

GH-900 Detailed Study Plan, GH-900 Test Dates

DOWNLOAD the newest Real4dumps GH-900 PDF dumps from Cloud Storage for free: https://drive.google.com/open?id=13x7UfBSWKZbg_xfw2nJL7TWYA-ydMjZC

You can also customize your GitHub Foundations (GH-900) exam dumps as per your needs. We believe that this assessment of preparation is essential to ensuring that you strengthen the concepts you need to succeed. Based on the results of your self-assessment tests, you can focus on the areas that need the most improvement.

Microsoft GH-900 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> • Introduction to Git and GitHub: This section of the exam measures skills of Junior Developers and Platform Support Specialists and covers the basic understanding of Git and GitHub. It explains what Git is and why it is used, the fundamental Git workflow, and concepts related to repositories including their local and remote distinctions. Candidates learn essential Git commands such as initializing and cloning repositories, adding and committing changes, pushing and pulling updates, and branching and merging. It also covers navigating GitHub by creating accounts, managing repositories, understanding its interface, and working with issues and pull requests.
Topic 2	<ul style="list-style-type: none"> • Benefits of the GitHub Community: This section targets Community Managers and Open Source Contributors, focusing on engaging with the GitHub community. Candidates learn to participate in open source projects, utilize GitHub Discussions for collaboration and support, and contribute meaningfully to community-driven projects.
Topic 3	<ul style="list-style-type: none"> • Project Management: This section is designed for Project Coordinators and Product Managers and focuses on using GitHub Projects for project management. Candidates learn to create and manage GitHub Projects, utilize project boards for organizing tasks, and integrate project workflows with issues and pull requests to maintain project visibility and progress.
Topic 4	<ul style="list-style-type: none"> • Modern Development: This domain assesses abilities of DevOps Engineers and Continuous Integration Specialists in implementing modern development practices. It emphasizes understanding DevOps principles and leveraging GitHub Actions for automation and CI • CD pipeline implementation. Candidates also learn GitHub's tools and best practices for conducting and managing code reviews.

Topic 5	<ul style="list-style-type: none"> • Collaboration Features: This section measures skills of Software Engineers and Team Leads and covers collaborative workflows using GitHub. It includes forking repositories, creating and managing pull requests, reviewing and merging code changes, and using GitHub Actions to support CI • CD pipelines. Candidates also explore project management features such as creating and managing issues, using labels, milestones, and project boards, and tracking progress through GitHub Projects.
Topic 6	<ul style="list-style-type: none"> • Working with GitHub Repositories: This domain targets Repository Administrators and Content Managers, focusing on managing repository settings and permissions. Candidates learn to configure repositories, use templates, and effectively manage files by adding, editing, and deleting. The domain also addresses versioning of files and the use of GitHub Desktop for streamlined file management tasks within repositories.

Free PDF Microsoft - GH-900 Latest Detailed Study Plan

About choosing the perfect GH-900 study material, it may be reflected in matters like quality, prices, after-sale services and so on. GH-900 exam simulation is accumulation of knowledge about the exam strictly based on the syllabus of the exam. They give users access to information and exam, offering simulative testing environment when you participate it like in the classroom. And if you are afraid of the lack experience of the exam, our GH-900 Practice Engine will be your good choice.

Microsoft GitHub Foundations Sample Questions (Q91-Q96):

NEW QUESTION # 91

How can a user choose to receive ongoing updates about a specific activity on GitHub.com?

- A. By customizing the types of notifications you will receive in the future
- **B. By subscribing to notifications for all activity in a repository**
- C. By upgrading from a free to a paid account
- D. By automatically watching all repositories you have push access to

Answer: B

Explanation:

On GitHub, you can choose to receive ongoing updates about specific activities by subscribing to notifications for all activity in a repository. This allows you to stay informed about all changes, discussions, and updates related to a particular project. Additionally, GitHub provides the ability to customize notifications to suit your preferences.

NEW QUESTION # 92

When using Organizations, GitHub Teams is better than GitHub Free because it offers:

- **A. Authentication with SAML single sign-on and increased GitHub Actions minutes.**
- B. Advanced tools and insights in private repositories.
- C. Expanded storage and priority support.
- D. Increased GitHub Actions minutes and additional GitHub Packages storage.

