Scaled Agile Framework (SAFe) is a popular agile framework widely used in software development projects worldwide. One of the cornerstones of SAFe is the Release Train Engineer (RTE). RTE is a critical role in SAFe that handles program execution, facilitates communication, and identifies and resolves problems. A Release Train Engineer is a senior member of the agile team responsible for managing the program and the release train. SAFe-RTE Certification is an effective way of proving your knowledge and skills in managing Agile Release Trains efficiently.

Scaled Agile Framework (SAFe) is a widely adopted framework for large-scale agile software development. It provides a structured and scalable approach to agile development, which enables organizations to deliver high-quality software in a consistent and predictable manner. One of the critical roles in SAFe is the Release Train Engineer (RTE). The RTE is responsible for coordinating and facilitating the activities of a SAFe release train, which is a group of agile teams that work together to deliver a common solution.

Scaled Agile SAFe Release Train Engineer Sample Questions (Q203-Q208):

NEW QUESTION # 203

What does transparency mean in a scrum environment?

- A. Development and Operations teams work together
- B. The team is constantly improving its process
- C. Team members must immediately share any and all feedback with each other
- D. The process is visible to all stakeholders

Answer: D

NEW QUESTION # 204

Which two behaviors should a Scrum Master represent as a coach? (Choose two.)

- A. Lay out the team's plan for the iteration
- B. Focus on deadlines and technical options
- C. Encourage the team to learn from their mistakes
- D. Set long-term goals for the team
- E. Provide subject matter expertise

Answer: C,D

NEW QUESTION # 205

Who are two key collaborators with the RTE to support the ART? (Choose two)

- A. Product Owners
- B. Product Management
- C. Release Management
- D. System Architects/Engineers
- E. Scrum Masters

Answer: B,D

Explanation:

According to the SAFe 6 Release Train Engineer documentation, the Release Train Engineer (RTE) is a servant leader and coach for the Agile Release Train (ART). The RTE's role involves facilitating ART events and processes, assisting teams in delivering value, communicating with stakeholders, escalating impediments, managing risk, and driving relentless improvement.

Key collaborators with the RTE include:

- * System Architects/Engineers1: They collaborate with the RTE to ensure that the architectural vision and technical aspects are integrated into the ART's work, supporting the teams in delivering a solution that is technically robust and aligns with the organization's strategic goals.
- * Product Management1: They work closely with the RTE to align the ART with the product vision and roadmap, ensuring that the features developed by the teams contribute to the overall strategy and deliver value to the customers.

These roles are essential for the effective functioning of the ART, providing the necessary technical guidance and strategic alignment to support the RTE in leading the ART towards successful delivery.

NEW QUESTION # 206

Scrum Masters are effective by using scrum methods, supporting SAFe principles and practices, and what else?

- A. Writing stories and enablers
- B. Managing architectural runway
- C. Supporting delivery using Agile practices
- D. Serving as a customer proxy

Answer: C

NEW QUESTION # 207

How does SAFe handle the 'fear of conflict' team dysfunction?

- A. Reviews results at the end of every iteration
- **B. Uses scrum to create a safe environment for conflict**
- C. Avoids discussion of disagreements
- D. Has teams engage in retrospectives

Answer: B

NEW QUESTION # 208
