HPE7-A11復習過去問 & HPE7-A11日本語版

HPE7-A11学習資料は、消費者に無料の試用サービスをJpexam提供します。HPE7-A11学習資料に興味があり、HP無料でトライアル質問バンクをすぐにダウンロードして体験できます。トライアルを通じて、HPE7-A11試験ガイドでさまざまな学習経験ができます。私たちの言うことは嘘ではないことがわかり、すぐに製品に恋をすることになります。あなたの人生の成功の鍵として、HPE7-A11学習教材があなたにもたらす利益は金銭では測定されません。HPE7-A11試験トレントは、最短時間でHPE Network Campus Access Professional Architect Exam試験に合格するのに役立ちます。

HPE Network Campus Access Professional Architect Exam 認定 HPE7-A11 試験問題 (Q11-Q16):

質問 # 11

Which licenses are needed in order to use the UXI Client on Zebra (Devices? (Select two.)

- A. UXI Agent Subscription
- B. UXI Cloud Subscription
- C. Wireless Insights
- D. UXI LTE Subscription

正解: A、B

解説:

To utilize the UXI Client on Zebra Devices, the necessary licenses include the UXI Cloud Subscription (Option A) and the UXI Agent Subscription (Option B). The UXI Cloud Subscription provides access to the UXI platform's cloud-based analytics and insights, facilitating the monitoring and management of network performance and user experience. The UXI Agent Subscription is required for each Zebra device, enabling it to run the UXI Client software that collects and sends network performance data to the UXI cloud platform. Together, these licenses empower organizations to enhance network visibility and improve the user experience on Zebra devices within their networks.

質問 # 12

You are developing a wireless intrusion detection and prevention strategy (WIDS/WIPS) for a client's enterprise network using HPE Aruba Networking and AOS-10. As part of your design, you want to deploy dedicated Air Monitors (AMs).

Which two statements align with HPE Aruba Networking best practices for implementing AMs in an AOS-10 environment? (Choose two.)

- A. Detection of infrastructure threats is enabled by default at the "Low" setting. Raise it after confirming there are no false positive matches.
- B. AOS-10 APs operating in "radio mode" act as Hybrid AMs and scan the 4.9 GHz public safety band for local security alerts.
- C. Deauthenticate containment is disabled by default, which is recommended only after consulting with security and legal stakeholders.
- D. There is no HPE Aruba Networking advised legal risk to recommending enabling "40MHz Intolerance" in the radio profile settings.
- E. It is recommended to deploy four or five AMs per 10,000 sq ft (930 sq m) as a starting point.

正解: A、C

解説:

Infrastructure threat detection is enabled at a conservative level by default to minimize false positives, and it should be tuned upward after validation in the environment.

Deauthentication containment is disabled by default due to legal and policy implications, and enabling it requires consultation with security and legal stakeholders.

質問 # 13

Which protocol does HPE's Aruba ClearPass primarily use for network access control?

- A. DNS
- B. RADIUS
- C. HTTP
- D. SNMP

正解: B

解説:

Aruba ClearPass utilizes RADIUS (Remote Authentication Dial-In User Service) for centralized network access control. It ensures secure and policy-based access for users and devices to the network, enforcing the correct access levels.

質問 # 14

A global cruise line company needs to refresh its current fleet. They will refresh the insides of the ship to be cost-effective and increase their sustain ability. They will replace the complete WLAN/LAN hardware of the ship. In this refresh, the company will not refresh its current security requirements. The CIO also wants to limit the number of unused ports in the switches. Future expansion will always mean a refresh of hardware. They start with the smallest ship with a maximum of 800 guests. Each ship has a LAN infrastructure consisting of two core switches, up to 10 redundant distribution switches, and up to 500 access switches (400 cabins, 100 technical rooms). The Core switches are located in the MDF of the ship and the distribution switches are located in the IDFs of the ship. Each cabin and technical room gets one single access switch.

The cabling structure of the ship will not be refreshed. Each IDF is connected to the MDF by SMF, of which two pairs are available for the interconnect between the core and distribution. The length of SM fiber between MDF and IDF is less than 300 meters (930 ft) and the type used is OS1. Each cabin is connected by a single OM2 pair to the IDF, the maximum length is 60 meters (200 ft). Each technical room is connected by a single OM2 pair to the IDF, with lengths between 100 and 150 meters (320 and 500 ft).

For each cabin/technical room the customer is looking to replace their current fan-less 2530/2540 without changing the requirements, except they need to upgrade the uplink to distribution switch to 10GbE to handle the increased network traffic, and the technical rooms need redundant power.

The WLAN infrastructure will be 1:1 refreshed without new cabling or new AP locations. Their WLAN Infrastructure is based on the 200/300 series Indoor and outdoor APs running InstantOS (less than 300 APs), the customer has no change in WLAN requirements.

The cruise line company will replace its current Internet connection before the LAN/WLAN refresh. The new Internet connection will provide a 99.8% uptime, which is needed to ensure the paid guest Wi-Fi is always operational. With this new internet connection, the CIO of the cruise line wants to base the design on the ESP architecture from Aruba because Internet connection is guaranteed. Based on the best practices, what should you recommend as the correct optic type for the connection between the IDF and the cabins?

