You can use this software without an active internet connection.

Salesforce Certified JavaScript Developer I Exam Sample Questions (Q187-Q192):

NEW QUESTION # 187

developer creates a new web server that uses Node.js. It imports a server library that uses events and callbacks for handling server functionality.

The server library is imported with require and is made available to the code by a variable named server. The developer wants to log any issues that the server has while booting up.

Given the code and the information the developer has, which code logs an error at boost with an event?

- A. `Server.catch ((server) => {
 console.log('ERROR', error);
});`
- B. `Try{
 server.start();
} catch(error) {
 console.log('ERROR', error);
}`
- C. `Server.on ('error', (error) => {
 console.log('ERROR', error);
});`
- D. `Server.error ((server) => {
 console.log('ERROR', error);
});`

Answer: C

NEW QUESTION # 188

developer wants to use a module named universalContainersLib and then call functions from it.

How should a developer import every function from the module and then call the functions foo and bar ?
