C_BCSBS_2502試験の準備方法｜100％合格率の C_BCSBS_2502参考資料試験｜最新のSAP Certified Associate - Positioning SAP Business Suite勉強時間

C_BCSBS_2502トレーニング資料は、ユーザーが学習した内容を統合し、多くのトレーニングの瞬間に追加するのに役立つように設計されています。ユーザーは、学習コンテンツの一部を終えた後、学習効果を時間内にテストできます。C_BCSBS_2502ガイドトレントのトピックを使用して、ユーザーがこの機能の知識の弱点を見つけ、一定の練習を繰り返して、最終的に高い成功率を達成できるようにします。その結果、当社のC_BCSBS_2502試験問題は、ユーザーがC_BCSBS_2502試験に合格するための知識を習得できるように、実践内容の完全なセットを形成するように設計されています。

SAP C_BCSBS_2502 認定試験の出題範囲：

トピック	出題範囲
トピック 1	• Discovering SAP Business AI: This section of the exam measures the skills of Digital Transformation Specialists and focuses on exploring how SAP Business AI enables smarter decision-making. It includes identifying AI-driven features embedded within SAP solutions and how they contribute to automation, predictions, and enhanced business outcomes. Professionals are expected to understand how to promote AI adoption in business processes using SAP's intelligent technologies.
トピック 2	• Positioning SAP Business Data Cloud: This section of the exam measures the skills of Enterprise Architects and covers the positioning and strategic use of SAP Business Data Cloud. It involves understanding how data from various sources is managed, governed, and accessed to support intelligent business operations. The section aims to equip professionals with the ability to explain data unification and connectivity through SAP's cloud-based data platform.
トピック 3	• Positioning SAP Business Suite: This section of the exam measures the skills of Solution Consultants and covers how to effectively position the SAP Business Suite within various business scenarios. It includes understanding the core value, capabilities, and strategic advantages of SAP's integrated business applications. The focus is on enabling consultants to align SAP Business Suite offerings with customer needs to support end-to-end processes.

SAP Certified Associate - Positioning SAP Business Suite 認定 C_BCSBS_2502 試験問題 (Q28-Q33):

質問 # 28
Match the challenges to their respective personas.
□

正解：

解説：
□
* CFO:Steering transformation by balancing growth and profitability
* CPO:Optimizing cost, quality, availability and sustainability
* COO:Running resilient global supply chains amidst constant disruptions
* CHRO:Retaining and engaging talent as skills requirements evolve
* CRO:Meeting rising customer expectations
* CIO:Delivering modernization and AI-powered innovation at the same time

質問 # 29
What are some ways that Joule revolutionizes how users can interact with SAP business systems? Note: There are 3 correct answers to this question.

- A. Perfect predictions
- B. Faster work
- C. Comprehensive automation
- D. Smarter insights
- E. Better outcomes

