Both our soft test engine and app test engine provide the exam scene simulation functions. You set timed Salesforce-Media-Cloud test and practice again and again. Besides, Salesforce-Media-Cloud exam test engine cover most valid test questions so that it can guide you and help you have a proficient & valid preparation process.

Salesforce Salesforce-Media-Cloud Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Implement: This section of the exam measures skills of a Salesforce Solution Architect and focuses on implementing the Media Cloud solution based on business and technical requirements. It includes supporting CI• CD deployment processes, planning data migration with an understanding of the data model, selecting appropriate integration approaches for media-specific contexts, applying security settings to control data access, and ensuring performance outcomes align with defined KPIs and non-functional expectations.
Topic 2	<ul style="list-style-type: none">• Design: This section of the exam measures the skills of a Salesforce Media Cloud Consultant and covers the process of designing scalable and efficient Media Cloud solutions. It focuses on creating solution flows using ASM capabilities, applying best practices in solution architecture, recommending product model and pricing strategies, and aligning designs with the Media Cloud data model. It also evaluates the candidate's ability to set up sharing and permission sets, identify integration points, assess reporting needs, and determine deployment strategies that fit within a CI• CD environment.
Topic 3	<ul style="list-style-type: none">• Discovery: This section of the exam measures the skills of a Salesforce Solution Architect and covers the ability to assess business and technical requirements for implementing Media Cloud applications. It includes determining the technical scope for a statement of work (SOW), mapping use cases to Salesforce Media Cloud components, understanding how third-party systems integrate with the Media Cloud ecosystem, outlining system flows based on the existing business environment, and identifying relevant non-functional requirements based on customer needs.

ExamsReviews facilitates customers with a 24/7 support system which means whenever they get stuck somewhere they don't struggle and contact the support system which will assist them in the right way. A lot of students have prepared from practice material and rated it positively.

Salesforce Media Cloud Accredited Professional (AP) Exam Sample Questions (Q24-Q29):

NEW QUESTION # 24

A customer has the necessary licenses and dependent packages installed and would like to install the Advertising Sales Management (ASM) package.

Which step needs to be taken in order to do this?

- **A. Install by using a release package installation link from Salesforce Industries success community, selecting the industries applications package that is generally available (GA) for the target sandbox.**
- B. Request a trial org of the ASM package in the Salesforce Industries Media and Entertainment Process Library. Use the trial org requested as the source org for the target sandbox.
- C. Go to the Vlocity CMT administration tab in the production org, search for the ASM app, and select enable. Then refresh the target sandbox.
- D. Find the installed package of Salesforce Industries Communications, Media, and Energy managed package in the setup of the sandbox instance and enable ASM.

Answer: A

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

The official way to install ASM is via the release package installation link provided in the Salesforce Industries Success Community. This ensures installing the latest GA version for the target sandbox. Other options refer to trial orgs or enabling existing packages but do not follow the official installation path.

NEW QUESTION # 25

A broadcaster, who has implemented Media Cloud, wants to have a comparative view of planned versus actual revenue based on actual impressions.

In which two ways can a Consultant obtain both planned and actual revenue amounts?

Choose 2 answers

- **A. Planned revenue from Media Cloud and actuals from Ad Server**
- B. Planned revenue from Ad Server and actuals from Media Cloud
- C. Planned revenue and actuals from Ad Server
- **D. Planned revenue and actuals from Media Cloud**

Answer: A,D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Media Cloud is designed to provide planned revenue figures as part of the media planning and booking process, while actual revenue data often comes from external Ad Servers that track delivery and impressions. To have a complete comparative view, consultants commonly combine planned revenue data maintained within Media Cloud with actual revenue data retrieved from the Ad Server, or use Media Cloud's integrated capabilities if actuals are captured there. Salesforce Media Cloud documentation supports this dual approach to revenue tracking by integrating planned data internally and actuals from connected Ad Servers for accurate financial analysis and reporting.

NEW QUESTION # 26

Which three Marketing Cloud Intelligence integration methods can a Consultant use to ingest and integrate all available channels as well as first and third party data sources, to create a cross-channel optimization platform?

Choose 3 answers

- A. Data Raptor
- B. Marketing Cloud Intelligence Data Lake Stream
- C. API Connectors
- D. TotalConnect
- E. Data Mapping Visualizer

Answer: B,C,D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Marketing Cloud Intelligence (MCI) supports multiple integration methods including API Connectors for direct data ingestion, TotalConnect for ingesting external datasets, and Data Lake Streams for large-scale streaming data ingestion. Data Raptor and Data Mapping Visualizer are primarily Salesforce data transformation tools, not ingestion methods for MCI.

NEW QUESTION # 27

A Media Publisher is using Advertising Sales Management (ASM) to manage their B2B Ad Sales business and Google Ad Manager (GAM). They want to have a complete view of their media plans using dashboards.

Which system integration provides built-in dashboards to integrate with the ASM application?

- A. Google Data Studio
- B. Tableau
- C. Marketing Cloud Intelligence
- D. CRM Analytics

Answer: C

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Marketing Cloud Intelligence (formerly Datorama) provides built-in dashboards designed for Media Cloud ASM, offering cross-channel campaign performance visibility. While Tableau and CRM Analytics offer reporting, MCI is the Salesforce-native integrated solution specifically targeting media plans and ad campaigns in ASM. Google Data Studio is a separate Google product not embedded in Salesforce.

NEW QUESTION # 28

Media Campaign is a record type of which object?

- A. Account
- B. Quote
- C. Campaign
- D. Opportunity

Answer: B
