VMCE_v12 Actual Exam, Reliable VMCE_v12 Braindumps Pdf

Our team of experts updates actual Veeam VMCE_v12 questions regularly so you can prepare for the VMCE_v12 exam according to the latest syllabus. Additionally, we also offer up to 1 year of free VMCE_v12 exam questions updates. We have a 24/7 customer service team available for your assistance if you get stuck somewhere. Buy VMCE_v12 Latest Questions of ActualCollection now and get ready to crack the VMCE_v12 certification exam in a single attempt.

Veeam Certified Engineer v12 Sample Questions (Q35-Q40):

NEW QUESTION # 35

Company security policy states that backups must be copied to a remote location within 8 hours.

What step can a backup administrator take to receive an alert automatically if the backup copy job violates the company's policy?

- A. Enable the appropriate RPO monitor
- B. Set a backup copy window alert on the repository
- C. Set a Data Protection alert in Enterprise Manager
- D. Set up post-thaw scripts to send an email

Answer: A

Explanation:

To receive an automatic alert if the backup copy job violates the company's 8-hour policy for copying backups to a remote location, the backup administrator should enable the appropriate Recovery Point Objective (RPO) monitor. This feature tracks the age of the latest backup and alerts when it exceeds the defined RPO. References: Veeam Backup & Replication Documentation, Veeam RPO

NEW QUESTION # 36

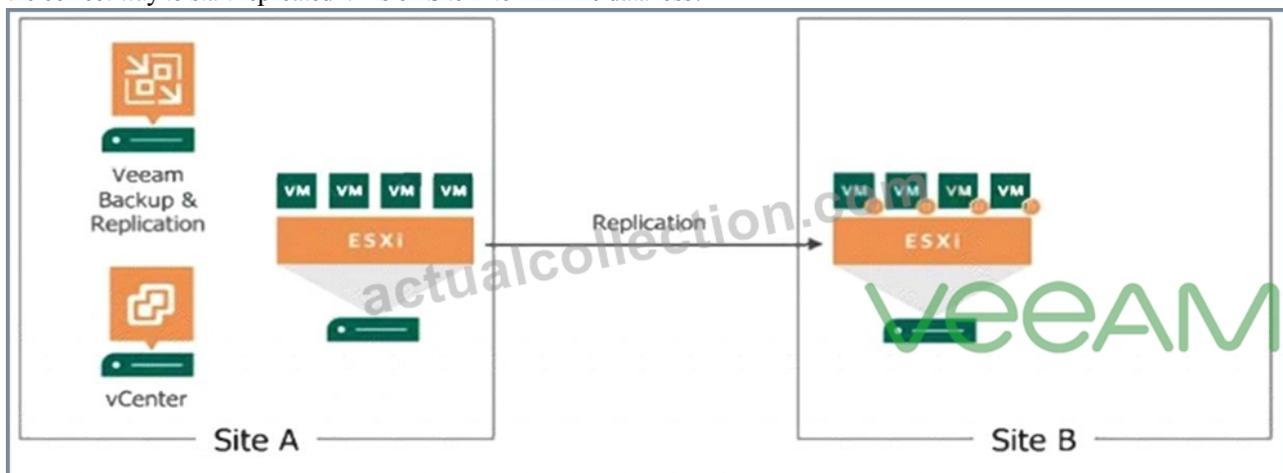

Which of the following Veeam Backup Agents can perform bare metal restores? (Choose 2)

- A. Veeam Agent for Mac
- B. Veeam Agent for IBM AIX
- C. Veeam Agent for Microsoft Windows
- D. Veeam Agent for Linux
- E. Veeam Agent for Oracle Solaris

Answer: C,D

NEW QUESTION # 37

A power outage on Site A is expected during the night. The disaster recovery strategy has been implemented (see diagram). What is the correct way to start replicated VMs on Site B to minimize data loss?

- A. Execute "Failover plan".
- B. Power on VMs manually through vCenter.
- C. Execute "Planned failover".
- D. Execute "Permanent failover" from vCenter.

Answer: C

Explanation:

A planned failover is a process that allows for the seamless switching from the original VMs at Site A to their replicas at Site B with no data loss. This is the correct course of action when a power outage is expected, as it is a controlled process that ensures that all data is synchronized before the switch is made. This action minimizes data loss and ensures that the VMs on Site B are up-to-date.

- * Veeam Help Center: Planned Failover Procedure

NEW QUESTION # 38

The organization has a strategy to copy its VM and Agent backups to the alternate site. The backup administrator has requested to implement a similar backup copy strategy for unstructured data backups with 10 additional days of retention. Which configuration is correct?

- A. File share backup job
- B. File share copy job
- C. File to tape job
- D. Periodic backup copy

Answer: B

Explanation:

When implementing a backup copy strategy for unstructured data backups with additional retention, a File Share Copy job is the correct configuration. This type of job is designed to copy backups of file shares to a secondary location, which in this case would be the alternate site. It allows for the setting of additional retention days beyond the original backup retention policy. References:

* Veeam Knowledge Base: Configuring File Share Copy Jobs

NEW QUESTION # 39

A backup job has been configured to keep three incremental restore points and a synthetic full backup each Sunday. More restore points are present on disk than what was configured in the job. Why?

- A. The old restore points will be deleted after the new restore chain meets the retention policy
- B. Per VM backup files are enabled in the repository
- C. You should configure the synthetic full backup to be performed on Mondays instead
- D. The other restore points are weekly full backups, this is expected

Answer: A
