Salesforce Order Management Administrator Accredited Professional Sample Questions (Q13-Q18):

NEW QUESTION # 13

An administrator is configuring delivery methods. What two types of records need to be created?

- A. Delivery Method
- B. Order Delivery Method
- C. Order Delivery Summary
- D. Product Summary
- E. Product

Answer: A,B

Explanation:

The Order Delivery Method and Delivery Method objects are used to configure delivery methods for orders.

A delivery method is a way of delivering an order to a customer, such as standard shipping, express shipping, or in-store pickup. A Delivery Method record defines the name, description, type, and cost of a delivery method. An Order Delivery Method record associates an order with a delivery method and stores additional information such as the delivery address, tracking number, and status. NEW QUESTION # 14

In which two ways can Order Management licenses be assigned?

- A. By Profile
- B. By User
- C. By Role
- D. By Permission Set

Answer: B,D

Explanation:

Explanation

Two ways that Order Management licenses can be assigned are:

By Permission Set. A Permission Set is a collection of settings and permissions that give users access to various tools and functions in Salesforce. A Permission Set can be assigned to individual users or groups of users, regardless of their profile or role. An administrator can create a Permission Set that includes the Order Management User permission, which enables users to access Order Management features and data. The administrator can then assign this Permission Set to the users who need Order Management licenses.

By User. A User is a record that represents a person who can log in and access Salesforce. A User has various fields and settings that determine their access and permissions in Salesforce, such as profile, role, license type, etc. An administrator can assign an Order Management license to a user by editing the user record and selecting Order Management User from the License Type picklist. The administrator can also enable the Order Management User permission on the user record.

NEW QUESTION # 15

Where should a service agent go first to view process exceptions related to a specific Order?

- A. Order Record - Details Tab
- **B. Order Summary Record - Related Tab**
- C. Change order Record -Related Tab
- D. Order Record - Process Exception Details Tab

Answer: B

NEW QUESTION # 16

An administrator is tasked to utilize a Product Price Book which is managed on an external platform. How can the administrator meet this requirement?

- A. This is not possible, all Products require a Pricebook Entry
- B. Edit the Product page layout to make the Pricebook field not require
- **C. Create an External Data Source in Setup which references the external platform where the Pricebook is held**
- D. Go to Setup. Order settings, and select Enable Optional Price Books for Orders

Answer: C

Explanation:

Explanation

The best way for the administrator to meet this requirement is to create an External Data Source in Setup that references the external platform where the Pricebook is held. An External Data Source is a type of metadata that defines the connection and authentication information for an external system that stores data outside of Salesforce. The administrator can create an External Data Source using the Lightning Connect OData 2.0 or

4.0 adapters, which support read-only access to data in relational databases. This way, the administrator can access the Product Price Book data from the external platform without importing it into Salesforce. Verified
