Now you just take dozens of Euro to have such Reliable XSIAM-Analyst Test Materials. Once you get the certification you may have a higher position and salary.

Palo Alto Networks XSIAM Analyst Sample Questions (Q27-Q32):

NEW QUESTION # 27
Which type of alert in Cortex XSIAM is primarily based on endpoint telemetry and behavior?

- A. XDR Agent

- B. BIOC
- C. Correlation
- D. IOC

Answer: B

NEW QUESTION # 28
A security analyst has been assigned a ticket from the help desk stating that users are experiencing errors when attempting to open files on a specific network share. These errors state that the file format cannot be opened. IT has verified that the file server is online and functioning, but that all files have unusual extensions attached to them.
The security analyst reviews alerts within Cortex XSIAM and identifies malicious activity related to a possible ransomware attack on the file server. This incident is then escalated to the incident response team for further investigation.
Upon reviewing the incident, the responders confirm that ransomware was successfully executed on the file server. Other details of the attack are noted below:
- An unpatched vulnerability on an externally facing web server was exploited for initial access
- The attackers successfully used Mimikatz to dump sensitive credentials that were used for privilege escalation
- PowerShell was used on a Windows server for additional discovery, as well as lateral movement to other systems
- The attackers executed SystemBC RAT on multiple systems to maintain remote access
- Ransomware payload was downloaded on the file server via an external site, "file.io"
Refer to the scenario to answer this question:
Which hunt collection category in Cortex XSIAM should the incident responders use to identify all systems where the attackers established persistence during the attack?

- A. Command History
- B. Process Execution
- C. Remote Access
- D. Network Data

Answer: C

Explanation:
The Remote Access hunt collection surfaces tools and mechanisms (RATs, backdoors, remote services) attackers use to maintain persistence. Querying it will reveal where SystemBC or similar access channels were established across systems.

NEW QUESTION # 29
What is a schema in the context of XQL?
Response:

- A. A prebuilt playbook
- B. A structured description of dataset fields and types
- C. A list of SOC policies
- D. A threat scoring mechanism

Answer: B

NEW QUESTION # 30
While analyzing an active malware infection, what actions should an analyst take?
Response:

- A. Isolate the endpoint
- B. Disconnect the firewall
- C. Initiate live terminal session

- D. Export logs to CSV

Answer: A,C

NEW QUESTION # 31
Which attribution evidence will have the lowest confidence level when evaluating assets to determine if they belong to an organization's attack surface?

- A. An asset manually approved by a Cortex Xpanse analyst
- B. An asset discovered through registration information attributed to the organization
- C. An asset attributed to the organization because the Subject Organization field contains the company name
- D. An asset attributed to the organization because the name server domain contains the company domain

Answer: C

Explanation:
Matching the company name in a certificate's Subject Organization field is a heuristic text match and provides the weakest attribution confidence compared with registrar records, name server ownership, or manual analyst validation.

NEW QUESTION # 32
.....

If you feel nervous about the exam, then you can try the XSIAM-Analyst exam dumps of us. It will help you to release your nerves. XSIAM-Analyst Soft test engine can stimulate the real exam environment, if you use this version, it will help you know the procedures of the exam. In addition, XSIAM-Analyst Exam Materials are verified by experienced experts, and the quality can be guaranteed.
