Cert007

a local FortiGuard Distribution Server (FDS) in a closed network. An administrator pushes a new firewall policy with an intrusion prevention system (IPS) profile from FortiManager to FortiGate HQ-NGFW-1. However, FortiGate does not recognize the new IPS signature from FortiManager.

What is the most likely reason why FortiGate HQ-NGFW-1 does not recognize the new IPS signature?

- A. FortiGate must enable rating for the FortiManager IP address, 192.168.1.120, in server list 1.
- B. FortiManager and FortiGate have different IPS database versions.
- C. The administrator must enable IPv6 connections for FortiGuard services on FortiManager.
- D. The administrator must enable the fortiguard-anything option to correctly download all signatures from the local FDS.

Answer: B

Explanation:

The most likely reason FortiGate HQ-NGFW-1 does not recognize the new IPS signature is that FortiManager and FortiGate have different IPS database versions. The FortiManager may have pushed a signature update that FortiGate has not yet synchronized or validated locally, causing the signature to be unrecognized.

9. Which is recommended when you are managing a high volume of logs in your network?

- A. Store logs on FortiManager and use FortiView.
- B. Add and manage FortiAnalyzer from FortiManager.
- C. Enable advanced ADOM mode on FortiManager.
- D. Forward logs from FortiAnalyzer to FortiManager daily.

Answer: B

Explanation:

Adding and managing FortiAnalyzer from FortiManager is recommended for handling a high volume of logs, as FortiAnalyzer is designed specifically for centralized log management, analysis, and reporting, which offloads this workload from FortiManager.

9 / 9

Are you still upset about how to pass Fortinet certification FCP_FMG_AD-7.6 exam? Are you still waiting for the latest information about Fortinet certification FCP_FMG_AD-7.6 exam? Itcertmaster has come up with the latest training material about Fortinet certification FCP_FMG_AD-7.6 exam. Do you want to pass Fortinet certification FCP_FMG_AD-7.6 exam easily? Please add Itcertmaster's Fortinet certification FCP_FMG_AD-7.6 exam practice questions and answers to your cart now! Itcertmaster has provided part of Fortinet Certification FCP_FMG_AD-7.6 Exam practice questions and answers for you on www.Itcertmaster.com and you can free download as a try. I believe you will be very satisfied with our products. With our products you can easily pass the exam. We promise that if you have used Itcertmaster's latest Fortinet certification FCP_FMG_AD-7.6 exam practice questions and answers exam but fail to pass the exam, Itcertmaster will give you a full refund.

Fortinet FCP_FMG_AD-7.6 Exam Syllabus Topics:

Topic	Details
Topic 2	<ul style="list-style-type: none">Policy and Objects: This section of the exam measures the skills of System Administrators and evaluates their ability to manage policies and objects within FortiManager. It involves ADOM revisions, workspace mode, and policy imports and installations, emphasizing consistent policy control across networks.

Topic 3	<ul style="list-style-type: none"> • Device Manager: This section of the exam measures the skills of Network Security Engineers and focuses on registering devices within ADOMs and handling device configurations. Candidates also learn how to install changes through scripts and diagnose issues using the revision history.
Topic 5	<ul style="list-style-type: none"> • Troubleshooting
Topic 6	<ul style="list-style-type: none"> • Advanced Configuration: This section of the exam measures the skills of Network Security Engineers and includes knowledge of high availability (HA), FortiGuard service configuration, and global database ADOM settings. These advanced functions help strengthen system reliability and streamline management at a larger scale.
Topic 7	<ul style="list-style-type: none"> • Administration: This section of the exam measures the skills of System Administrators and covers the essential features of FortiManager. It includes the initial configuration process and the setup of administrative domains (ADOMs), ensuring smooth system management.

Fortinet FCP - FortiManager 7.6 Administrator Sample Questions (Q16-Q21):

NEW QUESTION # 16

Refer to the exhibit. An administrator assigned a new policy package to FortiGate HQ-NGFW-1.

In the installation preview, they noticed some settings they did not modify and are unsure about the changes.

- Answer: B,C**

The configuration includes a server-list with server-type set to "update rating," which enables FortiGate HQ-NGFW-1 to contact FortiManager as a FortiGuard Distribution Server (FDS) for FortiGuard updates.

NEW QUESTION # 17

Refer to the exhibit. Which statement about the environment shown in the exhibit is correct?

Cluster Status

Refresh Column Settings Search...