正解：B、D、E

解説：
SAP Joule is a generative AI copilot embedded across SAP's cloud-based enterprise solutions, such as SAP S /4HANA, SAP SuccessFactors, SAP Ariba, and SAP Business Technology Platform (BTP), designed to transform user interaction with SAP business systems. By leveraging natural language processing (NLP), contextual business intelligence, and AI agents, Joule simplifies complex tasks, automates workflows, and delivers intelligent insights, enhancing productivity and decision-making. The question asks for the ways Joule revolutionizes user interaction with SAP business systems, with three correct answers. Below, each option is evaluated based on official SAP documentation, SAP Learning materials, and relevant web sources from the provided search results, ensuring alignment with the "Positioning SAP Business Suite" and "SAP Business AI" narratives.
* Option A: Perfect predictionsWhile Joule provides predictive analytics and forecasting capabilities, such as anticipating market trends or supply chain disruptions, the term "perfect predictions" is not accurate or supported by SAP's documentation. Predictive analytics in Joule are described as data- driven and probabilistic, aimed at improving decision-making, but not guaranteeing perfection due to inherent uncertainties in business environments. SAP emphasizes actionable, reliable predictions, not flawless ones. For example, Joule's predictive insights help users anticipate trends, but the focus is on enhancing outcomes, not achieving perfection.Extract: "Forecasting & Predictive Analytics: Joule helps executives anticipate market trends, forecast business outcomes, and identify new growth opportunities based on AI-powered analysis."Extract: "Joule's ability to deliver data-informed insights helps users make smarter and more informed decisions. Whether it's predicting trends, identifying supply chain issues, or providing personalized recommendations, Joule ensures that all decisions are grounded in real- time business data, contextualized to unique situations."This option is incorrect because "perfect predictions" overstates Joule's capabilities and is not a documented claim.
* Option B: Better outcomesJoule revolutionizes user interaction by enabling better business outcomes through contextualized insights, task automation, and intelligent recommendations tailored to users' roles and business processes. By embedding AI across SAP applications, Joule helps users achieve improved results, such as enhanced customer experiences, optimized operations, and more effective decision-making. The documentation explicitly highlights "better outcomes" as a key benefit, emphasizing how Joule's generative AI capabilities deliver superior results across functions like HR, finance, and supply chain.Extract: "Joule revolutionizes how you interact with SAP business systems, making every touchpoint count and every task simpler. ... Joule helps you get work done faster, with more insights and better outcomes."Extract: "Better Outcomes: Just ask and get excellent content for job descriptions, coding assistance, and more. Full control: Maintain full control over decision-making and your data privacy while

accessing generative AI in a safe environment."Extract: "SAP Joule leverages AI-driven insights to revolutionize business technology, optimize operations, and enhance the full customer experience. ... Ultimately, this functionality can help companies optimize processes, enhance customer experiences, and drive better business outcomes."This option is correct.

* Option C: Smarter insightsJoule transforms user interaction by providing smarter insights through its ability to quickly sort, contextualize, and analyze data from SAP and third-party sources using generative AI and the SAP Knowledge Graph. These insights are role-specific, real-time, and actionable, enabling users to make faster, more informed decisions without navigating complex systems. SAP's documentation consistently emphasizes "smarter insights" as a core feature, highlighting Joule's role in surfacing intelligent, context-aware recommendations.Extract: "Joule works by quickly sorting through and contextualizing data from multiple systems to surface smarter insights.

Employees will simply need to ask Joule questions or frame a problem, in plain language. In response, Joule will deliver intelligent answers drawn from the wealth of business data from across the SAP portfolio, and third-party sources, retaining context."Extract: "Smarter insights Get quick answers and smart insights on-demand, facilitating faster decision-making without bottlenecks."Extract: "Joule delivers contextualized insights across the breadth of your business operations. By connecting data from different departments and systems, Joule creates a unified perspective of your organization that helps your employees make better, faster decisions."This option is correct.

* Option D: Comprehensive automationWhile Joule enables significant automation of tasks and workflows, the term "comprehensive automation" is not explicitly supported by SAP's documentation.

Joule automates specific, high-impact tasks (e.g., invoice reconciliation, job description creation) and multistep workflows via AI agents, but it does not claim to automate all processes comprehensively.

SAP's focus is on targeted automation to enhance productivity while keeping humans in the loop for decision-making, rather than fully automating every aspect of business systems. The documentation describes automation as a key feature but not as "comprehensive" in scope.Extract: "Joule Agents perform autonomous tasks and work together through multistep workflows across all areas of your business including supply chain, procurement, and finance to deliver connected, enterprise-wide business outcomes."Extract: "Streamlined Automation: Joule automates repetitive, manual tasks, freeing up valuable time and resources for more strategic initiatives."This option is incorrect because it overstates the scope of automation as "comprehensive."

