In order to make all customers feel comfortable, our company will promise that we will offer the perfect and considerate service for all customers. If you buy the Analytics-Con-201 study materials from our company, you will have the right to enjoy the perfect service. We have employed a lot of online workers to help all customers solve their problem. If you have any questions about the Analytics-Con-201 Study Materials, do not hesitate and ask us in your anytime, we are glad to answer your questions and help you use our Analytics-Con-201 study materials well. We believe our perfect service will make you feel comfortable when you are preparing for your exam.

## **Salesforce Certified CRM Analytics and Einstein Discovery Consultant Sample Questions (Q45-Q50):**

### **NEW QUESTION # 45**

Universal Containers asks a CRM Analytics consultant to review the performance of its local data sync.

After removing unused objects and fields from connected data, what else should the consultant do to improve performance of the data sync?

- A. Evaluate connection mode for each connected object.
- B. Enable fast sync in analytics settings.
- C. Contact Salesforce Support to increase sync speed.

**Answer: A**

Explanation:

To improve the performance of local data sync in Universal Containers, evaluating the connection mode for each connected object is a practical approach. Here's the rationale:

\* Optimization of Resources: Different connection modes (e.g., Full Sync, Incremental Sync) use different amounts of resources. Choosing the right mode for each object based on how frequently its data changes can optimize the sync process and reduce load

times.

\* Efficient Data Handling: By tailoring the connection mode to the needs of specific data objects, the overall efficiency of the data sync process is improved, leading to faster refresh rates and more timely data availability.

\* Cost and Performance Balance: Evaluating and selecting the appropriate connection mode can also help balance performance needs with cost constraints, as some modes may consume more compute resources than others.

#### NEW QUESTION # 46

A CRM Analytics consultant is asked to make sure the new sales performance dashboard is accessible in the mobile app. They have created multiple mobile layouts for the same dashboard.

How is CRM Analytics expected to perform?

- A. If more than one layout is eligible, the one with the most widgets is used.
- B. If more than one layout is eligible, the one with the most device properties set is used.
- C. If more than one layout is eligible, the one with the most global filters is used.

**Answer: B**

#### NEW QUESTION # 47

After getting approval for the dashboard layout design for a desktop, the CRM Analytics consultant is ready to start the design process for a mobile layout.

Which consideration should the consultant keep in mind?

- A. If no layouts are eligible for the mobile device, an error message will be displayed but the dashboard will still be visible on the desktop without errors.
- B. "Tablet" or "Phone" layout-where only minWidth and maxWidth have been set-may be displayed on a desktop if the dashboard is embedded in a small frame, or if the browser window is small.
- C. Create a layout with the property "phone" to show the dashboard on the mobile app similar to creating a layout with the property "dashboard" to show on the desktop for the same dashboard,

**Answer: B**

Explanation:

When designing for different device types in CRM Analytics, particularly for mobile layouts, it's crucial to consider how the layout will respond not just on mobile devices but also under various display conditions on desktops. Here's the rationale for focusing on this consideration:

\* Responsiveness: Layouts designed for tablets or phones may also be triggered on desktop environments if conditions such as browser window size or embedded frame dimensions mimic those typical of smaller devices.

\* Design Flexibility: Understanding this behavior is essential for creating versatile dashboards that maintain functionality and visual integrity across all potential viewing scenarios.

\* User Experience: Ensuring that the dashboard behaves predictably across device types and sizes enhances user engagement and effectiveness, as it provides a consistent experience regardless of the access point.

This approach ensures that the dashboard remains functional and accessible no matter how or where it is being viewed, aligning with best practices for responsive and adaptive design in modern analytics environments.

#### NEW QUESTION # 48

Universal Containers (UC) is using CRM Analytics to create two datasets.

\* Dataset A: Contains a list of activities with an "activityID" dimension and a "userID" dimension

\* Dataset B: Contains a list of users with a "userID" dimension

UC wants to delete all activities from Dataset A related to users in Dataset B.

How should the CRM Analytics consultant help UC achieve this?

- A. Use the recipe node "delete" and set "userID" as the deletion ID.
- B. Use the combination of recipe transformations: "join" and "filter".
- C. Use the "update" transformation and utilize the "filter" node.

**Answer: B**

## NEW QUESTION # 49

In a dataset, there are multiple boolean fields. When displayed on any dashboard, the boolean fields should all be displayed in the same way: a value of true should result in the display of the word "Yes" in green; a value of false should result in the display of the word "No" in red.

How should the consultant accomplish this?

- A. Create an XMD node in the recipe to change the label and color of the values in the fields.
- **B. In the explorer's field panel, select the boolean fields and use the "edit values" option on the fields to change values and colors.**
- C. Select the boolean fields in the explorer's field panel, select the boolean fields, then create a derived dimension.

**Answer: B**

## NEW QUESTION # 50

.....

If you buy our Analytics-Con-201 study materials you will pass the Analytics-Con-201 test smoothly and easily. We boost professional expert team to organize and compile the Analytics-Con-201 training materials diligently and provide the great service which include the service before and after the sale, the 24-hours online customer service and refund service.
