

CDCS-001 Exam Fees - Valid CDCS-001 Exam Voucher

Newest CDCS-001 Reliable Test Vce & Leading Offer in Qualification Exams & Unparalleled CDCS-001: Certified Data Centre Specialist (CDCS)

ExamBoosts is a website specifically provide the certification exam information sources for GAQM professionals. Through many reflects from people who have purchase ExamBoosts's products, ExamBoosts is proved to be the best website to provide the source of information about [CDCS-001 Certification Exam](#). The product of CDCS-001 is a very reliable training tool for you. The answers of the exam exercises provided by ExamBoosts is very accurate. Our ExamBoosts's senior experts are continuing to enhance the quality of our training materials.

The CDCS-001 exam covers a wide range of topics related to data center management, including power and cooling, networking, storage, virtualization, security, and disaster recovery. CDCS-001 exam consists of 100 multiple-choice questions and must be completed within 120 minutes. The passing score for the exam is 70%, and candidates who pass the exam receive a certificate that is valid for three years.

GAQM Certified Data Centre Specialist (CDCS) Sample Questions (Q20-Q25):

NEW QUESTION # 20

For which one of these processes is Direct Current essential, and will not work with alternating current?

- A. Heating
- B. Electrolysis
- C. Lighting
- D. Turning a motor

Answer: B

Explanation:

Explanation

Direct Current (DC) is essential for the process of electrolysis. Electrolysis is the process of breaking down a compound using an electric current. The electric current causes ions to move, which results in a chemical reaction that breaks down the compound. In order for electrolysis to work, a direct current is required, as the ions must flow in one direction. Alternating Current (AC) changes direction and would not provide a consistent flow of ions.

Heating, lighting, and turning a motor can be done by either DC or AC. Heating can be done by passing an electric current through a heating element, which can be powered by either DC or AC. Lighting can be done by passing an electric current through a light bulb, which can be powered by either DC or AC. A motor can be powered by either DC or AC, but the type of motor and the application will determine which type of current is more suitable.

NEW QUESTION # 21

Which one of the following uses sensors such as laser beams or touch sensor?

- A. CCTV

2026 Latest TestPassed CDCS-001 PDF Dumps and CDCS-001 Exam Engine Free Share: https://drive.google.com/open?id=1adPzD4sYQGlu_MzbQ61F3dPNx0q124GA

There are many merits of our product on many aspects and we can guarantee the quality of our CDCS-001 practice engine. Firstly, our experienced expert team compile them elaborately based on the real exam and our CDCS-001 study materials can reflect the popular trend in the industry and the latest change in the theory and the practice. Secondly, both the language and the content of our CDCS-001 Study Materials are simple, easy to be understood and suitable for any learners.

GAQM CDCS-001 (Certified Data Centre Specialist) Certification Exam is a valuable certification for professionals in the data centre management industry. It evaluates individuals' knowledge and skills in critical areas of data centre management, including infrastructure design, power and cooling, and security. Certified Data Centre Specialist (CDCS) certification can lead to better job opportunities, higher salaries, and career growth.

GAQM CDCS-001 exam is designed to meet the needs of professionals in the data centre industry. Certified Data Centre Specialist (CDCS) certification program is aimed at individuals who are involved in the design, management, and operation of data centres. The program is also suitable for professionals who want to develop their careers in the field of data centre management. Certified Data Centre Specialist (CDCS) certification program is recognized globally and is designed to help professionals enhance their skills and competencies in the field of data centres.

Real Certified Data Centre Specialist (CDCS) Pass4sure Torrent - CDCS-001 Study Pdf & Certified Data Centre Specialist (CDCS) Training Vce

You won't need anything else if you prepare for the exam with our GAQM CDCS-001 Exam Questions. Our experts have prepared GAQM CDCS-001 dumps questions that will eliminate your chances of failing the exam. We are conscious of the fact that most of the candidates have a tight schedule which makes it tough to prepare for the GAQM CDCS-001 Exam Preparation.

The CDCS certification exam assesses a candidate's understanding of data centre design principles, power and cooling systems, network infrastructure, storage systems, and security protocols. It also evaluates the candidate's knowledge of industry standards, regulations, and best practices related to data centre operations.

GAQM Certified Data Centre Specialist (CDCS) Sample Questions (Q29-Q34):

NEW QUESTION # 29

Which component is designed to protect electrical equipment from damage caused by overload or short circuit?

- A. Circuit Breaker
- B. Stabiliser
- C. Transfer Switch
- D. Transient

Answer: A

Explanation:

A circuit breaker is a device designed to protect electrical equipment from damage caused by overload or short circuit. Circuit breakers are designed to detect when too much current is flowing through a circuit and to shut the circuit off when that happens. This protects the equipment from damage due to overloading or short circuiting, and it also helps prevent fires and other accidents.

NEW QUESTION # 30

Which one of the following is a disadvantage of Water Cooled System?

- A. Usage of the building's condenser water is less expensive than chilled water
- B. All components are located inside the CRAC
- C. Condenser water piping loops long distances
- D. Introduces an additional source of liquid

Answer: D

Explanation:

Explanation

Water cooled systems introduce an additional source of liquid, which can be a potential source of contamination and damage to the IT equipment. Additionally, water cooled systems require more maintenance than air cooled systems and are more expensive to install due to the additional cost of the cooling tower, piping, and pumps.

NEW QUESTION # 31

_____ protects electrical equipment from damage caused by overload or short circuit.

- A. Volt switch
- B. Server
- C. Circuit breaker
- D. IEC cable

Answer: C

Explanation:

A circuit breaker is a device that protects electrical equipment from damage caused by overload or short circuit. It does this by automatically disconnecting the power supply when it detects a surge or drop in voltage, preventing the equipment from being

damaged.

NEW QUESTION # 32

What are the two main applications for ac (alternate current)?

- A. direct, pulsating
- B. electric, magnetic
- C. static, dynamic
- D. power, information

Answer: D

Explanation:

Explanation

The two main applications for AC (alternate current) are power and information. AC is used to generate and transfer power to electrical devices, and is also used to carry information signals in telecommunications.

NEW QUESTION # 33

Which type of power can be a source available to the data center that takes over the function of supplying when utility power is unavailable?

- A. Standby
- B. Passive
- C. Active
- D. Alternate

Answer: A

Explanation:

Standby power, also known as backup power, is a type of power that can be a source available to the data center that takes over the function of supplying when utility power is unavailable. Standby power systems are designed to provide power to critical loads in the event of a power outage, and can include generators, uninterruptible power supplies (UPS), and batteries. Standby power systems can be used to provide power to the data center for a short period of time, such as a few hours or days, until utility power is restored.

Passive, Active and Alternate are not specific type of power sources used in data center. They are terms used in different context and have different meaning.
