Actually, NGFW-Engineer exam really make you anxious. You may have been suffering from the complex study materials, why not try our NGFW-Engineer exam software of PassReview to ease your burden. Our IT elite finally designs the best NGFW-Engineer exam study materials by collecting the complex questions and analyzing the focal points of the exam over years. Even so, our team still insist to be updated ceaselessly, and during one year after you purchased NGFW-Engineer Exam software, we will immediately inform you once the NGFW-Engineer exam software has any update.

## Palo Alto Networks NGFW-Engineer Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>PAN-OS Device Setting Configuration: This section evaluates the expertise of System Administrators in configuring device settings on PAN-OS. It includes implementing authentication roles and profiles, and configuring virtual systems with interfaces, zones, routers, and inter-VSYS security. Logging mechanisms such as Strata Logging Service and log forwarding are covered alongside software updates and certificate management for PKI integration and decryption. The section also focuses on configuring Cloud Identity Engine User-ID features and web proxy settings.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>PAN-OS Networking Configuration: This section of the exam measures the skills of Network Engineers in configuring networking components within PAN-OS. It covers interface setup across Layer 2, Layer 3, virtual wire, tunnel interfaces, and aggregate Ethernet configurations. Additionally, it includes zone creation, high availability configurations (active active and active passive), routing protocols, and GlobalProtect setup for portals, gateways, authentication, and tunneling. The section also addresses IPSec, quantum-resistant cryptography, and GRE tunnels.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>Integration and Automation: This section measures the skills of Automation Engineers in deploying and managing Palo Alto Networks NGFWs across various environments. It includes the installation of PA-Series, VM-Series, CN-Series, and Cloud NGFWs. The use of APIs for automation, integration with third-party services like Kubernetes and Terraform, centralized management with Panorama templates and device groups, as well as building custom dashboards and reports in Application Command Center (ACC) are key topics.</li></ul>

## Reliable NGFW-Engineer Exam Review - Exam NGFW-Engineer Guide Materials

Passing the NGFW-Engineer exam is your best career opportunity. The rich experience with relevant certificates is important for enterprises to open up a series of professional vacancies for your choices. Our website's NGFW-Engineer learning quiz bank and learning materials look up the Latest NGFW-Engineer Questions and answers based on the topics you choose. This choice will serve as a breakthrough of your entire career, so prepared to be amazed by high quality and accuracy rate of our NGFW-Engineer study guide.

### Palo Alto Networks Next-Generation Firewall Engineer Sample Questions (Q44-Q49):

#### NEW QUESTION # 44

What is the function of a Certificate Revocation List (CRL) in a PKI?

- A. Lists expired certificates
- B. Lists certificates that have been revoked before their expiration date
- C. Lists certificates pending renewal
- D. Lists all issued certificates

**Answer: B**

#### NEW QUESTION # 45

By default, which type of traffic is configured by service route configuration to use the management interface?

- A. Virtual system (VSY)
- B. IPSec tunnel
- C. Autonomous Digital Experience Manager (ADEM)
- D. Security zone

**Answer: C**

Explanation:

By default, the Autonomous Digital Experience Manager (ADEM) traffic is configured to use the management interface in a Palo Alto Networks firewall. The management interface is typically used for management-related traffic, such as monitoring and logging, and it is configured to handle ADEM-related traffic for the optimal performance of digital experience monitoring features.

This default configuration helps ensure that ADEM traffic does not interfere with regular traffic that may traverse other interfaces, such as traffic from security zones or IPSec tunnels.

#### NEW QUESTION # 46

Which statement describes the role of Terraform in deploying Palo Alto Networks NGFWs?

- A. It provides Infrastructure-as-Code (IaC) to automate NGFW deployment.
- B. It acts as a logging service for NGFW performance metrics.
- C. It manages threat intelligence data synchronization with NGFWs.
- D. It orchestrates real-time traffic inspection for network segments.

**Answer: A**

Explanation:

Terraform is an Infrastructure-as-Code (IaC) tool that automates the provisioning and management of infrastructure resources, including Palo Alto Networks Next-Generation Firewalls (NGFWs). By using Terraform configuration files, administrators can define and deploy NGFW instances across cloud environments (such as AWS, Azure, and GCP) efficiently and consistently.

Terraform enables:

Automated firewall deployment in cloud environments.

Configuration of security policies and networking settings in a declarative manner.  
Scalability and repeatability, reducing manual intervention in firewall provisioning.

#### NEW QUESTION # 47

In regard to the Advanced Routing Engine (ARE), what must be enabled first when configuring a logical router on a PAN-OS firewall?

- A. License
- B. General setting
- C. Content update
- D. Plugin

#### Answer: A

Explanation:

To enable the Advanced Routing Engine (ARE) on a Palo Alto Networks firewall, the license for the ARE must be applied first. Without the proper license, the firewall cannot activate and use the advanced routing features provided by ARE, such as support for more complex routing protocols (e.g., BGP, OSPF, etc.).

Once the license is applied and validated, the routing engine can be configured, allowing the creation of logical routers and routing policies.

#### NEW QUESTION # 48

Which set of options is available for detailed logs when building a custom report on a Palo Alto Networks NGFW?

- A. Traffic, threat, data filtering, User-ID
- B. GlobalProtect, traffic, application statistics
- C. Traffic, User-ID, URL
- D. Threat, GlobalProtect, application statistics, WildFire submissions

#### Answer: A

Explanation:

When building a custom report on a Palo Alto Networks NGFW, you can select detailed logs that provide specific insights into various aspects of firewall activity. The available options for detailed logs typically include:

Traffic logs: These provide information on the network traffic passing through the firewall. Threat logs: These logs capture data related to identified security threats, such as malware or intrusion attempts.

Data filtering logs: These logs capture events related to data filtering policies, such as preventing the transfer of sensitive data.

User-ID logs: These logs associate user identities with the traffic and activities observed on the firewall, enabling user-based policy enforcement.

#### NEW QUESTION # 49

.....

PassReview guarantee the best valid and high quality NGFW-Engineer study guide which you won't find any better one available. NGFW-Engineer training pdf will be the right study reference if you want to be 100% sure pass and get satisfying results. From our NGFW-Engineer free demo which allows you free download, you can see the validity of the questions and format of the NGFW-Engineer actual test. In addition, the price of the NGFW-Engineer dumps pdf is reasonable and affordable for all of you.
