# 100% Pass Quiz Oracle - 1Z0-1042-25 - High-quality Certified Oracle Cloud Infrastructure 2025 Application Integration Professional Questions

P.S. Free 2025 Oracle 1Z0-1042-25 dumps are available on Google Drive shared by Real4Prep: https://drive.google.com/open?id=12x5zTEls-W_SG9DPcgQGN5VqvqeNLA0U

We are a leading corporation in this line handling 1Z0-1042-25 study questions well with passing rate up to 98 and over percent, which is an unreachable goal for others. So our 1Z0-1042-25 preparation exam enjoys good sales for the excellent quality and reasonable prices in recent years. And we are so sure that we can serve you even better than you can imagine with our 1Z0-1042-25 learning guide since we are keeping on doing a better job in this career.

Oracle 1Z0-1042-25 Exam Syllabus Topics:

Topic	Details
Topic 1	• Testing, Monitoring, and Troubleshooting Integrations: This section assesses the abilities of Support Engineers and Integration Administrators in managing integration lifecycles. It includes activating and deactivating integrations, testing REST-triggered integrations, importing and exporting integrations, as well as monitoring and troubleshooting integration instances to ensure smooth operations.
Topic 2	• Creating Scheduled Integrations: This domain measures the skills of Automation Engineers and Cloud Administrators in defining integration schedules and converting scheduled integrations to app-driven ones. It also includes using scheduled parameters to automate workflows efficiently.
Topic 3	• Getting Started with OIC Integrations: This section of the exam measures the skills of Integration Specialists and Cloud Engineers in understanding the foundational components of Oracle Integration Cloud (OIC). It covers key integration concepts, how integrations work, and web services fundamentals such as WSDL, SOAP, REST, and JSON. The focus is on building a strong understanding of OIC's integration capabilities.

Topic 4	• Creating Orchestrated Integrations: This section tests the knowledge of Orchestration Developers and Business Process Analysts in managing orchestrated integrations within OIC. It includes using lookups, data mappers, and custom JavaScript libraries, configuring orchestration flow actions, implementing file handling options, and leveraging the fault-handling framework to manage errors effectively.
Topic 5	• Using OIC Connections & Adapters: This section evaluates the expertise of Integration Developers and Solution Architects in creating and configuring OIC connections. It includes setting up trigger and invoke connections, understanding the role of the Connectivity Agent, and effectively using adapters to connect cloud and on-premises applications seamlessly.

1Z0-1042-25 Updated CBT - New 1Z0-1042-25 Braindumps Files

Prepared by experts and approved by experienced professionals, our 1Z0-1042-25 exam torrent is well-designed high quality products and they are revised and updated based on changes in syllabus and the latest developments in theory and practice. With the guidance of our 1Z0-1042-25 Guide Torrent, you can make progress by a variety of self-learning and self-assessing features to test learning outcomes. And as the high pass rate of our 1Z0-1042-25 exam questions is 99% to 100%, you will be bound to pass the 1Z0-1042-25 exam with ease.

Oracle Cloud Infrastructure 2025 Application Integration Professional Sample Questions (Q27-Q32):

NEW QUESTION # 27
In which scenario is the Oracle Integration (OIC) connectivity agent NOT required?

- A. Creating orders in Oracle E-Business Suite
- B. Transferring files to an FTP server installed on-premises or behind a firewall
- C. Performing inbound polling for records to process in an Oracle Autonomous Data Warehouse database
- D. Publishing messages to Azure Service Bus

Answer: C

Explanation:
Comprehensive and Detailed Explanation:
Agent Usage:
A:True-no agent for cloud ADW.

NEW QUESTION # 28
GlobalTech Corporation uses Oracle Integration Cloud (OIC) to synchronize data between their CRM and ERP systems. They currently have a scheduled integration that runs nightly at 3 AM. With the implementation of a new CRM system that supports real-time data synchronization, GlobalTech wants to update their ERP system immediately after any data changes in the CRM. To achieve this, they need to convert their scheduled integration to an app-driven integration, allowing the CRM system to trigger the integration upon data changes. When implementing this conversion, which of these considerations is NOT valid?

- A. You cannot convert a scheduled integration with assignments that have the fault data type.
- B. You must choose an existing REST adapter trigger connection resource.
- C. Any existing scheduled parameters will be automatically converted to integration properties.
- D. You cannot convert a scheduled integration to a REST adapter-triggered integration with multiple verbs.