* Option E: Faster workJoule revolutionizes user interaction by enabling faster work through natural language queries, task automation, and seamless navigation across SAP applications. By reducing the need for manual navigation, complex filtering, or switching between systems, Joule streamlines workflows, saving time and boosting productivity. The documentation explicitly identifies "faster work" as a key benefit, emphasizing how Joule accelerates task completion and simplifies user interactions.Extract: "Faster Work: Streamline tasks with an AI assistant that knows your unique role and acts as your work copilot across SAP applications."Extract: "Joule revolutionizes how you interact with SAP business systems, making every touchpoint count and every task simpler. From finance, procurement, supply chain, human resources, customer experience, and more, Joule is by your side. Joule helps you get work done faster, with more insights and better outcomes."Extract: "Increased Efficiency: Joule accelerates business processes by eliminating manual, time-consuming tasks and providing instant access to the right information. Employees no longer need to sift through complex datasets or switch between multiple systems to gather insights."This option is correct.

Summary of Correct Answers:

* B: Better outcomes are achieved through Joule's contextualized insights, automation, and intelligent recommendations, enhancing business results across SAP applications.
* C: Smarter insights enable faster, data-driven decisions by surfacing context-aware, real-time recommendations from SAP and third-party data.
* E: Faster work is facilitated by natural language interaction, task automation, and streamlined navigation, boosting productivity and efficiency.

質問 #30
How does SAP Business Suite contribute to regulatory compliance and governance? There are 2 correct answers to this question.

* A. Provides financial reporting and audit capabilities
* B. Eliminates the need for third-party compliance software
* C. Prevents cloud-based financial reporting
* D. Enables risk management and regulatory compliance tracking

正解：A、D

質問 # 31
Which of the following are RISE with SAP journeys? Note: There are 2 correct answers to this question.

- A. A hybrid two-tier approach
- B. An ERP transformation to private cloud
- C. New customers move to the public cloud
- D. Greenfield ERP implementation on Public Cloud

