Scrum SAFe Practitioner Exam (6.0) Sample Questions (Q263-Q268):

NEW QUESTION # 263

What is critical to successfully implementing quality in a Lean-Agile environment?

- A. A phased-gate rollout
- **B. Making quality everyone's responsibility**
- C. Separation of Dev and Ops
- D. Component teams

Answer: B

Explanation:

= Making quality everyone's responsibility is critical to successfully implementing quality in a Lean-Agile environment. This means that all the people involved in creating and delivering value to the customer, from business functions to software applications, share the same quality standards and practices. Quality is not something that can be delegated or outsourced to a separate team or department. It is embedded in the culture, mindset, and behavior of every individual and team. Making quality everyone's responsibility enables faster feedback, continuous improvement, and higher customer satisfaction^{1,2}. NEW QUESTION # 264

What visibility should Scrum Masters provide during the Agile Release Train Sync?

- A. Visibility into collaboration deployment
- **B. Visibility into progress and impediments**
- C. Visibility into single source design decisions
- D. Visibility into system Solution Intent

Answer: B

Explanation:

The Agile Release Train Sync is a weekly meeting that synchronizes the ART stakeholders and provides visibility into the ART's progress and impediments¹. The Scrum Masters represent their Agile teams, provide updates on their status, relay questions, and help address challenges. They safeguard the team's needs and effectiveness². The visibility that Scrum Masters provide during the Agile Release Train Sync is mainly into the progress and impediments of their teams, such as the completion of features, stories, and enablers, the resolution of dependencies, the identification of risks and issues, and the demonstration of value³. The other options are not the primary focus of the Scrum Masters' visibility during the Agile Release Train Sync. NEW QUESTION # 265

What is one example of differentiating business objectives?

- A. Enterprise Goals
- **B. Strategic Themes**
- C. Portfolio Vision
- D. Solution Intent

Answer: B

Explanation:

Differentiating business objectives are those that provide competitive differentiation and strategic advantage for the enterprise. They

reflect the unique value proposition and vision of the enterprise and guide the portfolio strategy and decision-making. One example of differentiating business objectives is Strategic Themes, which are portfolio-level business objectives that connect a portfolio to the strategy of the enterprise.

They are written in Objective and Key Result (OKR) format and influence the vision, budget, and backlogs for the portfolio, large solution, and program levels. They also provide business context and alignment for the agile teams and ARTs in the portfolio.
