

Brilliant NGFW-Engineer Guide Materials: Palo Alto Networks Next-Generation Firewall Engineer Display First-class Exam Brindumps - Real4Prep

P.S. Free & New NGFW-Engineer dumps are available on Google Drive shared by Real4Prep: https://drive.google.com/open?id=1hUJ2yd0H0i5_U6Z_5ekzQw4sIefl1GnH

Our NGFW-Engineer practice materials are suitable for a variety of levels of users, no matter you are in a kind of cultural level, even if you only have high cultural level, you can find in our NGFW-Engineer study materials suitable for their own learning methods. So, for every user of our study materials are a great opportunity, a variety of types to choose from, more and more students also choose our NGFW-Engineer Study Materials, then why are you hesitating?

We believe that you can buy our NGFW-Engineer demo PDF torrent without any misgivings, Firstly, we have a strong experts team who are devoted themselves to research of the technology, which ensure the high-quality of our NGFW-Engineer Dump guide, Real4Prep offers Palo Alto Networks Next-Generation Firewall Engineer NGFW-Engineer free Updates. It is no exaggeration to say that the value of the certification training materials is equivalent to all exam related reference books.

Detailed NGFW-Engineer Study Plan, Valid NGFW-Engineer Learning Materials

The evergreen field of Palo Alto Networks is so attractive that it provides non-stop possibilities for the one who passes the Palo Alto Networks NGFW-Engineer exam. So, to be there on top of the Palo Alto Networks sector, earning the Palo Alto Networks Next-Generation Firewall Engineer (NGFW-Engineer) certification is essential. Because of using outdated NGFW-Engineer study material, many candidates don't get success in the Palo Alto Networks Next-Generation Firewall Engineer (NGFW-Engineer) exam and lose their resources.

Palo Alto Networks Next-Generation Firewall Engineer Sample Questions (Q35-Q40):

NEW QUESTION # 35

Which statement applies to the relationship between Panorama-pushed Security policy and local firewall Security policy?

- A. The order of policy evaluation can be configured differently in different device groups.
- **B. Local firewall rules are evaluated after Panorama pre-rules and before Panorama post-rules.**
- C. Panorama post-rules can be configured to be evaluated before local firewall policy for the purpose of troubleshooting.

- D. When a policy match is found in a local firewall policy, if any Panorama shared post-rule is configured, it will still be evaluated.

Answer: B

Explanation:

Basic Concept: Panorama policy hierarchy has a fixed evaluation order: pre-rules first, then local firewall rules, then post-rules, followed by default rules.

Why B is Correct: Local firewall rules are evaluated after Panorama pre-rules and before Panorama post-rules, allowing Panorama to enforce top-level policy while leaving room for local rules.

Why A is Wrong: When a policy match is found in a local firewall policy, if any Panorama shared post-rule is configured, it will still be evaluated. is related to management or logging, but it does not provide the required Panorama operation, rule hierarchy behavior, or dual-log forwarding outcome.

Why C is Wrong: Panorama post-rules can be configured to be evaluated before local firewall policy for the purpose of troubleshooting. is related to management or logging, but it does not provide the required Panorama operation, rule hierarchy behavior, or dual-log forwarding outcome.

Why D is Wrong: The order of policy evaluation can be configured differently in different device groups. is related to management or logging, but it does not provide the required Panorama operation, rule hierarchy behavior, or dual-log forwarding outcome.

NEW QUESTION # 36

An organization must secure its AWS and Azure environments using a managed Palo Alto Networks solution, and all policies must be synchronized from an existing Panorama deployment.

The organization wants to insert security with the least possible impact on its application teams and use existing hub-and-spoke network designs.

- The AWS environment uses a centralized AWS Transit Gateway (TGW) architecture.

- The Azure environment uses a Virtual WAN (vWAN) hub.

Which two actions are the most appropriate in this use case? (Choose two.)

- A. Deploy Cloud NGFW endpoints in every application virtual private cloud (VPC), ignoring the TGW.
- **B. Deploy Cloud NGFW into the vWAN hub as a trusted security partner, and update routing policies to secure traffic.**
- **C. Deploy Cloud NGFW endpoints into a security virtual private cloud (VPC), and adjust the TGW route tables to inspect traffic flowing through the hub.**
- D. Deploy individual VM-Series firewalls in each spoke virtual network (VNet) and manage them as a device group in Panorama.

Answer: B,C

Explanation:

In Azure, integrating Cloud NGFW into the Virtual WAN hub as a trusted security partner enables centralized inspection in the hub-and-spoke design while keeping spoke VNets largely unchanged. In AWS, deploying Cloud NGFW endpoints in a dedicated security VPC and steering traffic through them by updating Transit Gateway route tables provides centralized security insertion that can be driven by existing Panorama-managed policy.

