

Neueste CT-UT Pass Guide & neue Prüfung CT-UT braindumps & 100% Erfolgsquote

2026 Die neuesten DeutschPrüfung CT-UT PDF-Versionen Prüfungsfragen und CT-UT Fragen und Antworten sind kostenlos verfügbar: <https://drive.google.com/open?id=1FkcEChuxU2jB-GeVeFAUdir0mdimjhc6>

Die ISTQB CT-UT Dumps von DeutschPrüfung können Ihnen helfen, diese Prüfung sehr einfach zu bestehen. Außerdem, wenn Sie zum ersten Mal die ISTQB CT-UT Prüfung teilnehmen, können Sie diese Dumps von Software-Version benutzen, weil es ist eine Software, die für Sie die Inhalte und die Forme der aktuellen Prüfung simulieren. Sie können sich die aktuelle Prüfung zuvor fühlen. Danach können Sie sich nicht nervös fühlen bei der aktuellen Prüfung. Sie können auch sehr sorglos an dieser ISTQB CT-UT Prüfung teilnehmen. Und es ist auch wichtig für Sie, Ihr normales Niveau in der CT-UT Prüfung zu entfalten.

ISTQB CT-UT Prüfungsplan:

Thema	Einzelheiten
Thema 1	<ul style="list-style-type: none"> Usability Testing: This section measures the practical knowledge of Usability Testers in planning, conducting, analyzing, and reporting formal usability test sessions with users. It outlines test preparation activities including writing test plans, test scripts, and tasks, as well as considerations for test locations and pilot sessions. It explains how to moderate sessions, analyze findings, classify problems by severity, and communicate results effectively to stakeholders.
Thema 2	<ul style="list-style-type: none"> Usability and Accessibility Standards: This part addresses the knowledge required by Compliance Officers regarding standards and guidelines that govern usability and accessibility. It introduces ISO standards like ISO 9241-110 and ISO 9241-171, manufacturer guidelines from major platforms, and web accessibility guidelines such as WCAG. It also touches on legislation relevant to accessibility requirements, such as the UK Equality Act and the Americans with Disabilities Act.
Thema 3	<ul style="list-style-type: none"> Basic Concepts: This section measures the skills of Usability Analysts and covers fundamental definitions and ideas related to usability, user experience, and accessibility. It explains what usability means in terms of effectiveness, efficiency, and satisfaction within software products. User experience concepts related to emotions, perceptions, and responses before, during, and after use are included. It also addresses accessibility, focusing on usage by people with diverse abilities.
Thema 4	<ul style="list-style-type: none"> Risks in Usability, User Experience and Accessibility: This domain assesses the ability of Risk Analysts to identify and analyze common risks that can affect usability, user experience, and accessibility. It differentiates between product risks—such as users being unable to use a product effectively—and project risks, including lack of expertise or insufficient usability evaluation processes. Understanding these risks helps in planning effective usability testing and evaluation.

Thema 5	<ul style="list-style-type: none"> • Selecting Appropriate Methods: This domain helps Test Managers make decisions on which usability evaluation methods to apply depending on project context, resources, and maturity. It discusses criteria for selecting usability, user experience, and accessibility evaluation methods suited to different stages of development and organizational needs, including agile development scenarios.

CT-UT Mit Hilfe von uns können Sie bedeutendes Zertifikat der CT-UT einfach erhalten!

ISTQB CT-UT Zertifizierungsprüfung sowie Cisco, IBM, HP Prüfungen sind jetzt sehr populär. Wenn Sie die ISTQB CT-UT Zertifizierung bekommen wollen, realisieren die ISTQB CT-UT Dumps von DeutschPrüfung Ihren Wunsch. Nach dem Erfolg der ISTQB CT-UT Zertifizierung können Sie auch andere IT-Zertifizierungsprüfungen ablegen. Es gibt keine Probleme für alle ISTQB Prüfungen, wenn Sie Prüfungsfragen und Antworten von besitzen.

ISTQB Certified Tester Usability Tester CT-UT Prüfungsfragen mit Lösungen (Q33-Q38):

33. Frage

You're redesigning the web shop of a customer and found out that they are using legacy web design techniques like HTML tables for design matters, making the website hard to be operated using alternative input and output devices (e.g. screen readers). Which kind of risk is most likely to occur?