Answer: C

Explanation:
Comprehensive and Detailed Explanation:
Converting scheduled to app-driven:
A:True-REST trigger requires an existing connection.

B:True-OIC limits REST triggers to one verb (e.g., POST).
D:True-fault data types complicate conversion.

NEW QUESTION # 29

The Oracle Integration Cloud (OIC) integration designer editor provides a data mapper UI tool that is available for Map actions.
Which statements are TRUE regarding the use of the Mapper tool? Select TWO.

- A. You cannot drag and drop a source data element to a target node element that is already mapped.
- B. You cannot drag and drop an XSLT flow control statement directly to a target node element.
- C. You can drag and drop a source data element to multiple target node elements.
- D. You cannot drag and drop an XPath function activity directly to a target node element.

Answer: B,C

Explanation:
Comprehensive and Detailed Explanation:
OIC's Data Mapper simplifies transformations. Let's evaluate each option:
Option A: You cannot drag and drop an XSLT flow control statement directly to a target node element.
True:XSLT flow controls (e.g., <xsl:for-each>) require manual coding in an external editor for advanced mappings. OIC's UI doesn't support dragging these directly; you must export the map, edit the XSLT, and reimport it. This limitation ensures simplicity in the UI while allowing power users flexibility.
Option B: You can drag and drop a source data element to multiple target node elements.
True:The mapper allows one-to-many mappings. For example, dragging "CustomerName" from the source to both "BillingName" and "ShippingName" in the target is supported, streamlining repetitive mappings.
Option C: You cannot drag and drop a source data element to a target node element that is already mapped.
False:Youcanoverwrite an existing mapping by dragging a new source element to a mapped target, replacing the prior link. This flexibility aids iterative design.
Option D: You cannot drag and drop an XPath function activity directly to a target node element.
False:XPath functions (e.g., concat()) can be dragged from the function palette to a target node, applying transformations directly. This enhances usability.
Why A and B:A reflects a UI constraint, and B showcases mapping flexibility, both accurate per OIC's mapper design.
Use Case Example:Mapping "OrderDate" to multiple date Hawkins in a CRM sync, then using current-date() in the mapper, demonstrates B and D's capabilities.

NEW QUESTION # 30

Which statement is NOT true about schedule parameters in Oracle Integration Cloud (OIC) integration flow?

- A. Updates to schedule parameters value can be made manually before submitting an ad hoc request.
- B. Updates to Schedule Parameter values can be made manually when starting a schedule.
- C. Updates to schedule parameters value made dynamically in an Assign action will not persist on to the next instance run of the integration.
- D. Schedule parameters are always visible as an additional data source in the sources section of the mappers and expression editors within the integration.

Answer: C

Explanation:
Comprehensive and Detailed Explanation:
Parameters:
B:False-dynamic updates persist in some cases.

NEW QUESTION # 31

You are tasked with creating a new integration in OIC that will be exposed to clients as a SOAP web service. In addition, this integration will be invoking an external SOAP web service as part of the orchestration flow logic.
In your creation of these SOAP adapter connection components, which is a valid consideration?

- A. The WSDL URL property value can be defined by uploading a file for either the inbound Trigger connection or the

outbound Invoke connection configurations.
- B. The SAML and OAuth security policies are available options for creating either the inbound Trigger connection or the outbound Invoke connection configurations.
- C. Suppress insertion of timestamp into the request and Ignore timestamp in the response message are optional fields only for the outbound Invoke connection configuration.
- D. You must explicitly specify the target server TLS version for the external web service outbound Invoke connection configuration.

Answer: C

Explanation:
For outbound SOAP Invoke connections, options like "Suppress insertion of timestamp into the request" and "Ignore timestamp in the response message" allow managing timestamps in SOAP messages. These options are relevant only for outbound configurations, not for inbound triggers.

NEW QUESTION # 32
......

The pass rate reaches 98.95%, and if you choose us, we can ensure you pass the exam. 1Z0-1042-25 study materials are edited by skilled professionals, and they are quite familiar with the dynamics of the exam center, therefore 1Z0-1042-25 study materials can meet your needs for exam. What's more, we offer you free demo to try before purchasing 1Z0-1042-25 Exam Dumps, so that you can know the mode of the complete version. If you have any questions about 1Z0-1042-25 study materials, you can ask for our service stuff for help.