SN	Mode	IP	Enable	Module Data Synchronized	Pending Module Data
FMG-VM0A16000566	Primary	10.3.106.63		0.0 KB	0.0 KB
FMG-VM0A17002226	Secondary	10.3.106.64	<input checked="" type="checkbox"/>	0.0 KB	0.0 KB

Cluster Settings

Failover Mode: Manual VRRP

Operation Mode: Standalone Primary Secondary

Peer IP and Peer SN: IP Type: IPv4 Peer IP: 10.3.106.64 Peer SN: FMG-VM0A17002226

Cluster ID: 1 (1-64)

Group Password:

File Quota: 4096 (2048-20480) MB

Heart Beat Interval: 10 Seconds

Failover Threshold: 30 (1-255)

VIP:

VRRP Interface: Click to select

Priority: 1 (1-253)

Unicast: ☐

Monitored IP: IP: Interface: Click to select

Download Debug Log: Download

Apply

- A. FortiAnalyzer features are not enabled on this FortiManager device.
- B. You must restart the secondary unit if you promote it to become the primary.
- C. No FortiGuard packages have been synchronized between the cluster members yet.
- D. A failover will take place after five minutes without receiving heartbeat packets.

Answer: A

Explanation:

If FortiAnalyzer features are enabled, you cannot add FortiAnalyzer to FortiManager. You will also not be able to configure FortiManager high availability (HA).

NEW QUESTION # 18

Refer to the exhibit. How will FortiManager try to get updates for antivirus and IPS?

```
FortiManager # diagnose fmupdate view-serverlist fds
```

Fortiguard Server Comm : Enabled

Server Override Mode : Strict

FDS server list :

Index	Address	Port	TimeZone	Distance	Source
*0	10.0.1.50	8890	-5	0	CLI
1	96.45.33.89	443	-5	0	FDNI
2	96.45.32.81	443	-5	0	FDNI
...					
9	fds1.fortinet.com	443	-5	0	DEFAULT

- A. From the list of configured override servers or public FDN servers
- B. From the default server fds1.fortinet.com
- C. From the configured override server IP address 10.0.1.50 only
- D. From public FDNI server IP address with the fourth highest octet only

Answer: C

Explanation:

As the server override mode is strict, there is no fallback. FMG will communicate only with server configured in override server list.

NEW QUESTION # 19

Refer to the exhibit. Which two statements about the output are true? (Choose two.)

FortiManager # diagnose dvm device list										
--- There are currently 6 devices/vdoms managed ---										
--- There are currently 6 devices/vdoms count for license ---										
TYPE	OID	SN	HA	IP	NAME	ADOM	IPS	FIRMWARE	Hw_GenX	
fmgfaz-managed	188	FGVM02TM24013504	-	100.65.1.111	BR1-FGT-1	My_ADOM	7.0 MR6 (3401)	N/A		
- STATUS: dev-db: not modified; conf: in sync; cond: pending; dm: installed; conn: up; template:[modified]default										
- vdom:[3]root flags:0 adom:My_ADOM pkg:[imported]BR1-FGT-1										

- A. The latest revision history for the managed FortiGate does not match the device-level database.
- B. The system template default will override device-level database configurations.
- C. The latest revision history for the managed FortiGate does match the FortiManager policy database.
- D. Configuration changes have been installed on FortiGate, updating policy and device-level database.

Answer: A,B

Explanation:

The status "pending" indicates the latest revision history does not match the device-level database, meaning there are unapplied changes.

The template is marked as [modified], so the system template default will override device-level database configurations when installed.

NEW QUESTION # 20

An administrator wants to configure and manage multiple objects in the FortiManager database and give access to other users who work in the same database.

To stay in control of the changes made to firewall policies by other team members, the administrator needs a setup where all modifications go through a central check before they can be installed.

How can the administrator create this setup?

- A. Enable the prompt asking the administrator to accept firewall policies changes before saving.
- B. Enable workflow mode and the ADOM lock feature.
- C. Enable device lock and the advanced mode feature in the ADOM.
- D. Enable the workspace (for all ADOMs) to control all changes made by any administrator.

Answer: B

Explanation:

Enabling workflow mode along with the ADOM lock feature ensures that all configuration changes go through a centralized review and approval process before installation, allowing controlled and coordinated management of firewall policies by multiple administrators.

NEW QUESTION # 21

.....

In compliance with syllabus of the exam, our FCP_FMG_AD-7.6 practice materials are determinant factors giving you assurance of smooth exam. Our FCP_FMG_AD-7.6 practice materials comprise of a number of academic questions for your practice, which are interlinked and helpful for your exam. So, they are specified as one of the most successful FCP_FMG_AD-7.6 practice materials in the line. They can renew your knowledge with high utility with Favorable prices. So, they are reliably rewarding FCP_FMG_AD-7.6 practice materials with high utility value.
