SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition, Sourcing and Procurement 認定 C-S4CPR-2502 試験問題 (Q63-Q68):

質問 # 63

What do you need to create to test APIs on your SAP S/4HANA Cloud Public Edition system using the SAP Business Accelerator Hub? Note: There are 2 correct answers to this question.

- A. A communication system
- B. A communication scenario
- C. A communication arrangement
- D. An API

正解: A、C

解説:

To test APIs on your SAP S/4HANA Cloud Public Edition system using the SAP Business Accelerator Hub, you need to set up specific configurations. Below are the two correct answers:

* A communication system (Option A): A communication system represents the external system or application that will interact with the SAP S/4HANA Cloud system. It is required to establish connectivity and define the technical details of the external system. The SAP API Management Guide confirms this requirement.

* A communication arrangement (Option B): A communication arrangement links the communication system to a communication scenario, enabling specific API functionalities. It defines how the external system interacts with the SAP S/4HANA Cloud system. The same SAP API Management Guide documents this step.

* C. A communication scenario: While communication scenarios are essential for defining API capabilities, they are not directly created by users. Instead, they are predefined by SAP and selected during the communication arrangement setup.

* D. An API: APIs are provided by SAP and do not need to be created by users. The focus is on configuring the communication system and arrangement to test the APIs.

* SAP API Management Guide: Explains the steps to configure communication systems and arrangements for API testing. <https://help.sap.com>

* SAP Business Accelerator Hub Documentation: Provides guidance on testing APIs and integrating external systems with SAP S/4HANA Cloud.

質問 # 64

What activities are applied to the entire system and cannot be changed after confirmation in SAP Central Business Configuration?

Note: There are 2 correct answers to this question.

- A. Configuration activities
- B. Fiscal year variant
- C. Scoping

- **D. Group currency**

正解: B、D

解説:

In SAP Central Business Configuration, certain activities are applied at the system level and cannot be changed after confirmation due to their foundational impact on the system. Below is an explanation of the correct answers:

- * Fiscal year variant (B): The fiscal year variant defines the structure of the financial year (e.g., calendar or non-calendar year). Once confirmed, it cannot be changed because it affects all financial postings and reporting.
- * Group currency (D): The group currency is the currency used for consolidation purposes across the organization. It is a system-wide setting and cannot be altered after confirmation.
- * Scoping (A): Scoping determines which business processes are activated in the system. While it is a critical activity, it can be adjusted during implementation.
- * Configuration activities (C): Configuration activities involve setting up specific parameters for business processes. These can be modified as needed during implementation.
