management is built on top of the ER framework and enables business users to edit business document templates by using Microsoft 365 service or appropriate Microsoft Office desktop application. Edits to the documents might include changing business document designs and adding placeholders for additional data without source code changes and new deployments. No knowledge of the ER framework is required to update templates of business documents.

Note:

Business users use the Electronic reporting (ER) framework to configure formats for outbound documents in accordance with the legal requirements of various countries/regions. Users can also define the dataflow to specify what application data is placed in generated documents. The ER framework generates outbound documents in Microsoft Office formats (Excel workbooks or Word documents) by using predefined templates.