Answer: A

Explanation:

GitHub Teams, as part of GitHub's paid plans, offers additional features and capabilities compared to GitHub Free, particularly for organizations.

* GitHub Teams Benefits:

* Option B is correct because GitHub Teams provides advanced security features like SAML single sign-on for secure authentication, as well as increased minutes for running GitHub Actions, which are essential for continuous integration and deployment workflows.

* Incorrect Options:

* Option A is incorrect because private repositories and advanced tools are features available, but the key differentiator in this context is the SAML SSO and additional GitHub Actions minutes.

* Option C is incorrect because while expanded storage and priority support are valuable, SAML SSO and increased GitHub Actions minutes are more central to the differences between GitHub Free and GitHub Teams.

* Option D is partially correct, but since the question asks for the best reason, Option B provides the most critical features that differentiate GitHub Teams from GitHub Free.

NEW QUESTION # 93

Workflows can reference actions in:

(Each correct answer presents a complete solution. Choose three.)

- A. Any public repository.
- B. A published Docker container image on Docker Hub.
- C. The same repository as your workflow file.
- D. GitHub Packages.
- E. An enterprise marketplace.

Answer: A,B,C

Explanation:

As mentioned in the answer to Question no. 66, GitHub Actions workflows can reference actions from a variety of sources:

* Any Public Repository:

* Option A is correct. Actions can be sourced from any public GitHub repository.

* The Same Repository as Your Workflow File:

* Option B is correct. Actions within the same repository as the workflow file can be referenced directly.

* A Published Docker Container Image on Docker Hub:

* Option E is correct. Workflows can also use actions provided as Docker container images from Docker Hub.

* Incorrect Options:

* Option C and D are not relevant for directly referencing actions in workflows.

NEW QUESTION # 94

An employee needs to find all issues within organization "Avocado" containing text "404 error" and a "guacamole" label. Which of the following steps would be best to search for these results?

- A. Go to "Avocado" organization. Select Issues under a repository. Filter issues with a "guacamole" label.
- B. Enter query org:Avocado label:guacamole "404 error" in the search bar. Select "Issues" in the Filter by section.
- C. Enter query org:Avocado is:issue label:guacamole "404 error" in the search bar.
- D. Go to the Avocado organization settings. Select Repository defaults under Repository. Scroll to Repository labels and select the 'guacamole' label.

Answer: C

Explanation:

GitHub provides a powerful search syntax to filter and find specific issues across repositories in an organization.

Search Query Syntax:

Option A is correct because the query org:Avocado is:issue label:guacamole "404 error" is the best way to search for all issues within the "Avocado" organization that contain the text "404 error" and are labeled with "guacamole". This query is precise and leverages GitHub's advanced search capabilities.

Incorrect Options:

Option B is incorrect because it requires manual filtering in a specific repository rather than searching across the entire organization.

Option C is incorrect because selecting "Issues" in the filter by section is redundant when using the query is:issue.

Option D is incorrect because accessing organization settings to look for repository labels is not relevant to searching for issues.

NEW QUESTION # 95

What steps must you follow to use GitHub Copilot? (Choose two.)

- A. Install the Copilot App on your GitHub organization, account, or server.
- B. Store your coding project(s) in GitHub.
- C. Sign and submit the legal disclaimer.
- **D. Sign up for a Copilot edition and enable it for your account.**
- **E. Install the Copilot extension for your supported IDE.**

Answer: D,E

Explanation:

Setting up GitHub Copilot for yourself

Follow these steps to start using Copilot.

[A] 1. Get access to GitHub Copilot

There are a few ways that you can get access to GitHub Copilot:

* Use Copilot Free. Get a limited experience of Copilot with up to 2,000 code completion requests and 50 premium requests per month-no paid plan required. See About individual GitHub Copilot plans and benefits.

-> * Sign up for a paid plan.

* Etc.

[C] 2. 2. Install the Copilot extension for your IDE

If you want to use Copilot in your IDE, install the Copilot extension for your IDE.
