You can pass the exam just by your first attempt.

## Citrix Virtual Apps and Desktops Administration Sample Questions (Q19-Q24):

### NEW QUESTION # 19

Scenario: A user is working on a document in an HDX session and saves data on the desktop. The Virtual Delivery Agent (VDA) session abruptly crashes, causing the saved data to be lost. Which Citrix Profile Management policy can a Citrix Administrator enable to prevent data loss?

- A. Delay Cached Profile Deletion
- B. Profile Caching
- C. Active Write Back
- D. Profile Streaming

**Answer: C**

Explanation:

Active Write Back ensures that changes made during the session, such as saving files to the desktop, are written back to the user

profile in real time. This prevents data loss if the VDA session crashes unexpectedly.

#### NEW QUESTION # 20

Scenario: A Citrix Administrator maintains a Citrix Virtual Apps and Desktops Site with a number of network print servers being used for all users. Currently, the print servers use native Windows drivers. No client printers are being used. New company guidelines require a reduction in the number of native drivers being used within the Site infrastructure. Which step can the administrator take to meet the new company guidelines?

- A. Enable the Citrix Universal Print Driver (EMF) driver and leave the default Universal printer driver usage policy setting.
- B. Install the Universal Print Server on all print servers in the Site and leave the default Universal printer driver usage policy setting.
- C. Configure the Citrix Universal Generic Printer and update the Auto-create generic universal printer policy setting.
- **D. Install the Universal Print Server on all print servers in the Site and update the Universal printer driver usage policy setting.**

**Answer: D**

Explanation:

By installing the Citrix Universal Print Server and configuring the Universal printer driver usage policy, print servers can use the Citrix Universal Print Driver instead of multiple native Windows drivers. This reduces the number of drivers in the environment while ensuring centralized network printing remains functional.

#### NEW QUESTION # 21

Scenario: A Citrix Administrator maintains a Citrix Virtual Apps and Desktops Site with a large number of Windows users running various locally attached client printers. No network printers are being used. The administrator has enabled the HDX printer mapping policy to 'Auto-create all client printers', which has resulted in a large number of drivers being loaded onto the Virtual Delivery Agent (VDA) machines. New standards are requiring the administrator to limit these Windows drivers on the VDA machines. Which printing feature can the administrator enable to meet the new standards?

- **A. The Citrix Universal Printer Driver**
- B. The Auto-create local (non-network) client printers only policy
- C. The Citrix Universal Print Server
- D. The Auto-create PDF universal printer policy

**Answer: A**

Explanation:

Enabling the Citrix Universal Printer Driver allows client printers to be auto-created without requiring individual printer drivers to be installed on the VDA machines. This standardizes printing, reduces driver sprawl, and meets compliance requirements by minimizing the number of Windows drivers on the VDAs.

#### NEW QUESTION # 22

A Citrix Administrator is concerned about the way that web pages and video render on the backend Virtual Delivery Agent (VDA) workloads. The administrator wants to find a way to for the web pages to render on the client device instead of on the VDA. What feature should the administrator use to accomplish this?

- **A. Browser Content Redirection**
- B. Citrix Optimizer
- C. Microsoft Teams Optimization
- D. Enlightened Data Transport

**Answer: A**

Explanation:

Browser Content Redirection offloads the rendering of web pages and multimedia from the VDA to the client device. This reduces CPU and memory load on the VDA while improving performance and user experience on the endpoint.

### NEW QUESTION # 23

A Citrix Administrator is configuring a Citrix Virtual Desktops Site for use with a mirrored SQL Server database. Which setting in SQL is important that the administrator configure manually when creating an empty database on the principal SQL Server?

- A. Collation Setting
- B. SQL Version Number
- C. Database Type Setting
- D. SQL Mirroring Version

**Answer: A**

Explanation:

When configuring a Citrix Virtual Desktops Site with a mirrored SQL Server database, the collation setting must be configured manually and must match across all SQL Servers in the mirroring setup. Citrix relies on consistent collation to ensure proper database functionality.

### NEW QUESTION # 24

.....

The 1Y0-205 Practice Questions are designed and verified by experienced and renowned Citrix Virtual Apps and Desktops Administration exam trainers. They work collectively and strive hard to ensure the top quality of ExamDiscuss 1Y0-205 exam practice questions all the time.
