很多新人剛進入公司就聽說，每個月都會有 Microsoft 證照考試，如果過了，年底有獎金的發放，根據你完成證照的情況，才完成獎金的分配。然而對於沒有參加過任何證照考試的新人來說，是一次不錯挑戰。PDFExamDumps 剛剛更新的 Microsoft MB-820 擬真試題剛好可以幫助很多新人，如果你正在準備 Microsoft MB-820 考試的話，可以利用我們最新的擬真試題仔細地複習備考了。因為最新的 MB-820 擬真試題可以為你的複習和看書減輕很多的煩惱。

Microsoft MB-820 考試大綱：

主題	簡介
主題 1	Develop by using AL objects: Building and extending tables and reports is discussed in this topic. It also explains Designing and creating an XMLport. Lastly, it discusses how to work with entitlement and permission set objects.
主題 2	Develop by using AL: How to Customize the UI experience and Use AL for business central extension is discussed here. It also delves into explaining the essential development standards.
主題 3	Work with development tools: Implementing semi-automated test processes and managing and assessing telemetry are its sub-topics.

MB-820考試資訊 & MB-820學習筆記

相信在IT行業工作的很多人都希望通過一些IT認證考試獲得到相應的認證證書。一些IT認證證書可以幫助你在競爭激烈的IT行業裏步步高升。目前很熱門的Microsoft MB-820 認證證書就是其中之一。雖然通過Microsoft MB-820 認證考試不是很容易，但是還是有很多通過Microsoft MB-820 認證考試的辦法。你可以選擇花大量的時間和精力來鞏固考試相關知識，也可以選擇一些有效的培訓課程。PDFExamDumps提供的針對性模擬測試就很有效，能節約你的寶貴的時間和精力就能達到你想要目標，PDFExamDumps會是你很好的選擇。

最新的 Microsoft Dynamics 365 MB-820 免費考試真題 (Q98-Q103):

問題 #98

You develop a test application.

You must meet the following requirements:

* Roll back changes to a test method after run time.

* Run an approve action on a test page named TestPageA.

You need to implement the given requirements on the test codeunit

Which actions should you perform? To answer, select the appropriate options in the answer area NOTE: Each correct selection is worth one point.

答案:

解題說明:

問題 #99

You need to create the Fabrikam Vendor API for the accounting department.

How should you complete the code segment? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

答案:

解題說明:

Explanation:

問題 #100

A company has a task that is performed infrequently. Users often need to look up the procedure to complete the task.

The company requires a wizard that leads users through a sequence of steps to complete the task.

You need to create the page to enable the wizard creation.

Which page type should you use?

- A. Card
- B. RoleCenter
- C. List
- D. NavigatePage

答案: D

解題說明:

For a task that is performed infrequently and requires users to follow a sequence of steps, a wizard-like interface is ideal. In Microsoft Dynamics 365 Business Central, the NavigatePage page type (A) is best suited for this purpose. NavigatePage is designed to guide users through a series of steps or pages, allowing them to complete a task by making choices or entering data in a structured manner. This page type is often used for setup wizards, data migration tasks, or any other process that benefits from a step-by-step approach. Unlike the other page types like Card (B), RoleCenter (C), or List (D), NavigatePage specifically supports the navigation and decision-making flow required for wizard creation, making it the optimal choice for this requirement.

問題 #101

Case Study 2 - Alpine Ski House

Company Background

Alpine Ski House is a company that owns and operates hotels, restaurants, and stores.

Currently, the company uses the following software and interface:

- Property management software (PMS) to manage hotel rooms
- On-premises accounting software to generate sales invoices and create purchase orders
- An API that allows restaurants and stores to obtain necessary information Restaurants and stores use standalone software for point of sale (POS) devices. Each day, the POS terminals generate a text file of sales data and save the files in a server folder. An account assistant must manually import the files to the current software tables to be processed by the system.

The general manager receives several reports monthly from department managers. The reports take too much time to prepare.

Planned improvements

The company is moving from a different system to Business Central online to manage the whole company.

The company plans to increase efficiency in every department by using APIs to obtain or share information between the different systems.

Each department involved in purchasing must be able to make purchase requests automatically and easily. The departments do not need access to the full ERP management system.

Technical specifications

Alpine Ski House requires the development of several extensions for the planned improvements.

Business Central design patterns must be used to develop all extensions.

Alpine Ski House must develop the following pages:

- Pages that provide multiple configurations in a multistep dialog, like a wizard, to provide required information when the extensions are first installed

- Department-specific Role Center pages to show relevant information and pages with additional information The IT department plans to use Power BI to analyze departmental information. The database must be configured to provide optimal performance.

