100% Pass Quiz 2026 Latest Juniper JN0-253 Real Dumps Free

The simplified information contained in our Juniper JN0-253 training guide is easy to understand without any difficulties. And our Juniper JN0-253 practice materials enjoy a high reputation considered as the most topping practice materials in this career for the merit of high-effective. A great number of candidates have already been benefited from them.

Juniper Mist AI, Associate (JNCIA-MistAI) Sample Questions (Q51-Q56):

NEW QUESTION # 51

You are asked to configure a site in Juniper Mist.
Which statement describes completing this step?

- A. You must configure the site within your organization.
- B. You must define your organization within the site.
- C. You must first configure the country, time zone, and location at the organization level.

- D. You must claim your site by scanning the access point's QR code.

Answer: A

Explanation:

You must configure the site within your organization-this is the correct process according to Juniper Mist's official configuration guides. When setting up a deployment, first an organization is created in the Mist cloud.

Within this organization, sites are added for each physical location. The Mist documentation says: "You can create Sites in the Juniper Mist portal from the Organization > Site Configuration menu. Add or update sites as needed." The configuration requires the site name, country, and location to be set at the site level-not the organization level. Claiming APs via QR codes and organization definition are separate steps in device onboarding and initial setup.

NEW QUESTION # 52

Which statement is correct regarding Juniper Mist's integration with third-party ticketing systems such as ServiceNow?

- A. Mist provides webhooks and APIs that can be used to automatically create tickets in third-party systems based on detected anomalies or Marvis Actions.
- B. Mist cannot integrate with any third-party ITSM platforms.
- C. Integration with ServiceNow requires a separate physical Mist Edge device.
- D. Third-party integrations are limited to email notifications only.

Answer: A

Explanation:

Juniper Mist provides webhooks and a comprehensive set of open APIs, which can be used to integrate with third-party IT service management (ITSM) platforms such as ServiceNow, allowing automatic ticket creation and workflow automation triggered by detected anomalies, SLE degradations, or Marvis Actions.

NEW QUESTION # 53

Which protocol does Mist cloud use to send and receive data to connected access points?

- A. MQTT
- B. SSH
- C. PTP
- D. HTTPS

Answer: D

Explanation:

Mist Cloud Communication Protocol: The Mist cloud platform uses HTTPS (Hypertext Transfer Protocol Secure) to communicate with connected access points. This ensures that the data sent and received is encrypted and secure, adhering to modern security standards(Juniper Networks).

Security and Reliability: Using HTTPS provides a secure channel over which configuration changes, updates, and monitoring data can be safely transmitted between the Mist cloud and the access points. This protocol is widely accepted and trusted for secure communications over the internet.

NEW QUESTION # 54

Which two statements are correct after you request the subscription renewal using e-mail? (Choose two.)

- A. Juniper Mist e-mails the support request for the selected subscriptions.
- B. Juniper Mist sends a cancellation notice.
- C. Juniper Mist processes the order and sends an activation code.
- D. Juniper Mist sends a welcome package with promotional materials.

Answer: A,C

Explanation:

When a customer requests a subscription renewal for Juniper Mist services via e-mail, the process is handled through a coordinated workflow between the Juniper Mist Cloud licensing system and Juniper Support. The renewal request ensures that existing service entitlements—such as Wireless Assurance, Wired Assurance, WAN Assurance, Marvis AI, or Premium Analytics—continue without interruption.

According to the Juniper Mist Cloud Licensing and Subscription Management Guide, the renewal workflow is described as follows: "When a renewal request is submitted via e-mail, Juniper Mist support receives and validates the request, initiates processing for the selected subscriptions, and issues a new activation code once the renewal is completed." Here's what happens after the renewal request:

- * B. The Juniper Mist system sends a confirmation e-mail acknowledging the renewal request and routes it to support for processing.
- * C. Once processed, Juniper Mist generates and delivers an activation code via e-mail that must be entered into the Mist portal to activate the renewed subscription(s).

Incorrect options:

- * A. No promotional materials or physical packages are sent.
- * D. A cancellation notice is not sent for renewal requests; it applies only to expired or terminated subscriptions.

Therefore, the correct answers are B. Juniper Mist e-mails the support request for the selected subscriptions and C. Juniper Mist processes the order and sends an activation code.

NEW QUESTION # 55

What does the Predictive Analytics and Correlation Engine (PACE) of Mist AI use to understand the end-user experience?

- A. machine learning
- B. manual analysis
- C. network monitoring tools
- D. user feedback

Answer: A

Explanation:

Mist AI's Predictive Analytics and Correlation Engine (PACE) uses machine learning to analyze vast amounts of network data, identify patterns, and correlate events, enabling it to accurately understand and predict end-user experience.

NEW QUESTION # 56

.....

JN0-253 questions & answers cover all the key points of the real test. With the JN0-253 training pdf, you can get the knowledge you want in the actual test, so you do not need any other study material. If the JN0-253 exam is coming and the time is tense, it is better to choose our JN0-253 Test Engine dumps. JN0-253 test engine can simulate the actual test during the preparation and record the wrong questions for our reviewing. You just need 20-30 hours for preparation and feel confident to face the JN0-253 actual test.