- A. Aruba 10G SFP+ LC SR 300 m MMF Transceiver
- B. Aruba 10G SFP+ LC LRM 220 m MMF Transceiver
- C. Aruba 10G LC BiDi 40 km-D 1330/1270 XCVR
- D. Aruba 10GBASE-T SFP- RJ-45 30 m Cat6A Transceiver

正解: A

解説:

For the connection between the IDF and the cabins, which requires supporting distances up to 60 meters on OM2 fiber, the most appropriate optic type is the Aruba 10G SFP+ LC SR 300 m MMF Transceiver. This transceiver is compatible with multi-mode fiber (MMF) and is capable of supporting the required distance for connections to the cabins, making it a suitable choice based on the company's existing cabling structure and the need for 10GbE uplink capabilities to manage increased network traffic. The SR (Short Range) designation indicates that this transceiver is optimized for short to medium distances, which aligns with the maximum 60-meter distance from IDF to cabins, ensuring reliable and high-speed connectivity for the ship's LAN infrastructure within the given physical constraints.

質問 # 15

XYZ Regional Hospital is an integrated healthcare system of hospitals, neighborhood health centers, and small doctor offices. XYZ Regional Hospital has recently merged with 4x neighborhood health centers and 125 doctor branch offices. The wireless, wired access, and AAA solutions are outdated and need to be replaced.

XYZ Regional Hospital is looking to future-proof and improve efficiency across all sites by enhancing wired and wireless access and migrating to a centralized and unified wired/wireless and policy management that can provide uninterrupted availability of all systems.

Locations:

- XYZ Regional Hospital is located in New York City
- Dila Health Center is located in City A
- Mount Health Center is located in City B
- Rock Health Center is located in City C
- Branch clinics are located at different locations across the United States Requirements:
- Provide, via management software, one single pane of glass to manage wired and wireless LANs, and VPNs across campus, branch, and remote via web/cloud architecture providing near real-time insight, troubleshooting tools, and Service Level performance reporting.
- Seamless integration across wired, wireless, WAN, SD-Branch, IoT
- Provide secure wireless access to all the employees of the Regional Hospital and partners, as well as provide wireless Internet

access to medical citizens when they visit our facilities.

- All-access points must support the following features and specifications: 802.11.ax (Wi-Fi 6E Certified)
- Security options including WPA2/WPA3, 802.1X with RADIUS secure authentication
- Identify and authenticate every wireless and wired device
- End-to-end role-based security
- Seamless mobility across the hospital for medical teams, patients, and visitors
- Cuts Wi-Fi deployment times from days to hours and enables Zero-Touch deployments across the site
- Establishes a resilient, future-ready network infrastructure with the intelligence, scalability, and intuitive toolsets to meet emerging needs
- Fully redundant branch solution with dynamic path selection to the hospital The IT director of the hospital is concerned that the branch clinics will not have an onsite resource to troubleshoot any issues that may arise and is looking for a solution that would allow the hospital IT team to proactively monitor the branch offices.

Requirements:

- Monitor wireless and wired connections
- End-to-end view of experience identifying the point of failures
- Proactively troubleshoot issues impacting application performance

What is the correct solution?

- A. Client Insight
- **B. HPF Aruba Networking User Experience Insight**
- C. HPF Aruba Networking ClearPass Device Insight
- D. AirWave

正解: B

解説:

Aruba User Experience Insight (UXI) provides proactive monitoring using on-site UX sensors that continuously test wired, wireless, and application performance. It delivers end-to-end visibility, identifies points of failure, and alerts IT before users experience problems - ideal for remote branch clinics without local IT staff.

質問 # 16

.....

HPのHPE7-A11認定を取得するには、ある程度の時間と労力が必要です。JpexamのHPE7-A11のような試験の場合でも、難易度係数は高く、合格率は非常に低く、効率的な学習までの限られた時間を把握することさえできません。では、学習効率をどのように改善できますか？ここでは、非常に有用な製品であるHPE7-A11練習資料を紹介します。提供される情報とデータにより、合格率が高いためHPE7-A11認定試験に迅速かつ効率的に合格することができます 99%から100%と高い。

HPE7-A11復習過去問: https://www.jpexam.com/HPE7-A11_exam.html

候補者には非常に多くの保証を提供しており、HPE7-A11学習教材を心配なく購入できます、弊社のHPE7-A11学習教材が試験に合格し、簡単に認定を取得するのに役立ちます、HP HPE7-A11認証pdf資料 もし二十四時間に問題集が届かない場合に、使用途中に疑問と不具合があるなら、即時に我々の社員に連絡してください、君が弊社のHP HPE7-A11をご購入になってから、我々の承諾する一年間の更新サービスが無料で得られています、近年、多くの人々は、HPのHPE7-A11認定試験を受けることを選択します、HP HPE7-A11認証pdf資料 成功へのショットカードはありません、HPE7-A11試験に合格すると、より多くの人生のプロモーションとさらなる学習が可能になり、望ましい人生です。

毎度三十七度近くまで熱が出るけど、市販の風邪薬が体に合うので飲めば治る、コストはシリコンバレーよりもはるかに低く、主要な顧客に近づくことができ、多くの才能を利用できます、候補者には非常に多くの保証を提供しており、HPE7-A11学習教材を心配なく購入できます。

有難い-検証するHPE7-A11認証pdf資料試験-試験の準備方法HPE7-A11復習過去問

弊社のHPE7-A11学習教材が試験に合格し、簡単に認定を取得するのに役立ちます、もし二十四時間に問題集が届かない場合に、使用途中に疑問と不具合があるなら、即時に我々の社員に連絡してください、君が弊社のHP HPE7-A11をご購入になってから、我々の承諾する一年間の更新サービスが無料で得られています。

近年、多くの人々は、HPのHPE7-A11認定試験を受けることを選択します。