Department-specific requirements

Housekeeping department

The housekeeping department requires the following to increase efficiency and help avoid data entry errors:

- A Housekeeping Role Center to minimize navigation to relevant areas in Business Central online and to show relevant information in it

- Pages to embed into a new Room page to show additional information about the Room entity

- A table named Room Incident for the housekeeping team to enter room issue information

- A Housekeeping canvas app that connects to an extension

- The department requires the development of an extension with a new API page named RoomsAPI.

- The housekeeping team will use RoomsAPI to publish room details, update when work is complete, or provide repair notifications from the canvas app.

- This custom API page must expose a custom table named Rooms and have an ID 50000. The table must be able to update from the PMS. - The PMS team must know the endpoint to connect to the custom API.

- A developer provides the following details for the API page:

- The extension must be published in Business Central online and include a list page named Room List that includes all hotel rooms.

- Installation or updates to this extension must meet the following requirements:

- o Some web services must be published automatically.

- o The version of the specified application's metadata must be obtained in AL language, o The code required to perform tasks cannot be accessible from other parts of the application.

- o The Room Incident table information must include the following fields:

- o Incident entry: An incremental number

- o Room No.: A room from the Room table

- o Incident Date: The work date

- The table definition in the Room Incident table must autofill the Incident Date when the housekeeping team inserts a new record,

- The value for Incident Date must be the work date configured in the Business Central online client.

- Status: Includes the following options to identify the status of the incident:

- o Open: When the Room Incident is created

- o In Progress: When someone starts repair work

- o Closed: When the incident is solved

- Incident Closing Date: Auto-updating field (when the status passes to Closed, the field will update with the work date)

- Incident Description: Text

- Image: Media data type

- o The stored picture must be downloadable from a menu action,

- o A Room Incident page must be developed to contain the download action.

Department-specific requirements

Restaurants and stores

To increase efficiency, the new system must manage the generated data from the restaurants and stores directly by using the API on the POS terminals.

The company requires a codeunit called from a job queue to read the information from the POS terminal APIs.

The POS terminal information must be stored in a table named POS Information, have an ID

50100, and be editable on a page.

The account manager requires an option on the menu of the page to run the process manually.

To analyze the information received from the POS terminals, the company requires:

- A custom API named ticketAPI to export the information to Power BI

- Use of the Read Scale-Out feature to improve database performance

Department-specific requirements

Purchasing department and non-conformity handling

The purchasing department requires a new entity in Business Central online to log non- conformities of goods received from vendors.

The entity must be set up as follows:

- The non-conformity entity must have two tables:

- o a header with common information

- o one or more lines with the detailed received items that are non-conforming

- The entity requires a page named Non-conformity and a subpage named Non-conformity Lines to store the information.

- When a purchase order with incorrect quantity or quality issues is received, the entity must create a non-conformity document in

the system. The following information must be included in the document:

- Non-conformity Number: must use the No. Series table from Business Central online to manage this field and use these features:
 - o Alphanumeric values
 - o Number format that includes "NC" and the year as part of the number; for example, NC24-001
- Non-conformity Date: stores only the creation date
- Vendor No.: stores the number of the vendor that sent the items; only vendors from the company must be included
- Owner: code of an employee defined in the company
- Receipt No.: must meet the following conditions:
 - o Be an existing receipt No.
 - o Be received from the vendor indicated in the Vendor No. field
 - o Comments: can include comments with rich text and pictures to illustrate quality problems
 - o Status: includes non-conformity statuses, such as:
 - o Open
 - o Notified
 - o Closed
- Lines must contain the following details:
 - o Item No.: item received (for existing inventory items only)
 - o Description: item description
 - o Quantity: non-conforming quantity
 - o Non-conformity Type:
 - Quality
 - Quantity
 - Delivery date

The serial numbers of the non-conformities and the period in which they can be created must be in a configuration table and its corresponding page to allow them to be modified for the users.

Hotspot Question

You need to define the properties of the comments field of the Non-conformity page.

How should you complete the code segment? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

答案:

解題說明:

問題 #102

You need to download a stored picture from the Room Incident page.

How should you complete the code segment? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

答案:

解題說明:

問題 #103

.....

手上能拿到一些實用的認證證書，無疑為自己的就業開拓了一番新的領土和創造了一些機會。MB-820 是全球最大的網絡設備公司 Microsoft 公司的認可的初級技術認證，在整個 Microsoft 認證體系中處於售前規劃方向的基礎證書，有了MB-820 認證你的平均年薪將不低於10萬人民幣。雖然獲取 MB-820 認證需要投入額外的時間與金錢，但事實證明IT認證的投入產出是值得的，對於未來的職業發展非常有利。
