PDFExamDumps是一個為SAP人士參加相關認證考試提供資源的便利網站。PDFExamDumps針對不同的考生有不同的培訓方法和不同的培訓課程。有了PDFExamDumps提供的這些針對性的培訓，考生通過C-BCFIN-2502相關考試就容易得多。很多曾經參加C-BCFIN-2502專業相關認證考試的人都是通過我們的PDFExamDumps提供的測試練習題和答案考過的，因此PDFExamDumps在SAP行業中得到了很高的聲譽。

最新的 SAP Certified Associate C-BCFIN-2502 免費考試真題 (Q39-Q44):

問題 #39

What is the primary purpose of SAP Governance, Risk, and Compliance (GRC)?

- A. To enhance customer relationship management
- B. To automate payroll processing
- **C. To ensure regulatory compliance and manage risks**
- D. To optimize supply chain operations

答案: C

問題 #40

Which of the following are core solution areas in SAP Finance and Risk?

Note: There are 2 correct answers to this question.

- **A. Governance, Risk, and Compliance**
- **B. Treasury Management**
- C. Sales Order Processing
- D. Asset Management Platform

答案: A,B

解題說明:

Comprehensive and Detailed 150 to 250 words of Explanation From Positioning SAP Business Suite via SAP Financial Management Solutions documents:

The SAP Finance and Risk portfolio is designed to provide a comprehensive framework for managing an organization's financial integrity and regulatory exposure. Within this framework, Treasury Management and Governance, Risk, and Compliance (GRC) are two of the most critical core solution areas. Treasury Management focuses on the lifecycle of cash and financial risk, providing tools for liquidity management, debt and investment handling, and secure bank connectivity. It ensures that the finance department can protect the company's assets while optimizing its financial performance.

Complementing this, Governance, Risk, and Compliance (GRC) provides the "defensive" layer of the finance function. It includes solutions for managing internal controls, identity access governance, and international trade compliance. By automating these processes, SAP helps organizations move away from siloed, manual risk management to an integrated approach where risks are identified and mitigated in real-time. Together, these two areas provide the CFO with both the "offensive" capability to manage capital (Treasury) and the "defensive" capability to protect the enterprise (GRC). While Sales Order Processing (A) and Asset Management (B) are essential parts of the broader SAP S/4HANA ERP, they are considered operational supply chain or maintenance functions rather than the core "Finance and Risk" solution areas used to position SAP's financial leadership.

問題 #41

What is the core function of the SAP Identity Access Governance solution?

- A. Performing risk assessments and strategic planning.
- B. Identifying, analyzing and neutralizing cyberattacks.
- **C. Managing user authorizations and permissions.**
- D. Supporting adherence to regulatory requirements.

答案: C

解題說明:

Comprehensive and Detailed 150 to 250 words of Explanation From Positioning SAP Business Suite via SAP Financial Management Solutions documents:

SAP Identity Access Governance (IAG) is a cloud-based service that focuses specifically on the management of user authorizations and permissions across an organization's hybrid landscape. In a modern finance environment, where data privacy and security are paramount, IAG provides a centralized way to control "who can do what" within the SAP system. This is critical for maintaining internal controls and protecting sensitive financial information.

The solution automates the provisioning process and ensures that "Segregation of Duties" (SoD) is strictly maintained. For example, it can prevent a user from having both the permission to create a purchase order and the permission to approve it, which is a fundamental requirement to prevent internal fraud. By automating these checks, IAG reduces the workload on IT and Audit teams while significantly lowering the risk of unauthorized access. While it helps meet regulatory requirements (Option C) and contributes to overall security, its primary operational function is the precise governance of user identities and the enforcement of access policies.
