

SAP C-CPI-2506 Latest Dumps Files - Test C-CPI-2506 Simulator Fee

[Pass SAP C-CPI-2506 Exam | Latest C-CPI-2506 Dumps & Practice Exams - Cert007](#)

Exam : **C_CPI_2506**

Title : SAP Certified Associate -
Integration Developer

https://www.cert007.com/exam/c_cpi_2506/

1/5

All three SAP C-CPI-2506 exam questions formats are easy to use and compatible with all devices, operating systems, and the latest browsers. Now take the best decision for your career and take part in the SAP Certified Associate - Integration Developer C-CPI-2506 Certification test and start preparation with SAP C-CPI-2506 PDF Questions and practice tests. ActualTestsIT offers free updates for 365 days.

SAP C-CPI-2506 Exam Syllabus Topics:

Topic	Details
Topic 1	Managing APIs: This section of the exam measures the skills of Solution Architects and focuses on managing APIs within the SAP ecosystem. It covers topics such as API provisioning, lifecycle management, security policies, and monitoring, ensuring candidates can handle APIs effectively for enterprise integration needs.
Topic 2	SAP Integration Suite Overview: This section of the exam measures the skills of Integration Consultants and covers the foundational concepts of the SAP Integration Suite. It provides an understanding of the suite's capabilities, its role in connecting applications, and its relevance in modern cloud-based integration scenarios.

Topic 3	• SAP Event Mesh: This section of the exam measures the skills of Solution Architects and centers on using SAP Event Mesh to support event-driven integration. It highlights the importance of asynchronous communication, event publishing, and subscription models, allowing organizations to build scalable and decoupled systems.
Topic 4	• Implementing Cloud Integration: This section of the exam measures the skills of Integration Consultants and examines how cloud integration flows are designed and deployed. It emphasizes creating integration scenarios, handling connectivity, and applying best practices to build efficient, secure, and reliable integration processes in SAP's cloud environment.

Test SAP C-CPI-2506 Simulator Fee - C-CPI-2506 Exam Actual Questions

We ActualTestsIT are built in years of 2010. Recent years we are offering reliable certification C-CPI-2506 exam torrent materials and gain new & old customers' praise based on our high pass rate. We put much emphasis on our C-CPI-2506 exam questions quality and we are trying to provide the best after-sale customer service on C-CPI-2506 training guide for buyers. If you are looking for professional & high-quality C-CPI-2506 preparation materials, you can trust us and choose our C-CPI-2506 study materials. Our C-CPI-2506 exam guide is able to help you clear exams at the first attempt.

SAP Certified Associate - Integration Developer Sample Questions (Q30-Q35):

NEW QUESTION # 30

You use an APIKey for authentication in an HTTPS API call. In which part of the Content Modifier is the APIKey included?

- A. Exchange property
- B. Attachment
- C. Message header
- D. Message body

Answer: C

Explanation:

When using API Key authentication for HTTP(S) calls in SAP Integration Suite:

The API Key is typically included in the HTTP header (e.g., APIKey: <value> or x-api-key: <value>).

Message headers are configured in the Content Modifier for outbound requests.

Other options:

Attachment # Used for file handling, not authentication.

Message body # Contains payload, not credentials.

Exchange property # Used internally within the flow, not sent externally.

Thus, the API Key must be placed in the Message header.

NEW QUESTION # 31

You configured a content modifier as follows: Action Create. Name: ProductID. Source Type: XPath. Source Value: //ProductID.

Data Type: java lang string. After testing the content modifier, you receive an error message that contains the following fragment:

java.lang.ClassNotFoundException java lang string. What caused the error message?

- A. Incorrect source value
- B. Incorrect name
- C. Incorrect data type
- D. Incorrect source type

Answer: C

Explanation:

The error message is caused by an incorrect data type in the content modifier configuration. The data type should be `java.lang.String` instead of `java lang string`. The data type defines the type of the value that will be stored in the header or property of the message. It should match one of the supported Java classes, such as `java.lang.String`, `java.lang.Integer`, `java.lang.Boolean`, and so on. If the data type is not valid, a `java.lang.ClassNotFoundException` will be thrown. NEW QUESTION # 32

Which expression language can you use to access the content of a message in an integration flow?

- A. Simple expression language
- B. XML expression language
- C. JavaScript expression language
- D. Spring expression language

Answer: A

Explanation:

To access the content of a message in an integration flow, you can use the Simple expression language. The Simple expression language is a subset of the expressions defined in Camel Simple Expression Language, which is a language for accessing and manipulating message contents and exchange properties in Apache Camel integration framework. The Simple expression language supports various built-in variables, functions, operators, and literals that can be used to construct expressions for different purposes, such as routing conditions, content modification, variable assignment, and so on. You can use the Simple expression language when configuring components that support expressions, such as content modifier, router, filter, write variables, and so on. NEW QUESTION # 33

To activate the Event Mesh (EMIS) capability in the SAP Integration Suite, which role collections must be assigned to the user performing the activation?

- A. Integration_Administrator and Security_Auditor
- B. Process_orchestrator and Subaccount_Viewer
- C. API_Manager and Monitoring-Viewer
- D. Integration_Provisioner and Subaccount Administrator

Answer: D

Explanation:

To activate Event Mesh (EMIS) capability in SAP Integration Suite, the required role collections are:

Integration_Provisioner # Allows provisioning of new capabilities (including Event Mesh) in Integration Suite.

Subaccount Administrator # Grants permission to manage and configure subaccount-level entitlements and service activations.

Other options:

Integration_Administrator, API_Manager, Monitoring_Viewer # Used for operational tasks, not provisioning.

Process_orchestrator # Refers to on-premise PI/PO, not BTP roles.

Security_Auditor # Auditing role, not activation.

Thus, the correct roles are Integration_Provisioner and Subaccount Administrator.

NEW QUESTION # 34

You want to integrate a SOAP adapter into an integration process and enable the adapter to send messages to the integration flow. Which user role must you set up in the SOAP adapter?

- A. ESBMessaging send
- B. MessagingsendtoCI
- C. MessagingSend

Answer: A