- A. There's no risk predictable
- B. Usability risk
- C. User experience risk
- **D. Accessibility risk**

Antwort: D

Begründung:

The use of HTML tables for layout instead of proper semantic HTML and responsive design violates accessibility guidelines, particularly those defined in the Web Content Accessibility Guidelines (WCAG).

Such a design makes it difficult or impossible for users relying on screen readers, keyboard navigation, or other assistive technologies to interact effectively with the site. Therefore, this creates a significant accessibility risk, which is distinct from general usability or user experience risks. Accessibility ensures inclusion of users with physical or cognitive impairments, making option B the correct choice.

#####

34. Frage

Which of the following are advantages of using a usability lab?

- i. The context is natural
- ii. Test sessions are easy to observe
- iii. Inexpensive setup
- iv. Similar conditions for all sessions
- v. Easy recording of sessions

- A. i, ii & v are true, iii & iv are false
- B. iii, iv & v are true, i & ii are false
- **C. ii, iv & v are true, i & iii are false**
- D. ii & iv are true, i, iii & v are false

Antwort: C

Begründung:

Usability labs provide a controlled environment that offers several advantages for observing and recording usability test sessions. Specifically, they allow for easy observation of participants (ii), standardized conditions for each session (iv), and facilitate audio and video recording for detailed analysis (v). However, the context is not natural (i), because the lab is an artificial setting rather than the user's actual environment.

Also, setting up a professional usability lab is not inexpensive (iii); it typically involves significant costs for equipment, space, and staffing. Therefore, options ii, iv, and v are true, while i and iii are false.

#####

35. Frage

Which of the following are common mistakes made in usability testing?

- i. The user is too active
- ii. Critical results are ignored
- iii. No observers involved
- iv. Scheduling too late
- v. Incorrect focus

- A. i, ii & iii are true, iv & v are false
- B. i & iii are true, ii, iv & v are false
- C. ii, iv & v are true, i & iii are false
- D. ii & iv are true, i, iii & v are false

Antwort: C

Begründung:

Common mistakes in usability testing include:

Ignoring critical results (ii): A significant issue if findings are not acted upon.

Scheduling the test too late (iv): This can lead to usability problems being discovered too late to be addressed effectively.

Having the wrong focus (v): For instance, focusing on aesthetics instead of usability goals.

Option i ("user is too active") is not a problem-active participation is necessary. Option iii ("no observers involved") is not a typical mistake, since tests can still be valid even with recorded sessions and later review.

Hence, the correct answer is A: ii, iv & v are true.

#####

36. Frage

A company distributes its products over a web shop where users can put items in their shopping cart. After they click on "checkout", the checkout process starts and users cannot go back anymore to correct possible mistakes. The only way is to hit the "back" button of the browser, which might lead to an expired session and therefore losing all items in the shopping cart.

Which of the following heuristics would best describe this usability issue?

- A. Aesthetic and minimalist design
- B. Visibility of system status
- C. User control and freedom
- D. Help and documentation

Antwort: C

Begründung:

The described issue violates the usability heuristic "User control and freedom," as defined by Jakob Nielsen.

This principle emphasizes that users should have the ability to undo and redo actions and navigate freely without being trapped in irreversible sequences. In the scenario, users are forced into the checkout process without a clear way to return or correct mistakes,

except through the unreliable and disruptive back button.

This design flaw undermines user autonomy and can result in lost progress or frustration.

#####

37. Frage

During a usability test, a user suggested that a quick search box on every page would help a lot for several of the main tasks. You added this finding to the list.

What's the correct classification for these kinds of findings?

- A. Positive finding
- **B. Good idea**
- C. Usability problem
- D. Functional problem

Antwort: B

Begründung:

In usability evaluations, a distinction is made between actual usability problems (where a user struggles to complete a task or is confused by the interface) and suggestions or ideas that users provide based on their preferences or perceived improvements. When a participant offers a new feature idea (such as a quick search box), this is classified as a "good idea" or "feature suggestion," not necessarily a usability problem. It may inform future design enhancements but does not indicate a failure in usability for existing functionality.