正解：A、B

解説：
RISE with SAP is a guided transformation journey designed for existing SAP ERP customers to modernize their business processes and transition to a cloud ERP landscape, primarily focusing on SAP S/4HANA Cloud Private Edition. It is tailored for organizations with complex, customized on-premises systems, allowing them to move to the cloud at their own pace while preserving existing investments. The question asks which options represent RISE with SAP journeys, with two correct answers. Below, each option is evaluated based on official SAP documentation from sources such as SAP Learning, SAP.com, and related materials.
* Option A: Greenfield ERP implementation on Public CloudA greenfield ERP implementation involves a new, clean implementation of an ERP system without carrying over existing customizations or data.
While SAP S/4HANA Cloud Public Edition supports greenfield implementations, these are primarily associated with the GROW with SAP journey, which targets new SAP customers or midsize companies adopting standardized, best-practice processes for rapid deployment. RISE with SAP, however, is designed for existing SAP ERP customers transitioning from on-premises systems, often involving complex landscapes and customizations. The public cloud (SAP S/4HANA Cloud Public Edition) is not the primary focus of RISE with SAP, which emphasizes the private cloud (SAP S/4HANA Cloud Private Edition) for such customers. Therefore, a greenfield implementation on the public cloud aligns more with GROW with SAP, not RISE with SAP.Extract: "For new customers, the GROW with SAP journey accelerates and streamlines the cloud transformation with a customized methodology to quickly implement and benefit from cloud ERP. ... SAP S/4HANA Cloud Public Edition is always implemented in a greenfield (new implementation) scenario." learning.sap.com Extract: "RISE with SAP is tailored to enable an easy transition to cloud ERP at a pace comfortable for the customer. Existing customers often require a higher degree of customization in their processes, prefer to innovate at their own pace, and need more control over their solution. These characteristics align with SAP S/4HANA Cloud Private Edition." learning.sap.com This option is incorrect.
* Option B: An ERP transformation to private cloudRISE with SAP is explicitly designed to support ERP transformations from on-premises SAP ERP systems (e.g., SAP ECC or on-premises SAP S/4HANA) to SAP S/4HANA Cloud Private Edition, which operates in a private cloud environment. This journey accommodates both greenfield (new implementation) and brownfield (system conversion) scenarios, allowing customers to maintain existing customizations and business processes while leveraging cloud benefits like scalability, AI, and continuous innovation. The private cloud focus is a hallmark of RISE with SAP, making this option a core component of its transformation journeys.Extract: "RISE with SAP is a comprehensive offering that helps companies run their business in the cloud. At the heart of this comprehensive offering is SAP S/4HANA Cloud Private Edition, an intelligent cloud ERP solution powered by AI designed for customers currently running SAP ERP and/or on-premise SAP S/4HANA." blog.sap-press.com Extract: "A private cloud deployment is recommended if a customer has plans for a long-term evolutionary journey to the cloud with high landscape complexity including mostly fragmented, highly customized systems. ... The private cloud deployment can be a new implementation, but also supports system conversion from an existing SAP ERP on-premise system." learning.sap.com This option is correct.
* Option C: New customers move to the public cloudNew customers moving to the public cloud typically align with the GROW with SAP journey, which is designed for organizations (often midsize or new to SAP) seeking a rapid, standardized implementation of SAP S/4HANA Cloud Public Edition. GROW with SAP emphasizes quick time-to-value with preconfigured best practices and minimal customization, targeting customers without prior SAP investments. In contrast, RISE with SAP targets existing SAP customers with on-premises ERP systems, focusing on complex transformations to the private cloud. While RISE with SAP could theoretically include public cloud components in specific scenarios, its primary focus is not new customers or the public cloud.Extract: "GROW with SAP is a SAP software solution initiative designed exclusively for mid-size companies and initial SAP customers. SAP S/4HANA Cloud + Public Edition - built on top of SAP's own HANA Cloud infrastructure, optimized for fast roll-out and quick time-to-value." uneecops.com Extract: "RISE with SAP is an ERP adoption solution that helps current SAP ecosystem users transition traditional ERP information and processes to a cloud system without compromising or putting your data at risk." blog.
nbs-us.com This option is incorrect.
* Option D: A hybrid two-tier approachA hybrid two-tier ERP approach involves using a combination of SAP S/4HANA Cloud Public Edition and Private Edition, often across different parts of an organization (e.g., headquarters vs. subsidiaries). RISE with SAP supports such configurations, particularly for existing SAP customers with complex landscapes who may implement a private cloud solution (via SAP S/4HANA Cloud Private Edition) for core operations while using the public cloud for standardized processes in specific areas. This approach allows flexibility and scalability, aligning with RISE with SAP's tailored transformation framework. The documentation explicitly mentions support for two-tier ERP scenarios under RISE with SAP, making this a valid journey.Extract: "It's also common for customers to implement both SAP S/4HANA Cloud Public and Private Edition in a two-tier

ERP scenario." learning.sap.com Extract: "RISE with SAP is tailored to a customer's existing landscape and business requirements, and umfasst ein standardisiertes Framework, integrierte Tools und fachkundige Beratung bei jedem Schritt - nach einer bewahrten Methodik, die sowohl die Transformation als auch die Wertschopfung beschleunigt." (Translated: "RISE with SAP is tailored to a customer's existing landscape and business requirements, and includes a standardized framework, integrated tools, and expert guidance at every step - following a proven methodology that accelerates both transformation and value creation.") sap.com This option is correct.

Summary of Correct Answers:

* B: RISE with SAP supports ERP transformations to the private cloud, primarily through SAP S
/4HANA Cloud Private Edition, accommodating both greenfield and brownfield scenarios for existing SAP customers.

* D: RISE with SAP enables a hybrid two-tier approach, combining private and public cloud editions to meet diverse organizational needs, as part of its flexible transformation framework.
