Peoplecert ITIL 4 Specialist: High-velocity IT Exam Sample Questions (Q31-Q36):

NEW QUESTION # 31

Which activity does a service provider carry out as part of the "explore step of the customer journey"?

Answer:

Explanation:

Analysing potential customers patterns of business activity

NEW QUESTION # 32

Which is a valid description of the priorities when using agile development methods?

- A. Responding to changes over following a plan
- B. k

Answer: A

NEW QUESTION # 33

An organization has recently made improvements to how users request new phones, track their arrival, and get help setting the phone up.

Which practice has been most affected by these improvements?

- A. Service Request Management
- B. Change Enablement
- C. Incident Management
- D. Asset Management

Answer: A

NEW QUESTION # 34

An internal IT service provider does not have all the skills needed to create and deliver a new service, but could develop them with enough time. There are many external service providers who can provide this service. Which approach should the organization follow to decide if they should use the internal service provider or to source the service externally?

Answer:

Explanation:

Start by reviewing organizational policies for sourcing services, then identify the most V O important criteria for selecting a service provider, and use a 'decision matrix' to compare service providers

NEW QUESTION # 35

A new digital service is being designed. The team needs to make sure the service will meet agreed response times, availability targets, and support hours expected by customers.

Which practice should take the LEAD in defining and agreeing these targets?

- A. Problem management
- B. Deployment management
- C. Service level management
- D. Incident management

Answer: C

Explanation:

Service level management is the practice responsible for setting clear business-based targets for service levels and ensuring that delivery is assessed and managed against them. Response times, availability targets, and support hours are classic service level concerns.

Incident management restores service after disruption. Deployment management moves components into live use. Problem management addresses causes of incidents. None of those takes the lead in defining and agreeing customer-facing service targets. Therefore A is the correct answer.

NEW QUESTION # 36

.....
