NEW QUESTION # 134

As shown in the figure below, are the following statements correct?

- A. Only when the masks of host A and host B are set to be the same, host A and host B can communicate
- B. The IP address masks of host A and host B are different, so host A and host B cannot communicate
- C. The broadcast address of host A and host B are the same
- D. Host A can ping host B

Answer: B

NEW QUESTION # 135

An administrator wishes to configure a floating static route. In order to successfully achieve this, which operation should be performed?

- A. The administrator is required to configure a different cost metric for the primary static route and floating static route.
- B. The administrator is only required to configure two static routes.
- C. The administrator is required to configure a different preference value for the primary static route and floating static route.
- D. The administrator is required to configure different route tags for the primary static route and floating static route.

Answer: C

Explanation:

A floating static route is configured by assigning a higher preference value to the backup route. This ensures that the backup route (floating route) is used only when the primary route is unavailable. Lower preference values indicate higher priority.

NEW QUESTION # 136

Which of the following fields is not included in the HELLO packet of the OSPF protocol? ().

- A. HelloInterval

- Answer: B**
