With PrepAwayTest SAP C-WME-2506 Real Questions Nothing Can Stop You from Getting Success

Our C-WME-2506 learning guide is a very efficient tool in the world. As is known to us, in our modern world, everyone is looking for to do things faster, better, smarter, so it is no wonder that productivity hacks are incredibly popular. So we must be aware of the importance of the study tool. In order to promote the learning efficiency of our customers, our C-WME-2506 Training Materials were designed by a lot of experts from our company. You can totally rely on our C-WME-2506 study materials.

SAP Certified Associate - WalkMe Digital Adoption Consultant Sample

Questions (Q28-Q33):

NEW QUESTION # 28

Which two types of WalkMe content can make up an Onboarding Task?

- A. Resources and Shuttles
- **B. Smart Walk-Thrus and Shuttles**
- C. SmartTips and Launchers
- D. Smart Walk-Thrus and Resources

Answer: B

NEW QUESTION # 29

Your company just provided you with the new company logo that they want you to use in all of your WalkMe deployables. Where is the best place to store the logo?

- A. Engaged Elements
- B. Local Settings
- C. WalkMe Admin Center
- **D. The Asset Library**

Answer: D

Explanation:

The WalkMe Asset Library is the centralized repository for storing and managing reusable assets, such as images, videos, and other media files, used across WalkMe deployables (e.g., Smart Walk-Thrus, ShoutOuts, Launchers). Storing the company logo in the Asset Library ensures it is easily accessible for consistent use across all WalkMe content, supports version control, and allows for efficient updates if the logo changes. This approach aligns with WalkMe's best practices for asset management, as it promotes scalability and maintainability.

The other options are not suitable for storing a logo:

- * WalkMe Admin Center is used for account management, user permissions, and configuration settings, not for storing media assets.
- * Local Settings are specific to individual WalkMe items or environments and are not designed for centralized asset storage.
- * Engaged Elements refers to UI elements targeted by WalkMe for interaction, not a storage location for assets.

Extract from Official WalkMe Documentation:

Per the WalkMe Editor User Guide (SAP WalkMe Digital Adoption Consultant Study Guide, Section 2.4:

Asset Management):

"The Asset Library is a centralized hub within the WalkMe Editor where Builders can upload and manage images, videos, and other media files. Assets stored here can be reused across multiple deployables, ensuring consistency and simplifying updates." The course Advancing Your Skills in Building WalkMe Solutions further states:

"To maintain brand consistency, store commonly used assets like logos in the Asset Library. This allows Builders to apply the same asset across ShoutOuts, SmartTips, and other content types without redundant uploads." Thus, option A, "The Asset Library," is the best place to store the company logo for use in WalkMe deployables.

NEW QUESTION # 30

Which of the following is a way to initiate a Smart Walk-Thru?

Note: There are 3 correct answers to this question.

- **A. Permalink**
- **B. Activate from the Menu**
- **C. Auto-play**
- D. Builder Assistant
- E. Survey

Answer: A,B,C

NEW QUESTION # 31

There is a new process on your site that is crucial for all employees to complete. Users need to navigate to the time submission page, log their time for the quarter, and submit it in the platform. You have created a Smart Walk-Thru for this process. What should be the Goal?

- A. User is on the time submission page and clicks the submit button
- B. User inputs time into input fields
- C. User navigates to the time submission page
- D. User is on the site and clicks a submit button

Answer: A

Explanation:

The Goal of a Smart Walk-Thru defines the successful completion of the intended process, which in this case is employees submitting their quarterly time. The most precise Goal is User is on the time submission page and clicks the submit button, as it confirms both that the user has reached the correct page and completed the submission action, ensuring the process is fully executed. This Goal is measurable in WalkMe Insights and directly aligns with the process's objective.

The other options are less accurate:

- * User inputs time into input fields(A) is a partial step, not the final outcome.
- * User clicks a submit button(B) lacks context about the page, risking false positives.
- * User navigates to the time submission page(C) is incomplete, as navigation alone doesn't ensure submission.

Extract from Official WalkMe Documentation:

Per the WalkMe Editor User Guide (SAP WalkMe Digital Adoption Consultant Study Guide, Section 2.2:

Smart Walk-Thrus):

"Set Goals to reflect the completion of the process, such as a user reaching a specific page and performing a key action, like clicking a submit button, to track success accurately." The course Getting Started with Building WalkMe Solutions explains:

"For a process like time submission, define the Goal as the user being on the target page and clicking the submit button, capturing the full completion of the task." Option D is the correct Goal for the Smart Walk-Thru.

References:

SAP WalkMe Digital Adoption Consultant Study Guide, Section 2.2: Smart Walk-Thrus.

Course: Getting Started with Building WalkMe Solutions, Module 6: Defining Goals.

NEW QUESTION # 32

Which of the following is a way to initiate a Smart Walk-Thru? Note: There are 3 correct answers to this question.

- A. Activate from the Menu
- B. Auto-play
- C. Normalink
- D. Builder Assistant
- E. Survey

Answer: A,B,C

Explanation:

Smart Walk-Thrus can be initiated in several ways to guide users through processes. The correct methods include:

- * Normalink(A): A Normalink is a URL-based trigger that starts a Smart Walk-Thru when a user accesses a specific link or page.
- * Auto-play(D): Auto-play initiates a Smart Walk-Thru automatically based on predefined rules, such as page load or user segmentation.
- * Activate from the Menu(E): Users can start a Smart Walk-Thru by selecting it from the WalkMe Menu.

The other options are incorrect:

- * Builder Assistant(B) is a tool for creating content, not initiating Smart Walk-Thrus.
- * Survey(C) collects user feedback but cannot trigger a Smart Walk-Thru directly.

Extract from Official WalkMe Documentation:

Per the WalkMe Editor User Guide (SAP WalkMe Digital Adoption Consultant Study Guide, Section 2.2:

Smart Walk-Thrus):

"Smart Walk-Thrus can be initiated via Normalink (URL-based triggers), Auto-play (rule-based automatic start), or user selection from the WalkMe Menu, providing flexible options to engage users." The course Advancing Your Skills in Building WalkMe Solutions states:

"Configure Smart Walk-Thru to start through Normalinks for direct access, Auto-play for automated guidance, or Menu activation for user-driven initiation, depending on the use case." Options A, D, and E are valid ways to initiate a Smart Walk-Thru.
