

100% CMMC-CCP Correct Answers - CMMC-CCP Exam Objectives Pdf

CMMC CCP Practice Exam Questions with correct answers

What is a CUI Asset? Correct Answer-Asset that stores, processes, or transmits CUI

Examples: Servers, Printers, Endpoints, Cloud Services, ERP Systems

Where do you document a CUI Asset? Correct Answer-Document in Asset Inventory

Document in SSP

Document in Network Diagram

What practices do you apply to a CUI Asset? Correct Answer-CMMC Level 2

What does CMMC stand for? Correct Answer-Cybersecurity Maturity Model Certification

How many controls are in CMMC L2? Correct Answer-110 controls

What impact level is required when storing CUI? Correct Answer-IL4

What contract clause is used for CMMC L1? Correct Answer-FAR 52.204-21 (17 practices in total)

If you want to be CMMC L2 compliant, do you need to also be CMMC L1 compliant? Correct Answer-Yes

Correct Answer-

What's more, part of that PassReview CMMC-CCP dumps now are free: <https://drive.google.com/open?id=1d-TdPsXmByg-ewf-VM96iZjIXObluLV>

Free demo are available for CMMC-CCP study materials for you to have a try before purchasing, which will help you have a deeper understanding of what you are going to buy. You can find the free demo for CMMC-CCP exam braindumps in our website. If you are quite satisfied with the free demo, and want the complete version, just add it to the cart and pay for it. You will get the downloading link and password for the CMMC-CCP Study Materials within ten minutes, if you don't receive, you can ask for help from our service stuff.

Cyber AB CMMC-CCP Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Scoping: This section of the exam measures the analytical skills of cybersecurity practitioners, highlighting their ability to properly define assessment scope. Candidates must demonstrate knowledge of identifying and classifying Controlled Unclassified Information (CUI) assets, recognizing the difference between in-scope, out-of-scope, and specialized assets, and applying logical and physical separation techniques to determine accurate scoping for assessments

Topic 2	<ul style="list-style-type: none"> • CMMC Model Construct and Implementation Evaluation: This section of the exam measures the evaluative skills of cybersecurity assessors, focusing on the application and assessment of the CMMC model. It includes understanding its levels, domains, practices, and implementation criteria, and how to assess whether organizations meet the required cybersecurity practices using evidence-based evaluation.
Topic 3	<ul style="list-style-type: none"> • CMMC Assessment Process (CAP): This section of the exam measures the planning and execution skills of audit and assessment professionals, covering the end-to-end CMMC Assessment Process. This includes planning, executing, documenting, reporting assessments, and managing Plans of Action and Milestones (POA&M) in alignment with DoD and CMMC-AB methodology.

Newest CMMC-CCP Exam Questions: Certified CMMC Professional (CCP) Exam supply you high-quality Preparation Dump - PassReview

As the old saying goes people change with the times. People must constantly update their stocks of knowledge and improve their practical ability. Passing the test CMMC-CCP certification can help you achieve that and buying our CMMC-CCP test practice materials can help you pass the CMMC-CCP test smoothly. Our CMMC-CCP study question is superior to other same kinds of study materials in many aspects. Our CMMC-CCP test bank covers the entire syllabus of the test and all the possible questions which may appear in the test. You will pass the CMMC-CCP exam for sure.

Cyber AB Certified CMMC Professional (CCP) Exam Sample Questions (Q65-Q70):

NEW QUESTION # 65

According to the Configuration Management (CM) domain, which principle is the basis for defining essential system capabilities?

- A. Separation of duties
- **B. Least functionality**
- C. Essential concern
- D. Least privilege

Answer: B

Explanation:

Understanding the Principle of Least Functionality in the CM DomainThe Configuration Management (CM) domain in CMMC 2.0 focuses on maintaining the security and integrity of an organization's systems through controlled configurations and restrictions on system capabilities.

The principle of Least Functionality refers to limiting a system's features, services, and applications to only those necessary for its intended purpose. This principle reduces the attack surface by minimizing unnecessary components that could be exploited by attackers.

CMMC Practice CML2-3.4.6 (Use Least Functionality) explicitly states: "Employ the principle of least functionality by configuring organizational systems to provide only essential capabilities." The goal is to prevent unauthorized or unnecessary applications, services, and ports from running on the system.

Examples of Implementation:

Disabling unnecessary services, such as remote desktop access if not required.

Restricting software installation to approved applications.

Blocking unused network ports and protocols.

A). Least Privilege

This principle (associated with Access Control) ensures that users and processes have only the minimum level of access necessary to perform their jobs.

It is relevant to CMMC Practice AC.L2-3.1.5 (Least Privilege) but does not define system capabilities.

B). Essential Concern

There is no officially recognized cybersecurity principle called "Essential Concern" in CMMC, NIST, or related frameworks.

D). Separation of Duties

This principle (covered under CMMC AC.L2-3.1.4) ensures that no single individual has unchecked control over critical functions, reducing the risk of fraud or abuse.

While important for security, it does not define essential system capabilities.

CMMC 2.0 Level 2 Assessment Guide - Configuration Management (CM) Domain CM.L2-3.4.6 mandates least functionality to enhance security by removing unnecessary features.

