NEW QUESTION # 77

What describes essential aspects of project management that must be applied consistently and throughout the project lifecycle?

- A. The project context
- B. The people element
- C. The PRINCE2 processes
- **D. The PRINCE2 practices**

Answer: D

Explanation:

The PRINCE2 practices represent the essential aspects of project management that must be applied consistently from start to finish in every project. These practices cover key areas such as managing risks, issues, quality, plans, progress, and change. They provide structured guidance and tools to ensure the project remains viable, controlled, and aligned with business objectives.

While processes define the stages and flow of activities, and the people element refers to roles and skills, practices are the ongoing activities and controls embedded throughout the project lifecycle. The project context shapes how practices and processes are tailored but does not itself define the consistent elements.

This consistent application of practices supports governance, transparency, and control, critical for successful project outcomes.

NEW QUESTION # 78

What is the MOST important when blending PRINCE2 Project Management with agile?

- A. Fostering psychological safety
- B. Using agile techniques
- C. Following agile processes
- **D. Adopting agile mindset**

Answer: D

Explanation:

When blending PRINCE2 with agile, adopting an agile mindset is the most important factor for success. The mindset involves embracing agile values such as flexibility, collaboration, delivering value incrementally, and being responsive to change. Without this cultural and attitudinal shift, the use of agile techniques or processes becomes superficial and fails to deliver the benefits of agility. PRINCE2 is a highly structured project management method with defined roles, processes, and controls.

Integrating agile methods requires more than just overlaying practices like Scrum or Kanban; it demands a fundamental shift in thinking about leadership, governance, team dynamics, and customer involvement.

Fostering psychological safety (B) is indeed important because it allows teams to express ideas, take risks, and innovate without fear of negative consequences. However, this psychological safety is a component of the broader agile mindset.

Using agile techniques (C) and following processes (D) are enablers but do not guarantee agile success.

Teams may mechanically perform ceremonies without understanding the principles behind them.

The PRINCE2 Agile guidance emphasizes that the mindset must permeate all levels of the project and organization. Leaders and teams should adopt agility as a philosophy, not just a set of practices.

NEW QUESTION # 80

Why is Lean Startup included in the 'starting up a project' process in PRINCE2 Agile?

- A. Because it explains how a small company can grow using traditional technologies
- B. Because it is designed to manage projects, delivering products in timeboxes
- C. Because running a project and setting up a new business are the same
- **D. Because it enables agile to be used in challenging and uncertain situations**

Answer: D
