

2026 SPLK-3002 Exam Book Pass Certify | Efficient Pdf SPLK-3002 Pass Leader: Splunk IT Service Intelligence Certified Admin

BTW, DOWNLOAD part of VCEdumps SPLK-3002 dumps from Cloud Storage: https://drive.google.com/open?id=18ZhKSKah5LxI6F-WVB_vAf9TyBMaVZ_t

VCEdumps designed this prep material to help you pass the exam on the first try. It may sound complicated, but once you go through regular study and intensive practice, passing the final exam would be a piece of cake. The cost of Splunk IT Service Intelligence Certified Admin (SPLK-3002) certification itself is expensive, ranging from \$100 to \$1000, so you can't risk wasting that amount. VCEdumps ensures that this does not happen by providing you with reliable and updated preparation material.

Splunk SPLK-3002 is an IT Service Intelligence Certified Admin exam that aims to validate the knowledge and skills of IT professionals in implementing and managing Splunk IT Service Intelligence. Splunk IT Service Intelligence Certified Admin certification is designed for individuals who have a deep understanding of IT operations and analytics and want to demonstrate their expertise in designing, implementing, and maintaining Splunk IT Service Intelligence solutions.

Splunk SPLK-3002 (Splunk IT Service Intelligence Certified Admin) Certification Exam is designed for IT professionals who want to demonstrate their skills and knowledge in using Splunk IT Service Intelligence (ITSI) to monitor and analyze IT services. SPLK-3002 exam covers a range of topics, including configuring ITSI, creating service level agreements (SLAs), using KPIs (Key Performance Indicators) and service analytics, and troubleshooting ITSI issues. Passing SPLK-3002 Exam proves that you have the expertise to effectively use ITSI to improve IT services and ensure business continuity.

Splunk SPLK-3002 exam is targeted at IT professionals who have experience in working with data analysis, monitoring, and visualization tools. SPLK-3002 exam requires candidates to have a deep understanding of Splunk IT Service Intelligence, including its architecture, components, data models, and data inputs. Candidates are also expected to have experience in deploying and managing Splunk IT Service Intelligence in complex IT environments.

New Launch SPLK-3002 PDF Dumps [2026] - Splunk SPLK-3002 Exam Question

Without a doubt, there is one thing that can assist them with perceiving this interest and clearing their Splunk IT Service Intelligence Certified Admin (SPLK-3002) exam with flying colors. Splunk SPLK-3002 dumps merge all that gigantic and the competitor doesn't require to purchase the aide or different books to review. They have this test material and need nothing else for planning Splunk IT Service Intelligence Certified Admin exam.

Splunk IT Service Intelligence Certified Admin Sample Questions (Q38-Q43):

NEW QUESTION # 38

Besides creating notable events, what are the default alert actions a correlation search can execute? (Choose all that apply.)

- A. Run a script.
- B. Include in RSS feed.
- C. Ping a host.
- D. Send email.

Answer: A,B,D

Explanation:

Explanation

Throttling applies to any correlation search alert type, including notable events and actions (RSS feed, email, run script, and ticketing).

NEW QUESTION # 39

In maintenance mode, which features of KPIs still function?

- A. New KPIs can be created, but existing KPIs are locked.
- B. KPI searches still run during maintenance mode, but results go to `itsi_maintenance_summary` index.
- C. KPI searches will execute but will be buffered until the maintenance window is over.
- D. KPI calculations and threshold settings can be modified.

Answer: C

Explanation:

It's a best practice to schedule maintenance windows with a 15- to 30-minute time buffer before and after you start and stop your maintenance work. This gives the system an opportunity to catch up with the maintenance state and reduces the chances of ITSI generating false positives during maintenance operations.

Reference:

A is the correct answer because KPI searches still run during maintenance mode, but the results are buffered until the maintenance window is over. This means that no alerts are triggered during maintenance mode, but once it ends, the buffered results are processed and alerts are generated if necessary. You cannot create new KPIs or modify existing KPIs during maintenance mode.

NEW QUESTION # 40

There are two departments using ITSI. Finance and Sales. Analysts in each department should not be allowed to see each other's services. What are the role configuration steps required to accomplish this?