NIST SP 800-171 (which CMMC is based on) - Requirement 3.4.6

States: "Limit system functionality to only the essential capabilities required for organizational missions or business functions." NIST SP 800-53 - Control CM-7 (Least Functionality) Provides detailed recommendations on configuring systems to operate with only necessary features.

Justification for the Correct Answer Least Functionality (C) Why Other Options Are Incorrect Official CMMC and NIST

References Conclusion The principle of Least Functionality (C) is the basis for defining essential system capabilities in the Configuration Management (CM) domain of CMMC 2.0. By applying this principle, organizations reduce security risks by ensuring that only the necessary functions, services, and applications are enabled.

NEW QUESTION # 66

During Phase 4 of the Assessment process, what MUST the Lead Assessor determine and recommend to the C3PAO concerning the OSC?

- A. Capability
- **B. Eligibility**
- C. Ability
- D. Suitability

Answer: B

Explanation:

What Happens in Phase 4 of the CMMC Assessment Process? Phase 4 of the CMMC Assessment Process (CAP) is the Final Reporting and Decision Phase. During this phase, the Lead Assessor must:

Review all assessment findings

Determine the Organization Seeking Certification's (OSC) eligibility for certification Make a recommendation to the C3PAO (Certified Third-Party Assessment Organization) Ensure that the OSC has met the required practices and processes.

Confirm that any deficiencies have been corrected or appropriately documented.

Recommend whether the OSC is eligible for certification based on assessment results.

Key Responsibilities of the Lead Assessor in Phase 4: Since the Lead Assessor must determine and recommend the OSC's eligibility to the C3PAO, the correct answer is B. Eligibility.

A). Ability #Incorrect. While assessing an OSC's ability to meet CMMC requirements is part of the process, the final determination in Phase 4 is about eligibility for certification.

C). Capability #Incorrect. Capability refers to an organization's technical and operational readiness. The Lead Assessor is making a recommendation on eligibility, not just capability.

D). Suitability #Incorrect. Suitability is not a defined term in the CMMC CAP process for final assessment recommendations. The correct term is eligibility.

Why the Other Answers Are Incorrect

CMMC Assessment Process (CAP) Document- Specifies that the Lead Assessor must determine and recommend the eligibility of the OSC in Phase 4.

CMMC 2.0 Model- Defines the assessment process, including certification decision-making.

CMMC Official References Thus, option B (Eligibility) is the correct answer, as per official CMMC guidance.

NEW QUESTION # 67

The Lead Assessor is presenting the Final Findings Presentation to the OSC. During the presentation, the Assessment Sponsor and OSC staff inform the assessor that they do not agree with the assessment results.

Who has the final authority for the assessment results?

- A. Assessment Sponsor
- **B. C3PAO**
- C. CMMC-AB
- D. Assessment Team

Answer: B

NEW QUESTION # 68

Where can a listing of all federal agencies' CUI indices and categories be found?

- A. Executive Order 13556
- B. Official CMMC Registry
- C. 32 CFR Section 2002
- **D. Official CUI Registry**

Answer: D

NEW QUESTION # 69

A C3PAO is near completion of a Level 2 Assessment for an OSC. The CMMC Findings Brief and CMMC Assessment Results documents have been developed. The Final Recommended Assessment Results are being generated. When generating these results, what MUST be included?

- A. Recorded and final updated Daily Checkpoint
- **B. Review documentation for the CMMC Quality Assurance Professional (CQAP)**
- C. Fully executed CMMC Assessment contract between the C3PAO and the OSC
- D. An updated Assessment Plan

Answer: B

Explanation:

* AC3PAO (Certified Third-Party Assessment Organization) is responsible for conducting CMMC Level 2 assessments.

* After completing the assessment, the C3PAO generates the Final Recommended Assessment Results, which include key documentation reviewed by the CMMC Quality Assurance Professional (CQAP) for quality control.

Reference:

CMMC Assessment Process (CAP) Guide

Step 2: Role of the CMMC Quality Assurance Professional (CQAP) The CQAP is responsible for reviewing assessment documentation to ensure it aligns with CMMC requirements and DoD expectations.

Before finalizing the assessment results, the C3PAO must include documentation for CQAP review to maintain compliance.

Step 3: Why Other Answer Choices Are Incorrect A. An updated Assessment Plan (Incorrect):

The Assessment Plan is developed before the assessment begins, not during the final recommended results phase.

B: Recorded and final updated Daily Checkpoint (Incorrect):

Daily Checkpoints are internal tracking tools used during assessments, but they are not mandatory for final results.

C: Fully executed CMMC Assessment contract between the C3PAO and the OSC (Incorrect):

While a contract is required for the assessment, it is not part of the Final Recommended Assessment Results.

Final Confirmation of Correct Answer: Review documentation for the CMMC Quality Assurance Professional (CQAP) must be included in the Final Recommended Assessment Results.

Thus, the correct answer is: D. Review documentation for the CMMC Quality Assurance Professional (CQAP)

NEW QUESTION # 70

.....

Our company is a multinational company which is famous for the CMMC-CCP training materials in the international market. After nearly ten years' efforts, now our company have become the topnotch one in the field, therefore, if you want to pass the CMMC-CCP exam as well as getting the related certification at a great ease, I strongly believe that the CMMC-CCP Study Materials compiled by our company is your solid choice. To be the best global supplier of electronic CMMC-CCP study materials for our customers' satisfaction has always been our common pursuit.
