SAP C_BCBAI_2502 Simulationsfragen & C_BCBAI_2502 Buch

Wenn Sie unsere Lernmaterialien zur SAP C_BCBAI_2502 Zertifizierungsprüfung benutzen wollen, werden sicher die Zeit und Wirtschaftskosten reduziert. Vorm Kauf unserer SAP C_BCBAI_2502 Prüfungsfrage können Sie kostenlos unsere Fragen herunterladen. Sie sind in der Form von PDF und Software. Wenn Sie die Softwareversion brauchen, bitte setzen Sie sich in Verbindung mit unserem Kundenservice.

SAP Certified Associate - Positioning SAP Business AI Solutions as part of SAP Business Suite C_BCBAI_2502 Prüfungsfragen mit Lösungen (Q52-Q57):

52. Frage

(What are some generative AI enhancements in ABAP Cloud? Note: There are 2 correct answers to this question.)

- A. Generate integrations with preconfigured connectors.
- B. Generate digital assistants.
- C. Generate unit-tests for ABAP classes and CDS views.
- D. Generate business objects using the ABAP RESTful application programming model.

Antwort: C,D

Begründung:

Comprehensive and Detailed Explanation From Exact Extract: Generative AI enhancements in ABAP Cloud include generating unit tests for ABAP classes and CDS views to improve testing efficiency, and generating business objects using the ABAP RESTful Application Programming Model (RAP) to streamline development and maintain a clean core approach.

Exact extracts supporting this:

Generate unit-tests: "New generative AI capabilities are designed to help you write, optimize, and test ABAP code more efficiently."

community.sap.com Generate business objects: "The first scope of features will cover business object ..."

learning.sap.com "Generative AI for ABAP development. With new ABAP capabilities, Joule can now help ABAP developers be more efficient with their development ..."

community.sap.com Other options are incorrect because:

Option A: Generating digital assistants is not a specific enhancement in ABAP Cloud; Joule is the assistant, but generation is for code artifacts.

Option D: Generating integrations is supported in broader SAP Build, but not highlighted as a generative AI enhancement specific to ABAP Cloud.

Reference from Positioning SAP Business AI Solutions as part of SAP Business Suite documents or Study Guide: Extracted from

SAP Help Portal "Generative AI in ABAP Cloud" and community blogs like "Unveiling today: SAP Build meets ABAP Cloud."

These position generative AI for code generation and testing in ABAP as part of custom AI solutions in the SAP Business Suite, per

C_BCBAI_2502 certification.

53. Frage

Which AI-driven tools are available in SAP S/4HANA? Note: There are 2 correct answers to this question.

- A. AI-powered invoice processing
- B. Manual risk assessment
- C. Predictive analytics for financial forecasting
- D. Isolated financial processes without AI

Antwort: A,C

Begründung:

SAP S/4HANA embeds advanced AI capabilities to optimize financial and operational processes, with AI- powered invoice processing and predictive analytics for financial forecasting being key tools explicitly documented as core functionalities.

SAP's official materials state: "SAP Cash Application revolutionizes payment advice processing by intelligently extracting key payment details from unstructured PDF documents and seamlessly integrating them into SAP S/4HANA Cloud." This describes AI-powered invoice processing, which minimizes manual data entry and enhances accuracy. Additionally, SAP S/4HANA leverages predictive analytics to "forecast expected incoming payments" and support financial forecasting, enabling organizations to optimize cash flow and make data-driven decisions. For instance, SAP Collections Management uses AI to "automatically determine, evaluate, and prioritize customers based on defined criteria," showcasing predictive analytics in financial processes.

The incorrect options-manual risk assessment and isolated financial processes without AI-are not AI- driven. Manual risk assessment contradicts SAP's automation focus, and isolated financial processes without AI are not part of SAP S/4HANA's integrated, AI-enhanced architecture. SAP documentation emphasizes that AI-driven tools in S/4HANA replace manual processes with intelligent automation, rendering these options invalid.

54. Frage

Match the SAP LeanIX activities in the dropdown lists to the SAP Activate phases.

Discover

- Achieve architecture transparency
- Support business case creation
- Define target architecture

55. Frage

What is the role of SAP AI Core in Business AI solutions? Please choose the correct answer.

- A. It provides an infrastructure for developing and running AI models
- B. It is a hardware-based AI computing solution
- C. It is used for HR management exclusively
- D. It replaces all manual business processes

Antwort: A

Begründung:

SAP AI Core serves as a foundational platform for developing and deploying AI models within SAP Business AI solutions. The correct answer is "It provides an infrastructure for developing and running AI models," as this is its primary role according to SAP documentation.

SAP documentation explains: "SAP AI Core is a cloud-based platform that provides the infrastructure for developing, training, and running AI models at scale. It supports machine learning, natural language processing, and other AI capabilities, enabling organizations to integrate AI into their business processes." SAP AI Core facilitates "custom AI model development" and "seamless integration with SAP applications," such as SAP S/4HANA and SAP Customer Experience, to power solutions like predictive analytics and fraud detection. For example, it supports "training models for demand forecasting" in supply chain operations, ensuring scalability and performance.

The incorrect options are not accurate. Replacing all manual business processes is an overstatement, as SAP AI Core focuses on AI model infrastructure, not process replacement. It is not used exclusively for HR management, as it supports multiple domains. It is not a hardware-based solution, as it operates in the cloud.

SAP AI Core's role as an AI infrastructure platform, as seen in SAP's AI framework, confirms its purpose.

56. Frage

How does SAP AI support sales and marketing automation?

Please choose the correct answer.

Response:

- A. By automating workforce planning
- B. By generating payroll reports
- C. By providing AI-driven lead scoring and customer insights
- D. By managing cloud infrastructure

Antwort: C
