PSP Reliable Exam Tips & Flexible PSP Testing Engine

People always do things that will benefit them, so as get a certificate of the PSP test dumps. Obtaining a certificate means more opportunity, a good job, a better salary, and a bright. The benefits are numerous, and we give you a quicker method to achieve this. Our PSP Questions and answers list the knowledge point for you, and you just need to speed some of your time to practice. We are pass guarantee and money back guarantee. And the pass rate is 98.

To become certified, individuals must pass a rigorous examination that tests their knowledge and skills in physical security. PSP exam consists of 125 multiple-choice questions and is administered over a four-hour period. Individuals must achieve a minimum score of 70 percent to pass the exam and earn the ASIS PSP certification. ASIS Physical Security Professional Exam certification is valid for three years, after which individuals must recertify by completing continuing education credits or retaking the exam.

The PSP Exam covers a wide range of topics related to physical security, including risk assessment, perimeter security, access control, video surveillance, and emergency management. PSP exam is designed to test the candidate's knowledge of both theoretical concepts and practical applications. Candidates must demonstrate their ability to analyze complex security situations, identify potential threats, and develop effective strategies to mitigate risks.

ASIS Physical Security Professional Exam Sample Questions (Q204-Q209):

NEW QUESTION # 204

Assuming that you had only one crane capable of 30 lifts per day, 3 column pours requiring 28 lifts each, plus associated assorted work requiring an additional 150 lifts, what is the minimum planned working duration for this work?

- A. 8 work days
- B. 7 work days

- C. 15 workdays
- **D. 18 work days**

Answer: D

Explanation:

Calculation of Total Lifts Required:

* 3 column pours = $28 \times 3 = 8428 \times 3 = 8428 \times 3 = 84$.

* Additional lifts = 150150150.

* Total lifts = $84 + 150 = 23484 + 150 = 23484 + 150 = 234$.

Lifts Per Day with One Crane:

* 1 crane performs 30 lifts per day.

Required Duration:

* Minimum planned working duration = $\lceil 234 / 30 \rceil = 18$.

Verification with PSP Guidelines:

Aligning workload with equipment capacity ensures practical schedule planning (Ref: PSP Study Guide, Chapter 2B: Workload Balancing).

NEW QUESTION # 205

Using the normal schedule and excluding general conditions, which activities are NOT on the critical path?

- A. 2003,8001.9001.9002,9005,10001
- B. 7001, 8001, 9001. 9003. 9004. 10002
- **C. 5001,7001.8001,9001,9004,9005**
- D. 6001, 8001, 9001. 9002, 9004. 9005

Answer: C

Explanation:

Activities not on the critical path are those with positive float, meaning they can be delayed without affecting the overall project completion time. The determination of such activities requires performing a forward and backward pass calculation as per CPM (Critical Path Method) analysis principles (PSP Study Guide, Section 2.2.4, "Relationships").

For example:

- * Identify the critical path by analyzing total float values (typically, critical path activities have zero total float).
- * Exclude activities that do not fall on the critical path.

NEW QUESTION # 206

If a contractor has robust planning and scheduling processes, should those company processes supersede client contract specifications?

- A. Proceed with company processes even if they conflict with the client
- **B. Review any differences and negotiate workable specifications**
- C. The client contract specifications always have priority
- D. Suggest that the client issue a change order, accepting the contractor's processes

Answer: B

NEW QUESTION # 207

What changes to logic would eliminate Activity B from the critical path?

- A. Reduce the lag value of the relationship from Activity A to Activity B from 5 to 0
- B. Replace the relationship from Activity B to Activity C with SSO
- C. Add a SS 15 relationship from Activity A to Activity B and replace the relationship from Activity A to Activity B with FFO
- **D. Replace the relationship from Activity A to Activity B with FFO and add an FSO relationship from Activity A to Activity C**

Answer: D

NEW QUESTION # 208

The introduction of holography into badge control systems reduces the chance of:

- **A. Counterfeiting**
- B. Intrusion
- C. Security
- D. Theft

Answer: A

NEW QUESTION # 209

.....