NEW QUESTION # 37

An organization uses Cloud Identity Engine (CIE) to gather user information from its on-premises Active Directory (AD) for employees and a separate Azure AD for external partners. Due to compliance regulations, the firewalls protecting the internal network must not have any identity information about external partners. Conversely, firewalls in the partner-facing DMZ should only be aware of partner identities.

Which CIE feature is designed to solve this data partitioning requirement?

- **A. Segments, which can be configured to create distinct, filter-based views of users and groups that are then redistributed only to the appropriate firewalls**
- B. Directory sync filtering, which is used at the source to prevent specific OUs from being imported into CIE
- C. Multiple tenants, where a separate CIE tenant is required for each user directory to maintain isolation
- D. Panorama templates, which can be used to push different User-ID agent configurations to each firewall group

Answer: A

Explanation:

Segments in Cloud Identity Engine allow administrators to create filtered, logical partitions of identity data and redistribute only the relevant users and groups to specific firewalls, ensuring strict separation of employee and partner identities in compliance-driven environments.

NEW QUESTION # 38

Before upgrading a Palo Alto Networks firewall to a new PAN-OS version, which preliminary step is crucial to ensure a smooth upgrade process?

- A. Disable High Availability (HA) if configured.
- B. Reset the firewall to factory settings.
- C. Disable all security policies.
- **D. Back up the current configuration.**

Answer: D

NEW QUESTION # 39

An NGFW engineer is establishing bidirectional connectivity between the accounting virtual system (VSYS) and the marketing VSYS. The traffic needs to transition between zones without leaving the firewall (no external physical connections). The interfaces for each VSYS are assigned to separate virtual routers (VRs), and inter-VR static routes have been configured. An external zone has been created correctly for each VSYS. Security policies have been added to permit the desired traffic between each zone and its respective external zone. However, the desired traffic is still unable to successfully pass from one VSYS to the other in either direction.

Which additional configuration task is required to resolve this issue?

- **A. Add each VSYS to the list of visible virtual systems of the other VSYS.**
- B. Create a transit VSYS and route all inter-VSYS traffic through it.
- C. Enable the "allow inter-VSYS traffic" option in both external zone configurations.
- D. Create Security policies to allow the traffic between the two external zones.

Answer: A

Explanation:

In Palo Alto Networks firewalls, each virtual system (VSYS) is typically isolated from other VSYSs, meaning that traffic between different VSYSs cannot pass through the firewall by default. In this case, since the interfaces for each VSYS are assigned to separate virtual routers (VRs), and the desired traffic is still not passing between the two VSYSs, the firewall needs to be explicitly configured to allow traffic between them.

The required configuration is to add each VSYS to the list of visible virtual systems of the other VSYS. This allows inter-VSYS communication to be enabled, effectively permitting the traffic to pass between the zones of different VSYSs.

NEW QUESTION # 40

.....

If you do not have access to internet most of the time, if you need to go somewhere is in an offline state, but you want to learn for your NGFW-Engineer exam. Don not worry, our products will help you solve your problem. We deeply believe that our latest NGFW-Engineer Exam Torrent will be very useful for you to strength your ability, pass your exam and get your certification. Our study materials with high quality and high pass rate in order to help you get out of your harassment.

Detailed NGFW-Engineer Study Plan: <https://www.real4prep.com/NGFW-Engineer-exam.html>

Probably you've never imagined that preparing for your upcoming NGFW-Engineer exam could be easy, Our NGFW-Engineer training prep has been on the top of the industry over 10 years with passing rate up to 98 to 100 percent, If you aren't satisfied with our NGFW-Engineer exam torrent you can return back the product and refund you in full, Real4Prep Detailed NGFW-Engineer Study Plan practice tests (desktop and web-based) produce score report at the end of each attempt.

Adapter Card Problems, I have used all of these metrics at one point or another to varying degrees of success, Probably you've never imagined that preparing for your upcoming NGFW-Engineer Exam could be easy.

Palo Alto Networks NGFW-Engineer Reliable Exam Practice Exam Pass For Sure | Detailed NGFW-Engineer Study Plan

Our NGFW-Engineer training prep has been on the top of the industry over 10 years with passing rate up to 98 to 100 percent, If you aren't satisfied with our NGFW-Engineer exam torrent you can return back the product and refund you in full.

Real4Prep practice tests (desktop and web-based) NGFW-Engineer produce score report at the end of each attempt, We own a professional team of experienced R&D group and skilled technicians, which is our trump card in developing NGFW-Engineer training materials.
