Exam Google-Workspace-Administrator Overview | Google-Workspace-Administrator Current Exam Content

One of the key factors for passing the exam is practice. Candidates must use Google Google-Workspace-Administrator practice test material to be able to perform at their best on the real exam. This is why Exam4Labs has developed three formats to assist candidates in their Google Google-Workspace-Administrator Preparation. These formats include desktop-based Google Google-Workspace-Administrator practice test software, web-based practice test, and a PDF format.

Google Workspace Administrator certification exam consists of multiple-choice questions and performance-based scenarios that test the candidate's ability to configure and manage Google Workspace services, troubleshoot issues, and ensure the security and compliance of their organization's data. Google-Workspace-Administrator exam covers topics such as Google Workspace administration, user and group management, security and compliance, and reporting and auditing.

To become a Google-Workspace-Administrator certified professional, one must possess a deep understanding of the Google Workspace platform and its features. Google Cloud Certified - Professional Google Workspace Administrator certification exam evaluates the candidate's ability to manage user accounts, set up and manage security policies, configure Google Workspace services, and monitor and troubleshoot issues related to Google Workspace. Google-Workspace-Administrator Exam also covers topics such as data migration, collaboration features, and training and support for end-users.

Google Cloud Certified - Professional Google Workspace Administrator Sample Questions (Q47-Q52):

NEW QUESTION # 47

business information to all employees. They want to learn how often the site is being visited and how it is used. What should you do?

- A. Embed a JavaScript page counter showing usage statistics.
- B. Export the Drive Audit Log filtered to show Site Views.
- C. Add a Google Analytics Web Property ID to the Site.
- D. Export the Apps Usage Activity Report showing Sites activity and send the daily report to the Communications and Training Department.

Answer: C

Explanation:
A is not correct because although JavaScript can be embedded in new Sites, it would not be the most efficient solution when compared to using a Google Analytics Web Property ID.
B is not correct because there is no way to filter that report by Sites, and it only shows which Apps were used, not individual Sites.
C is correct because Google Analytics will give visitor statistics and page reference details.
D is not correct because the Event Description does not show page views and is only 6 months of data.

NEW QUESTION # 48

An employee in your organization is reporting that they cannot access a non-Google file in the Google Drive web interface even though other documents in Google Drive are working. You want to identify why they can't access the file and fix the problem. What should you do? (Choose two.)

- A. Instruct the employee to clear the browser cache.
- B. Instruct the employee to check the size of the document and divide the information into smaller parts if it is close to the limit.
- C. Reset the sign-in cookies of the employee.
- D. Instruct the employee to make a copy of the document by using the Google Drive user interface, then work from the copy.
- E. Disable Context-Aware Access policies.

Answer: A,B

NEW QUESTION # 49

Multiple users across the organization are experiencing video degradation in Meet video calls. As an administrator, what steps should you take to start troubleshooting?

- A. Update the Admin Console Meet settings to disable streaming.
- B. Locate the Meet quality tool, and review the output for issues with quality.
- C. Push the Meet quality tool to end user devices and run local reports to determine connectivity issues.
- D. Troubleshoot network bandwidth for the organizer of the meeting.

Answer: B

NEW QUESTION # 50

Your admin quarantine is becoming a burden to manage due to a consistently high influx of messages that match the content compliance rule Your security team will not allow you to remove or relax this rule, and as a result, you need assistance processing the messages in the quarantine. What is the first step you should take to enable others to help manage the quarantine, while maintaining security?

- A. Configure the admin quarantine to allow end users to release messages.
- B. Give the users super admin rights to view the admin quarantine.
- C. Give the users Services > Security Center admin privileges.
- D. Give the users Services > Gmail > Access Admin Quarantine admin privileges.

Answer: D

NEW QUESTION # 51
A user reached out to the IT department about a Google Group that they own:
info@company.com. The group is receiving mail, and each message is also delivered directly to the user's Gmail inbox. The user wants to be able to reply to messages directly from Gmail and have them sent on behalf of the group, not their individual account. Currently, their replies come from their individual account. What would you instruct the user to do?

- A. Add the user's individual account as a delegate to the group's inbox. They can then toggle between the accounts and use the Gmail interface on behalf of the group.
- B. Create a new content compliance rule that matches the user's outgoing messages with the group copied, and have it modify the sender to be the group address.
- C. Set the group address to be the default sender within the group's posting policies.
- D. Add the group as an email address that can be sent from within Gmail, and verify that the user has access. They can then choose to reply from the group.

Answer: D
