

Exam Sample NCP-CI-Azure Questions & Latest NCP-CI-Azure Test Notes

DOWNLOAD the newest PrepPDF NCP-CI-Azure PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=1KtJ7dGz7bIOKwmpZyJaJKNsIIzkOxZZP>

NCP-CI-Azure practice materials stand the test of time and harsh market, convey their sense of proficiency with passing rate up to 98 to 100 percent. They are 100 percent guaranteed NCP-CI-Azure practice materials. And our content of them are based on real exam by whittling down superfluous knowledge without delinquent mistakes. Our NCP-CI-Azure practice materials comprise of a number of academic questions for your practice, which are interlinked and helpful for your exam. So their perfection is unquestionable.

When you buy things online, you must ensure the security of online purchasing, otherwise your rights will be harmed. Our NCP-CI-Azure study tool purchase channel is safe, we invite experts to design a secure purchasing process for our NCP-CI-Azure qualification test, and the performance of purchasing safety has been certified, so personal information of our clients will be fully protected. We provide you with global after-sales service. If you have any questions that need to be consulted, you can contact our staff at any time to help you solve problems related to our NCP-CI-Azure qualification test. Our thoughtful service is also part of your choice of buying our learning materials. Once you choose to purchase our NCP-CI-Azure test guides, you will enjoy service.

Latest NCP-CI-Azure Test Notes | NCP-CI-Azure Test Pattern

When you decide to pass the Nutanix NCP-CI-Azure exam and get relate certification, you must want to find a reliable exam tool to prepare for exam. That is the reason why I want to recommend our Nutanix Certified Professional - Cloud Integration - Azure (NCP-CI-Azure v6.7) NCP-CI-Azure Prep Guide to you, because we believe this is what you have been looking for.

Nutanix NCP-CI-Azure Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> Configuring an NC2 on Azure Environment: This section evaluates the skills of IT Administrators and emphasizes modifying cloud networking security to protect resources. Candidates will configure Nutanix networking settings and troubleshoot connectivity issues to ensure seamless communication within the cloud environment.
Topic 2	<ul style="list-style-type: none"> Managing an NC2 on Azure Environment: This section relates to skills in identifying management tasks for nodes and clusters. Candidates will monitor cluster health and cloud resource performance, ensuring that all components function efficiently. Understanding these management tasks is vital for maintaining operational integrity in a hybrid cloud environment.
Topic 3	<ul style="list-style-type: none"> Planning an NC2 on Azure Deployment: This section of the exam measures the skills of IT Administrators and covers the preparation of the Azure cloud environment, including determining the appropriate Azure account and node types. It also involves subscribing to the NC2 service, which requires knowledge of authentication methods and organization naming conventions. Additionally, candidates must determine implementation requirements by evaluating deployment use cases and redundancy needs. Identifying networking requirements is crucial, focusing on connectivity options like VPN and CIDR ranges.
Topic 4	<ul style="list-style-type: none"> Deploying an NC2 on Azure Environment: This section assesses the skills of Nutanix Cloud Operators and focuses on deploying the cloud cluster within the Azure environment. Candidates will learn to configure cloud provider networking effectively, ensuring that all necessary resources are correctly set up for deployment.

Nutanix Certified Professional - Cloud Integration - Azure (NCP-CI-Azure v6.7) Sample Questions (Q64-Q69):

NEW QUESTION # 64

After creating a new Nutanix User VPC, what is needed to allow traffic to flow out of the Flow gateway VM when using the NATed Path?

- A. Edit the External Flow Gateway Security Group on the External NIC to allow outbound traffic.
- B. Add a default route on the Transit VPC of 0.0.0.0/0 to the Flow Gateway.
- C. Add a default route on the Nutanix User VPC of 0.0.0.0/0 to the External Overlay network.
- D. Add a default route on the Transit VPC of 0.0.0.0/0 to the Flow Gateway.

Answer: C

NEW QUESTION # 65

The cluster has the following configuration:

A Transit VPC exists as Default, but is additionally configured with a overlay-external-subnet-nonat overlay subnet The ERP for the Transit VPC is 10.1.1.0/25 A User VPC exists named User_VPC_Prod The ERP for the User VPC is 10.1.1.0/24 Outbound and inbound routes have been configured A User VM NO-NAT subnet has been configured in the User VPC The administrator has successfully created a VM and added the NIC associated with the NO-NAT subnet, but is not able to communication with other resources.

Which option will resolve this issue?

- A. Ensure that the security groups associated with the VM allow traffic to and from the desired resources.
- B. Check that the network ACLs for the NO-NAT subnet are not blocking the necessary traffic.
- C. The ERP in the User VPC must be from a different CIDR range than the ERP in the transit VPC.
- D. Verify that the route table associated with the User VPC has appropriate routes to the Transit VPC.

Answer: C

Explanation:

In this scenario, the issue arises from overlapping IP address ranges between the Transit VPC and the User VPC. Here's a detailed breakdown:

* Understanding ERPs (Elastic Routing Prefixes):

* The ERP for the Transit VPC is 10.1.1.0/25, which covers IP addresses from 10.1.1.0 to

10.1.1.127.

* The ERP for the User VPC is 10.1.1.0/24, which covers IP addresses from 10.1.1.0 to 10.1.1.255.

* IP Address Overlap:

* Since 10.1.1.0/25 is a subset of 10.1.1.0/24, there is a significant overlap in the IP address ranges of these two ERPs.

* This overlap can cause routing issues because the same IP address range is being used in both VPCs, leading to ambiguity in routing and communication.

