Scrum SAFe Product Owner/Product Manager POPM (6.0) Sample Questions (Q51-Q56):

NEW QUESTION # 51

What is one method to establish a team's velocity?

- A. Add the Story points for all the Stories planned for the Iteration
- B. Add the Story points for all Features completed in the Iteration
- **C. Compare the average Story points completed throughout the previous Iterations**
- D. Calculate the percentage planned versus actual Stories completed during an Iteration

Answer: C

Explanation:

Explanation

One method to establish a team's velocity is to compare the average story points completed throughout the previous iterations. This gives an indication of how much work the team can realistically deliver in a given time frame, based on their past performance. To calculate the team's velocity, you can use the following formula: Team velocity = total story points completed / number of iterations. You can also use various charts and tools to visualize the team's velocity and track its progress over time. 1234 References:

NEW QUESTION # 52

Why is the problem-solving workshop more effective than traditional lessons learned documents?

- A. Collaboration over documentation is a key recommendation of the Agile Manifesto
- B. Workshops are more engaging than document writing
- **C. It makes improvements actionable through backlog items for the next PI**
- D. It involves a small group of leaders

Answer: C

Explanation:

Explanation

The problem-solving workshop is more effective than traditional lessons learned documents because it makes improvements actionable through backlog items for the next Program Increment (PI). A problem-solving workshop is a structured approach to identify and solve problems that affect the performance and quality of the Agile Release Train (ART) or Solution Train1. Unlike traditional lessons learned documents, which are often passive and rarely implemented, a problem-solving workshop results in a set of improvement backlog items that are prioritized and planned for the next PI2. This way, the teams can implement the improvements and measure their impact on the value delivery3.

NEW QUESTION # 53

What is one input to the Vision?

- A. Portfolio Backlog
- B. Team topologies

- C. Customer feedback
- D. Feature context

Answer: C

Explanation:

One input to the Vision is customer feedback. Customer feedback is the information and opinions that customers and stakeholders provide about the solution, its features, and its value proposition¹. Customer feedback helps to validate the assumptions, test the hypotheses, and measure the satisfaction of the solution².

Customer feedback also helps to identify the needs, preferences, and expectations of the customers and stakeholders, which are essential for defining and communicating the Vision³. The Vision is a description of the future state of the solution under development, and it reflects the problem(s) that the solution will solve and the benefits that it will deliver⁴.

NEW QUESTION # 54

Why do Agile Teams use Iteration Goals?

- A. To ensure the team accomplishes the committed Stories for each Iteration
- B. To summarize the business outcomes an Agile Team intends to achieve during the PI
- C. To hold the team accountable to their PI Objectives
- D. To align the team members and the Product Owner to a common purpose

Answer: D

Explanation:

Iteration Goals are a high-level summary of the business and technical goals that an Agile Team agrees to accomplish in an Iteration. They are vital to coordinating an Agile Release Train (ART) as a self-organizing, self-managing team of teams¹. Iteration Goals help the team and the Product Owner to reach agreement on the business value they intend to deliver, align their work to their team PI objectives, and ground everyone on their shared purpose².

NEW QUESTION # 55

Which of the following Agile Manifesto principles aligns with conducting a System Demo?

- A. The best way to convey information is a face-to-face conversation
- B. The team reflects on how to become more effective at regular intervals
- C. Welcome changing requirements, even late in development
- D. Working software is the primary measure of progress

Answer: D

Explanation:

The System Demo is an event where the Agile Release Train (ART) demonstrates the integrated and working software to the stakeholders and customers¹. The System Demo aligns with the Agile Manifesto principle that states: "Working software is the primary measure of progress"². This principle emphasizes the value of delivering functional and usable software over comprehensive documentation or adherence to a plan³. The System Demo provides feedback on the quality, usability, and value of the software, as well as the effectiveness of the ART¹.
