FCSS_SDW_AR-7.4 Reliable Test Online & FCSS_SDW_AR-7.4 High Quality

Our FCSS_SDW_AR-7.4 test questions provide free trial services for all customers so that you can better understand our products. You can experience the effects of outside products in advance by downloading clue versions of our FCSS_SDW_AR-7.4 exam torrent. In addition, it has simple procedure to buy our learning materials. After your payment is successful, you will receive an e-mail from our company within 10 minutes. After you click on the link and log in, you can start learning using our FCSS_SDW_AR-7.4 test material. You can download our FCSS_SDW_AR-7.4 test questions at any time. If you encounter something you do not understand, in the process of learning our FCSS_SDW_AR-7.4 exam torrent, you can ask our staff. We provide you with 24-hour online services to help you solve the problem. Therefore we can ensure that we will provide you with efficient services.

Fortinet FCSS - SD-WAN 7.4 Architect Sample Questions (Q68-Q73):

NEW QUESTION # 68

An administrator is configuring SD-WAN to load balance their network traffic. Which two things should they consider when setting up SD-WAN? (Choose two.)

- A. You can select the outbandwidth hash mode with all strategies that allow load balancing.
- B. Only the manual and best-quality strategies allow SD-WAN load balancing.
- C. When applicable, FortiGate load balances the traffic through all members that meet the SLA target.
- D. SD-WAN load balancing is possible only using the best quality and lowest cost (SLA) strategies.

Answer: A,C

NEW QUESTION # 69

Your FortiGate is in production. To optimize WAN link use and improve redundancy, you enable and configure SD-WAN. What must you do as part of this configuration update process?

- A. Replace references to interfaces used as SD-WAN members in the firewall policies.
- B. Disable the interface that you want to use as an SD-WAN member.
- C. Purchase and install the SD-WAN license, and reboot the FortiGate device.
- D. Replace references to interfaces used as SD-WAN members in the routing configuration.

Answer: D

Explanation:

When you enable SD-WAN and add interfaces as SD-WAN members, those interfaces are no longer referenced directly in routing. You must replace routing configuration references (e.g., static routes, policy routes) with the SD-WAN zone. Firewall policies, however, can still point to the SD-WAN zone without requiring replacement of individual member interfaces.

NEW QUESTION # 70

Which two statements are correct when traffic matches the implicit SD-WAN rule? (Choose two.)

- A. Traffic does not match any of the entries in the policy route table.
- B. The session information output displays no SD-WAN-specific details.
- C. Traffic is load balanced using the algorithm set for the v4-ecmp-mode setting.
- D. All SD-WAN rules have the default and gateway setting enabled.

Answer: A,B

NEW QUESTION # 71

Refer to the exhibit.

An administrator configures SD-WAN rules for a DIA setup using the FortiGate GUI. The page to configure the source and destination part of the rule looks as shown in the exhibit. The GUI page shows no option to configure an application as the destination of the SD-WAN rule Why?

- A. FortiGate allows the configuration of applications as the destination of SD-WAN rules only on the CLI.
- B. You must enable the feature first using the GUI menu System > Feature Visibility.
- C. You must enable the feature on the CLI.
- D. You cannot use applications as the destination when FortiGate is used for a DIA setup.

Answer: B

NEW QUESTION # 72

Which two statements correctly describe what happens when traffic matches the implicit SD-WAN rule? (Choose two.)

- A. FortiGate flags the session with `may_dirty` and `vwl_default`.
- B. The session information output displays no SD-WAN service id.
- C. Traffic is load balanced using the algorithm set for the v4-ecmp-mode setting.
- D. Traffic does not match any of the entries in the policy route table.
- E. The traffic is distributed, regardless of weight, through all available static routes.

Answer: B,D

Explanation:

When traffic matches the implicit SD-WAN rule, no specific SD-WAN service is applied, so the session information output does not show an SD-WAN service ID.

The implicit SD-WAN rule is considered only when no matching entry is found in the policy route table.

NEW QUESTION # 73

.....

Though there are three versions of the FCSS_SDW_AR-7.4 training braindumps: the PDF, Software and APP online. I like the Software version the most. This version of our FCSS_SDW_AR-7.4 training quiz is suitable for the computers with the Windows system. It is a software application which can be installed and it stimulates the real exam's environment and atmosphere. It builds the users' confidence and the users can practice and learn our FCSS_SDW_AR-7.4 learning guide at any time.

FCSS_SDW_AR-7.4 Reliable Test Online: https://www.test4engine.com/FCSS_SDW_AR-7.4_exam-latest-braindumps.html
