156-215.82 Test Assessment, 156-215.82 Latest Test Experience

Revised and updated according to the syllabus changes and all the latest developments in theory and practice, our Check Point Certified Security Administrator - R82 dumps are highly relevant to what you actually need to get through the certifications tests. Moreover they impart you information in the format of 156-215.82 Questions and answers that is actually the format of your real certification test. Hence not only you get the required knowledge but also find the opportunity to practice real exam scenario. For consolidation of your learning, our Check Point Certified Security Administrator - R82 dumps PDF file also provide you sets of practice questions and answers. Doing them again and again, you enrich your knowledge and maximize chances of an outstanding exam success.

CheckPoint Check Point Certified Security Administrator - R82 Sample Questions (Q165-Q170):

NEW QUESTION # 165

What is the purpose of a Clean-up Rule?

- A. Clean-up Rules do not server any purpose.
- B. Provide a metric for determining unnecessary rules.
- **C. To drop any traffic that is not explicitly allowed.**
- D. Used to better optimize a policy.

Answer: C

Explanation:

A clean-up rule is a rule that is placed at the end of the security policy to drop any traffic that is not explicitly allowed by the previous rules. It is a best practice to have a clean-up rule to prevent unauthorized access and log the dropped packets for analysis. The other options are not the purpose of a clean-up rule. Clean-up Rule, Check Point CCSA - R81: Practice Test & Explanation

NEW QUESTION # 166

Fill in the blank: An Endpoint identity agent uses a _____ for user authentication.

- A. Shared secret
- B. Token
- C. Username/password or Kerberos Ticket
- D. Certificate

Answer: C

Explanation:

An Endpoint identity agent uses a username/password or Kerberos ticket for user authentication³, p. 28. An Endpoint identity agent is a lightweight client installed on endpoint computers that communicates with Identity Awareness gateways and provides reliable identity information. An Endpoint identity agent does not use a shared secret, a token, or a certificate for user authentication. Check Point CCSA - R81: Practice Test & Explanation, [Check Point Identity Awareness Administration Guide R81]

NEW QUESTION # 167

Choose what BEST describes the reason why querying logs now are very fast.

- A. SmartConsole now queries results directly from the Security Gateway.
- B. Indexing Engine indexes logs for faster search results.
- C. New Smart-1 appliances double the physical memory install.
- D. The amount of logs being stored is less than previous versions.

Answer: B

Explanation:

The reason why querying logs now are very fast is that Indexing Engine indexes logs for faster search results. Indexing Engine is a component of R81 Management that creates and maintains an index of log data, which enables quick and efficient log searches⁴. The other options are not related to the speed of log querying. The amount of logs being stored may vary depending on the log retention settings. New Smart-1 appliances may have improved hardware specifications, but they do not affect the log querying process directly. SmartConsole queries results from the Security Management Server, not from the Security Gateway.

NEW QUESTION # 168

After the initial installation on Check Point appliance, you notice that the Management interface and default gateway are incorrect. Which commands could you use to set the IP to 192.168.80.200/24 and default gateway to 192.168.80.1.

- A. `set interface Mgmt ipv4-address 192.168.80.200 mask-length 24``set static-route default nexthop gateway address 192.168.80.1``onsave config`
- B. `set interface Mgmt ipv4-address 192.168.80.200 255.255.255.0``add static-route 0.0.0.0.0.0.0.0 gw 192.168.80.1``onsave config`
- C. `add interface Mgmt ipv4-address 192.168.80.200 255.255.255.0``add static-route 0.0.0.0.0.0.0.0 gw 192.168.80.1``onsave config`
- D. `add interface Mgmt ipv4-address 192.168.80.200 mask-length 24``add static-route default nexthop gateway address 192.168.80.1``onsave config`

Answer: A

Explanation:

The commands you could use to set the IP to 192.168.80.200/24 and default gateway to 192.168.80.1 after the initial installation on Check Point appliance are:

`set interface Mgmt ipv4-address 192.168.80.200 mask-length 24`. This command sets the IPv4 address and subnet mask of the Management interface.

`set static-route default nexthop gateway address 192.168.80.1 on`. This command sets the default gateway for IPv4 routing.
`save config`. This command saves the configuration changes.

NEW QUESTION # 169

Which SmartConsole tab shows logs and detects security threats, providing a centralized display of potential attack patterns from all network devices?

- A. Gateway and Servers
- B. Manage Setting
- **C. Logs and Monitor**
- D. Security Policies

Answer: C

Explanation:

The SmartConsole tab that shows logs and detects security threats, providing a centralized display of potential attack patterns from all network devices, is Logs and Monitor¹, p. 24. The Logs and Monitor tab allows administrators to view logs from various sources, such as Security Gateways, SmartEvent servers, and SmartReporter servers. Gateway and Servers, Manage Setting, and Security Policies are other tabs in SmartConsole that have different functions.
