The change assessment, which evaluates the organization's readiness for change, is typically performed in the Prepare phase. \* Option B: The business readiness assessment is usually conducted in the discover phase. Incorrect.

User adoption analysis, which measures how users engage with the system, is performed in the Run phase post-go-live. The timing of OCM activities is critical to align with project milestones. The change assessment in Prepare sets the stage for change management, while user adoption analysis in Run provides insights for ongoing optimization, ensuring a holistic approach to adoption.
