They have rich knowledge and rich experience on the XK0-006 Study Guide. So they know every detail about the XK0-006 exam questions and can make it better. With our XK0-006 learning guide, you will be bound to pass the exam.

CompTIA Linux+ Certification Exam Sample Questions (Q30-Q35):

NEW QUESTION # 30
Following the completion of monthly server patching, a Linux administrator receives reports that a critical application is not functioning. Which of the following commands should help the administrator determine which packages were installed?

- A. dnf list
- B. dnf info
- C. dnf history
- D. dnf search

Answer: C

Explanation:
The dnf history command shows a log of past package operations (install, update, remove), allowing the administrator to review which packages were installed or updated during the patching process.

NEW QUESTION # 31

A systems administrator needs to check the statuses of all the services on a Linux server. Which of the following commands accomplishes this task?

- A. systemctl is-active --services
- B. systemctl list-sockets --type-services
- C. systemctl list-units --type-services
- D. systemctl is-enabled --services

Answer: C

Explanation:
The systemctl list-units --type=service command displays all loaded service units and their statuses (running, exited, failed, etc.), allowing the administrator to check the state of all services on the server.

NEW QUESTION # 32

An administrator must secure an account for a user who is going on extended leave. Which of the following steps should the administrator take? (Choose two).

- A. Set the user's files to immutable.
- B. Delete the user's /homefolder.
- C. Change the date on the /homefolder to that of the expected return date.
- D. Instruct the user to log in once per week.
- E. Change the user's shell to /sbin/nologin.
- F. Run the command passwd -l user.

Answer: E,F

Explanation:
passwd -l user locks the user's account by disabling the password, preventing logins.
Change the user's shell to /sbin/nologin ensures the account cannot be used for interactive logins, further securing it.

NEW QUESTION # 33

A user on a Linux VM is running /work/test.shBash script and receives the following error:
bash: /work/test.sh: Permission denied
After further investigation, the user receives the following outputs:

```
# ls -l /work/test.sh
-rwxr--r--.  1 testuser   test              512 Jul 12  2023 /work/test.sh

# mount
/dev/mapper/work on /work type xfs (rw,nosuid,nodev,noexec,relatime,seclabel,attr2,noquota)
```

Which of the following commands should a systems administrator run to fix the issue?

- A. chmod o+x /work/test.sh
- B. chmod g+x /work/test.sh
- C. mount -o remount,exec /work

- D. mount -o remount,suid /work

Answer: C

Explanation:
The script /work/test.sh already has execute permissions (-rwxr--r--), but the filesystem is mounted with the noexec option, which prevents execution of binaries and scripts. Remounting the filesystem with the exec option allows execution of the script.

NEW QUESTION # 34
Which of the following Ansible components contains a list of hosts and host groups?

- A. Fact
- B. Collection
- C. Inventory
- D. Playbook

Answer: C

Explanation:
In Ansible, the inventory defines the list of managed nodes (hosts) and groups of hosts. It is the source from which Ansible knows what systems to configure or manage.

NEW QUESTION # 35
......

We have professional technicians examine the website every day, therefore if you buy XK0-006 exam cram from us, you can enjoy a clean and safe online shopping environment.
