## Vce CLF-C02 Files - Exam CLF-C02 Vce Format

Passing the CLF-C02 Exam is a challenging task, but with TestsDumps Amazon Practice Test engine, you can prepare yourself for success in one go. The CLF-C02 online practice test engine offers an interactive learning experience and includes Amazon CLF-C02 Practice Questions in a real CLF-C02 Exam scenario. This allows you to become familiar with the CLF-C02 exam format and identify your weak areas to improve them.

## Amazon AWS Certified Cloud Practitioner Sample Questions (Q126-Q131):

### NEW QUESTION # 126

Which controls are the responsibility of both AWS and AWS customers, according to the AWS shared responsibility model? (Select TWO.)

- A. Choice of the AWS Region where data is stored
- B. Account structures
- C. Physical and environmental controls
- D. Patch management
- E. Configuration management

**Answer: D,E**

Explanation:

Patch management and configuration management are controls that are the responsibility of both AWS and AWS customers, according to the AWS shared responsibility model. Patch management is the process of applying updates to software and applications to fix vulnerabilities, bugs, or performance issues. Configuration management is the process of defining and maintaining the settings and parameters of systems and applications to ensure their consistency and reliability. AWS is responsible for patching and configuring the software and services that it manages, such as the AWS global infrastructure, the hypervisor, and the AWS managed services. The customer is responsible for patching and configuring the software and services that they manage, such as the guest operating system, the applications, and the AWS customer-managed services.

Physical and environmental controls are the responsibility of AWS, according to the AWS shared responsibility model. Physical and environmental controls are the measures that protect the physical security and availability of the AWS global infrastructure, such as power, cooling, fire suppression, and access control.

AWS is responsible for maintaining these controls and ensuring the resilience and reliability of the AWS Cloud. Account structures are the responsibility of the customer, according to the AWS shared responsibility model. Account structures are the ways that customers organize and manage their AWS accounts and resources, such as using AWS Organizations, IAM users and roles, resource tagging, and billing preferences.

The customer is responsible for creating and configuring these structures and ensuring the security and governance of their AWS environment. Choice of the AWS Region where data is stored is the responsibility of the customer, according to the AWS shared responsibility model. AWS Regions are geographic areas that consist of multiple isolated Availability Zones. Customers can choose which AWS Region to store their data and run their applications, depending on their latency, compliance, and cost requirements. The customer is responsible for selecting the appropriate AWS Region and ensuring the data sovereignty and regulatory compliance of their data.

### NEW QUESTION # 127

Which benefit does AWS offer exclusively to users who have an AWS Enterprise Support plan?

- A. Access to a solutions architectA company wants to automatically set up and govern a multi-account AWS environment.

- B. Access to a technical project manager
- **C. Access to a technical account manager (TAM)**
- D. Access to a cloud support engineer

**Answer: C**

Explanation:

AWS Enterprise Support plan is the highest level of support that AWS offers to its customers. One of the exclusive benefits of this plan is the access to a technical account manager (TAM), who is a dedicated point of contact for guidance, advocacy, and support<sup>2</sup>. A technical project manager, a cloud support engineer, and a solutions architect are not exclusive benefits of the AWS Enterprise Support plan, as they are also available to customers with lower-tier support plans or through other AWS services or programs<sup>345</sup>.

#### NEW QUESTION # 128

A company's application has high customer usage during certain times of the day. The company wants to reduce the number of Amazon EC2 instances that run when application usage is low.

Which AWS service or instance purchasing option should the company use to meet this requirement?

- A. Spot Instances
- B. EC2 Instance Savings Plans
- C. Reserved Instances
- **D. Amazon EC2 Auto Scaling**

**Answer: D**

Explanation:

Explanation

Amazon EC2 Auto Scaling is an AWS service that can help users reduce the number of Amazon EC2 instances that run when application usage is low. Amazon EC2 Auto Scaling allows users to create scaling policies that automatically adjust the number of EC2 instances based on the demand or a schedule. EC2 Instance Savings Plans, Spot Instances, and Reserved Instances are instance purchasing options that can help users save money on EC2 usage, but they do not automatically scale the number of instances according to the application usage .

#### NEW QUESTION # 129

A company needs to block SQL injection attacks.

Which AWS service or feature can meet this requirement?

- A. Network ACLs
- **B. AWS WAF**
- C. AWS Shield
- D. Security groups

**Answer: B**

Explanation:

Explanation

AWS WAF is a web application firewall that helps protect web applications from common web exploits, such as SQL injection attacks. It allows customers to create custom rules that block malicious requests. AWS Shield is a managed service that protects against distributed denial of service (DDoS) attacks, not SQL injection attacks. Network ACLs and security groups are network-level security features that filter traffic based on IP addresses and ports, not web requests or SQL queries. References: [AWS WAF], [AWS Shield], [Network ACLs], [Security groups]

#### NEW QUESTION # 130

A company wants to receive alerts to monitor its overall operating costs for its AWS public cloud infrastructure.

Which AWS offering will meet these requirements?

- A. Compute Savings Plans
- B. Amazon EventBridge
- C. Migration Evaluator

- **D. AWS Budgets**

**Answer: D**

Explanation:

AWS Budgets is a service that enables you to plan your service usage, service costs, and instance reservations.

You can use AWS Budgets to create custom budgets that alert you when your costs or usage exceed (or are forecasted to exceed) your budgeted amount. You can also use AWS Budgets to monitor how close your usage and costs are to meeting your reservation purchases<sup>1</sup>

## NEW QUESTION # 131

.....

We can't forget the advantages and the conveniences that reliable CLF-C02 study materials compiled by our companies bring to us. First, by telling our customers what the key points of learning, and which learning CLF-C02 method is available, they may save our customers money and time. They guide our customers in finding suitable jobs and other information as well. Secondly, a wide range of practice types and different version of our CLF-C02 Study Materials receive technological support through our expert team.
