To help customers pass the Fortinet NSE7_OT-7.2 exam successfully. TestBraindump with 365 days updates. Valid NSE7_OT-7.2 NSE7_OT-7.2 exam dumps, exam cram and exam dumps demo. You can download these at a preferential price. We continually improve the versions of our NSE7_OT-7.2 Exam Guide so as to make them suit all learners with different learning levels and conditions.

Fortinet NSE7_OT-7.2 Certification is highly valued in the cybersecurity industry, especially for professionals who work in critical infrastructure sectors such as energy, utilities, and manufacturing. It validates the candidates' ability to design, implement, and manage secure OT networks using Fortinet's Security Fabric architecture. Fortinet NSE 7 - OT Security 7.2 certification also demonstrates to employers and customers that the certified professional has the skills and knowledge required to secure complex OT environments against cyber threats.

Latest NSE7_OT-7.2 Exam Notes | NSE7_OT-7.2 Braindump Pdf

Why is TestBraindump Fortinet NSE7_OT-7.2 certification training so popular, especially among the same trade? Firstly, we really know what the candidates need. Secondly, Our TestBraindump Fortinet NSE7_OT-7.2 dumps are concerned on one thing only – how to help the candidates to pass Fortinet NSE7_OT-7.2 test. Thirdly, Our TestBraindump Fortinet NSE7_OT-7.2 study guide is very technical and original. We provide you with the latest test questions and test answers. And the price is very cost-effective.

Fortinet NSE7_OT-7.2 Exam is a certification exam that evaluates one's expertise in cybersecurity and network security in the operational technology domain. NSE7_OT-7.2 exam is designed to assess the skills and knowledge required to implement, maintain, and operate security solutions for industrial control systems (ICS), supervisory control and data acquisition (SCADA) systems, and other operational technology (OT) environments. Fortinet NSE 7 - OT Security 7.2 certification is part of the Fortinet Network Security Expert (NSE) program, which is a comprehensive, eight-level certification program that validates one's skills and knowledge in different areas of network security.

Fortinet NSE 7 - OT Security 7.2 Sample Questions (Q15-Q20):

NEW QUESTION # 15

An OT network consists of multiple FortiGate devices. The edge FortiGate device is deployed as the secure gateway and is only allowing remote operators to access the ICS networks on site.

Management hires a third-party company to conduct health and safety on site. The third-party company must have outbound access to external resources.

As the OT network administrator, what is the best scenario to provide external access to the third-party company while continuing to secure the ICS networks?

- A. Implement an additional firewall using an additional upstream link to the internet.
- **B. Split the edge FortiGate device into multiple logical devices to allocate an independent VDOM for the third-party company.**
- C. Create VPN tunnels between downstream FortiGate devices and the edge FortiGate to protect ICS network traffic.
- D. Configure outbound security policies with limited active authentication users of the third-party company.

Answer: B

NEW QUESTION # 16

A FortiGate device is newly deployed as the edge gateway of an OT network security fabric. The downstream FortiGate devices are also newly deployed as Security Fabric leafs to protect the control area zone.

With no additional essential networking devices, and to implement micro-segmentation on this OT network, what configuration must the OT network architect apply to control intra-VLAN traffic?

- A. Enable transparent mode on the edge FortiGate device.
- B. Create a software switch on each downstream FortiGate device.
- **C. Enable security profiles on all interfaces connected in the control area zone.**
- D. Set up VPN tunnels between downstream and edge FortiGate devices.

Answer: C

NEW QUESTION # 17

Refer to the exhibit.

| Maint | Device | Type | Organization | Avail Status | Perf Status | Security Status |
|-------|------------------|---------------------|--------------|--------------|-------------|-----------------|
| ● | FG240D3913800441 | Fortinet FortiOS | Super | ● | ● | ✘ |
| ● | SJ-QA-F-Lnx-CHK | Checkpoint FireWall | Super | ● | ● | ⚠ |
| ● | FAPS321C-default | Fortinet FortiAP | Super | | ● | ● |

You are navigating through FortiSIEM in an OT network.

How do you view information presented in the exhibit and what does the FortiGate device security status tell you?

- A. In the business service dashboard and there are one or more high-severity security incidents for the FortiGate device.
- **B. In the summary dashboard and there are one or more high-severity security incidents for the FortiGate device.**
- C. In the PCI logging dashboard and there are one or more high-severity security incidents for the FortiGate device.
- D. In the widget dashboard and there are one or more high-severity incidents for the FortiGate device.

Answer: B

NEW QUESTION # 18

Refer to the exhibit.

Edit SubPattern

Name: industrial_protocol_monitor

| Filters: | Paren | Attribute | Operator | Value |
|----------|---|--------------------------|----------|-----------------|
| | <input type="radio"/> <input type="radio"/> | Destination TCP/UDP Port | IN | Group: OT Ports |
| | <input type="radio"/> <input type="radio"/> | Source TCP/UDP Port | IN | Group: OT Ports |

| Aggregate: | Paren | Attribute | Operator | Value |
|------------|---|-------------------------|----------|-------|
| | <input type="radio"/> <input type="radio"/> | COUNT(Matched Events) | >= | 1 |

| Group By: | Attribute | Row | Move |
|-----------|--------------------------|---|---|
| | Reporting IP | <input type="radio"/> <input type="radio"/> | <input type="radio"/> <input type="radio"/> |
| | Event Type | <input type="radio"/> <input type="radio"/> | <input type="radio"/> <input type="radio"/> |
| | Destination TCP/UDP Port | <input type="radio"/> <input type="radio"/> | <input type="radio"/> <input type="radio"/> |
| | Source TCP/UDP Port | <input type="radio"/> <input type="radio"/> | <input type="radio"/> <input type="radio"/> |

FORTINET

An operational technology rule is created and successfully activated to monitor the Modbus protocol on FortiSIEM. However, the rule does not trigger incidents despite Modbus traffic and application logs being received correctly by FortiSIEM. Which statement correctly describes the issue on the rule configuration?

- A. The Aggregate attribute COUNT expression is incompatible with the filters.
- B. The first condition on the SubPattern filter must use the OR logical operator.
- C. The SubPattern is missing the filter to match the Modbus protocol.
- **D. The attributes in the Group By section must match the ones in Filters section.**

Answer: D

NEW QUESTION # 19

Refer to the exhibits.

Which statement is true about the traffic passing through to PLC-2?

- A. IEC 104 signatures are all allowed except the C.BO.NA 1 signature.
- B. SSL Inspection must be set to deep-inspection to correctly apply application control.
- **C. The application filter overrides the default action of some IEC 104 signatures.**
- D. IPS must be enabled to inspect application signatures.

Answer: C