- A. `itoe_finance_admin`, inherited from `itoe_team_admin`; `itoe_sales_admin`, inherited from `itoe_team_admin`; `itoe_finance_analyst`, inherited from `itoe_analyst`; `itoe_sales_analyst`, inherited from `itoe_analyst`.
- B. `itoe_finance_admin`, inherited from `itoe_admin`; `itoe_sales_admin`, inherited from `itoe_team_admin`; `itoe_finance_analyst`, inherited from `itoe_analyst`; `itoe_sales_analyst`, inherited from `itoe_analyst`.
- C. `itoe_finance_admin`, inherited from `itoe_admin`; `itoe_sales_admin`, inherited from `itoe_team_admin`; `itoe_finance_analyst`, inherited from `itoe_analyst`; `itoe_sales_analyst`, inherited from `itoe_team_analyst`.
- D. `itoe_finance_admin`, inherited from `itoe_admin`; `itoe_sales_admin`, inherited from `itoe_team_admin`; `itoe_finance_analyst`, inherited from `itoe_team_analyst`; `itoe_sales_analyst`, inherited from `itoe_team_analyst`.

Answer: C

Explanation:

C is the correct answer because teams are a feature of ITSI that allow you to restrict access to service content in UI views based on user roles. To create separate teams for finance and sales analysts, you need to create custom roles that inherit from the `itoe_analyst` role, which has read-only access to ITSI content. For example, you can create `itoe_finance_analyst` and `itoe_sales_analyst` roles that inherit from `itoe_analyst`. Then, you need to create custom teams that include these roles and assign them to the relevant services.

For example, you can create a finance team that includes the `itoe_finance_analyst` role and assign it to the finance services.

Similarly, you can create a sales team that includes the `itoe_sales_analyst` role and assign it to the sales services. This way, analysts in each department can only see their own services and not each other's.

NEW QUESTION # 41

Which of the following is the best use case for configuring a Multi-KPI Alert?

- A. Comparing content between two notable events.
- **B. Raising an alert when one or more KPIs indicate an outage is occurring.**
- C. Using machine learning to evaluate when data falls outside of an expected pattern.
- D. Comparing anomaly detection between two KPIs.

Answer: B

Explanation:

Reference:

A multi-KPI alert is a type of correlation search that is based on defined trigger conditions for two or more KPIs. When trigger conditions occur simultaneously for each KPI, the search generates a notable event. For example, you might create a multi-KPI alert based on two common KPIs: CPU load percent and web requests. A sudden simultaneous spike in both CPU load percent and web request KPIs might indicate a DDOS (Distributed Denial of Service) attack. Multi-KPI alerts can bring such trending behaviors to your attention early, so that you can take action to minimize any impact on performance. Multi-KPI alerts are useful for correlating the status of multiple KPIs across multiple services. They help you identify causal relationships, investigate root cause, and provide insights into behaviors across your infrastructure. The best use case for configuring a multi-KPI alert is to raise an alert when one or more KPIs indicate an outage is occurring, such as when the service health score drops below a certain threshold or when multiple KPIs have critical severity levels. Reference: Create multi-KPI alerts in ITSI

NEW QUESTION # 42

ITSI Saved Search Scheduling is configured to use `realtime_schedule = 0`. Which statement is accurate about this configuration?

- A. If this value is set to 0, the scheduler might skip some execution periods to make sure that the scheduler is executing the searches running over the most recent time range.
- **B. If this value is set to 0, the scheduler bases its determination of the next scheduled search on the last search execution time.**
- C. If this value is set to 0, the scheduler may skip scheduled execution periods.
- D. If this value is set to 0, the scheduler bases its determination of the next scheduled search execution time on the current time.

Answer: B

Explanation:

Explanation

If set to 0, the scheduler determines the next scheduled search run time based on the last run time for the search. This is called continuous scheduling.

NEW QUESTION # 43

.....

Now they have become certified Splunk IT Service Intelligence Certified Admin Certification Exam experts and pursue a rewarding career in the top world brands. You can also trust top-notch and easy-to-use Splunk SPLK-3002 practice test questions. The Splunk IT Service Intelligence Certified Admin (SPLK-3002) exam questions are checked and verified by experienced and qualified Splunk IT Service Intelligence Certified Admin (SPLK-3002) exam trainers. They have years of experience and knowledge to collect, design, and answer the real Splunk IT Service Intelligence Certified Admin (SPLK-3002) exam questions.