* Communication Issue:

* When a VM in the User VPC tries to communicate with other resources, the network cannot accurately determine the correct route due to the overlapping IP address ranges.

* This overlap prevents proper routing and results in the VM being unable to communicate with other resources as intended.

* Resolution:

* To resolve this issue, the ERPs must be in different CIDR ranges. This means the IP address ranges for the Transit VPC and the User VPC should not overlap.

* For example, if the Transit VPC uses 10.1.1.0/25, the User VPC could use a different range such as 10.1.2.0/24 or any other range that does not overlap with 10.1.1.0/25.

By ensuring that the ERPs are in different CIDR ranges, the network can properly route traffic between the VPCs without any conflicts or ambiguities, thereby enabling the VM in the User VPC to communicate with other resources effectively.

NEW QUESTION # 66

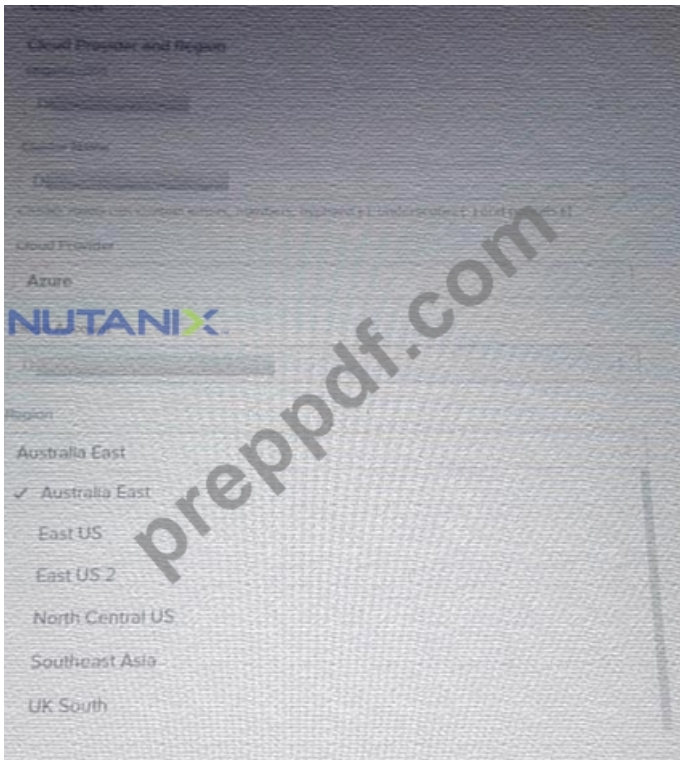

What action is performed in Azure when an instance is report as being in a terminated state, but NS2 expects it to be in a running state ?

- A. NS2 condemns the host and triggers replacement of the host
- B. NS2 alert the administrator that a manual replacement is required
- C. NS2 automatically reconnects with the instance
- D. NS2 restart the AHV host

Answer: A

NEW QUESTION # 67

Exhibit.

An administrator is trying to create an NC2 cluster in Azure, but does not see the required region in the drop-down list. Which two steps could the administrator take to resolve this issue? (Choose two.)

- A. Check the Azure subscription is created in the correct region.
- B. Check the NC2 Billing console to ensure the region is listed.
- C. Check the list of regions specified under the NC2 organization cloud account.
- D. Ensure that the Azure region is whitelisted for use by Microsoft in the subscription.

Answer: C,D

Explanation:

* Check the list of regions specified under the NC2 organization cloud account: The list of available regions in the NC2 console might be restricted based on the configuration of the cloud account associated with the NC2 organization. Verifying this list ensures that the desired region is included and available for cluster creation.

* Ensure that the Azure region is whitelisted for use by Microsoft in the subscription: Sometimes, specific regions need to be explicitly enabled or whitelisted in the Azure subscription for certain services. This step ensures that the required region is permitted for use within the Azure subscription, allowing the NC2 cluster to be created in that region.

NEW QUESTION # 68

An administrator is tasked with providing User VMs in Azure that are hosted within a Flow NAT network outbound internet connectivity.

In which order would the traffic flow through each component?

- A. User VM > Flow Gateway > Floating IP Address > Azure NAT GW
- B. User VM > Delegated Subnet > Flow Gateway > Floating IP Address > Azure LB
- C. User VM > Floating IP Address > Flow Gateway > Azure LB
- D. User VM > Delegated Subnet > Flow Gateway > Floating IP Address > Azure NAT GW

Answer: D

Explanation:

* User VM: The initial source of the traffic within the Azure environment.

* Delegated Subnet: Traffic from the User VM flows through the delegated subnet, which is configured to handle specific network traffic.

* Flow Gateway: The Flow Gateway manages and routes the traffic from the delegated subnet, providing network services and connectivity.

* Floating IP Address: The Flow Gateway assigns a floating IP address for the outbound traffic, facilitating NAT operations.

* Azure NAT Gateway: The traffic is then routed through the Azure NAT Gateway, which provides outbound internet connectivity for the User VMs, ensuring secure and efficient routing.

NEW QUESTION # 69

.....

It is well known that under the guidance of our NCP-CI-Azure PDF study exam, you are more likely to get the certification easily. But I think few of you know the advantages after getting certificates. Basically speaking, the benefits of certification with the help of our NCP-CI-Azure practice test can be classified into three aspects. Firstly, with the certification, you can have access to big companies where you can more job opportunities which you can't get in the small companies. Secondly, with our NCP-CI-Azure Preparation materials, you can get the NCP-CI-Azure certificates and high salaries.
