APICS CPIM-8.0 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Supply Chains and Strategy: This section of the exam measures the skills of Supply Chain Managers and covers various aspects related to supply chains, including their interaction with the environment and strategic objectives. It delves into developing organizational strategies, functional strategies, performance monitoring using KPIs, risk management, capital equipment management, and sustainability strategies. A key skill assessed here is "analyzing market trends."
Topic 2	<ul style="list-style-type: none">Sales and Operations Planning: This module assesses the skills of Operations Planners in terms of sales and operations planning processes. It includes understanding the purpose of S&OP, creating aggregate demand plans, and reconciling these plans to ensure alignment between sales forecasts and operational capabilities. A crucial skill measured is "reconciling supply-demand gaps."
Topic 3	<ul style="list-style-type: none">Inventory: The inventory module evaluates the skills of Inventory Controllers, covering inventory planning principles such as determining optimal stock levels based on costs versus benefits analysis metrics like ABC classification systems used globally today along with itemized inventory control mechanisms ensuring efficient stock turnover rates while minimizing holding costs. Distribution: This section measures the abilities of Logistics Coordinators, focusing on distribution network design principles that optimize replenishment orders efficiently while considering reverse logistics practices aimed at reducing waste through proper disposal methods according to environmental regulations.
Topic 4	<ul style="list-style-type: none">Demand: This section evaluates the abilities of Demand Analysts in managing demand through forecasting techniques. It explores sources of demand data for accurate forecasting and evaluating forecast performance to improve future predictions. One important skill evaluated is "forecasting demand accurately."

APICS Certified in Planning and Inventory Management (CPIM 8.0) Sample Questions (Q557-Q562):

NEW QUESTION # 557

A Software As A Service (SaaS) solution was compromised due to multiple missing security controls. The SaaS deployment was rushed and the Software Development Life Cycle (SDLC) was not followed. Which SDLC phase would have been MOST effective in preventing this failure?

- A. Testing
- **B. Requirements**
- C. Design
- D. Maintenance

Answer: B

NEW QUESTION # 558

The cost accountant has discovered a consistent overage in actual run time for one operation. This information should be sent first to the:

- **A. production supervisor to review and explain the overage.**
- B. the engineering manager to evaluate the run time for the routing.
- C. product manager to increase the selling price of the product.
- D. quality manager to add a new quality measurement to the operation.

Answer: A

Explanation:

The production supervisor is the most appropriate person to send the information about the overage in actual run time for one operation. The production supervisor is responsible for overseeing the execution of the production plan and ensuring that the operations are performed efficiently and effectively. The production supervisor can review the actual run time data and compare it with the planned run time, identify the possible causes of the overage, and take corrective actions if needed. The production supervisor can also explain the overage to the cost accountant and other stakeholders, such as the product manager, the quality manager, and the engineering manager, and provide feedback for improving the planning and routing of the operation.
