### NEW QUESTION # 162

An automobile parts manufacturer wants to replace an existing system with a Microsoft Power Platform solution. The company has been experiencing undesired data changes in their current system. The cause of the changes is due to the relationships that are set up between tables in the database that the system uses.

The new solution must meet the following requirements:

- \* Track vehicle manufacturers and models.
- \* Display a list of all models that a manufacturer produces.
- \* Ensure that each vehicle model can be associated to only one manufacturer.
- \* Delete all associated models when a user deletes a manufacturer.
- \* Automatically populate information from the manufacturer when creating a new model from the model list on the manufacturer page.

You need to recommend table relationships to meet the business requirements.

Which relationship settings should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

## Answer Area

### Business requirement

The system must delete all associated models when a user deletes a manufacturer.

Microsoft
