Microsoft Azure Security Technologies Sample Questions (Q161-Q166):

NEW QUESTION # 161

You have the Azure virtual networks shown in the following table.

You have the Azure virtual machines shown in the following table.

The firewalls on all the virtual machines allow ping traffic.

NSG1 is configured as shown in the following exhibit.

Inbound security rules

Outbound security rules

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 162

You have an Azure subscription that contains the following resources:

A network virtual appliance (NVA) that runs non-Microsoft firewall software and routes all outbound traffic from the virtual

machines to the internet An Azure function that contains a script to manage the firewall rules of the NVA Azure Security Center

standard tier enabled for all virtual machines An Azure Sentinel workspace

30 virtual machines

You need to ensure that when a high-priority alert is generated in Security Center for a virtual machine, an incident is created in Azure Sentinel and then a script is initiated to configure a firewall rule for the NVA.

How should you configure Azure Sentinel to meet the requirements? To answer, drag the appropriate components to the correct requirements. Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:
