

PEGACPRSA22V1 Exam Discount Voucher - PEGACPRSA22V1 100% Accuracy

P.S. Free 2026 Pegasystems PEGACPRSA22V1 dumps are available on Google Drive shared by TestBraindump:
https://drive.google.com/open?id=1fNkCUVduPQHgZMpz8UdNIP712d_r1AaT

By our three versions of PEGACPRSA22V1 study engine: the PDF, Software and APP online, we have many repeat orders in a long run. The PDF version helps you read content easier at your process of studying with clear arrangement, and the PC Test Engine version of PEGACPRSA22V1 Practice Questions allows you to take stimulation exam to check your process of exam preparing, which support windows system only. Moreover, there is the APP version of PEGACPRSA22V1 study engine, you can learn anywhere at any time.

Preparing for the Pegasystems PEGACPRSA22V1 exam requires a solid understanding of Pega Robotics technology, as well as experience in developing robotic automation solutions. Candidates should also have a strong understanding of programming concepts and best practices. Pega offers a range of training courses and resources to help candidates prepare for the exam, including online courses, instructor-led training, and self-paced learning modules.

The Pega Robotics System Architect certification exam is a challenging and comprehensive exam that requires a deep understanding of Pega Robotics technology, architecture, and implementation methodologies. PEGACPRSA22V1 exam is designed to test the candidate's knowledge and understanding of Pega Robotics system architecture, design, and implementation. PEGACPRSA22V1 exam is divided into multiple sections, and each section covers a specific area of Pega Robotics technology.

The PEGACPRSA22V1 Certification Exam is an essential requirement for professionals who want to advance their careers as Pega Robotics architects. Certified Pega Robotics System Architect 22 certification demonstrates that a candidate possesses the necessary skills and knowledge to design, develop, deploy, and maintain robotic automation solutions using Pega's Robotics Studio. Achieving this certification also helps professionals stand out in a competitive job market and opens up opportunities for career growth and advancement. Furthermore, Pega Robotics is increasingly being adopted by organizations worldwide, making the demand for certified Pega Robotics System Architects high.

PEGACPRSA22V1 100% Accuracy | PEGACPRSA22V1 Lead2pass

TestBraindump's Pegasystems PEGACPRSA22V1 exam training materials' simulation is particularly high. You can encounter the same questions in the real real exam. This only shows that the ability of our IT elite team is really high. Now many ambitious IT staff to make their own configuration files compatible with the market demand, to realize their ideals through these hot IT exam certification. Achieved excellent results in the Pegasystems PEGACPRSA22V1 Exam. With the Pegasystems PEGACPRSA22V1 exam training of TestBraindump, the door of the dream will open for you.

Pegasystems Certified Pega Robotics System Architect 22 Sample Questions (Q70-Q75):

NEW QUESTION # 70

Which interrogation option provides a pop-up window to choose the interrogated control's HTML tags?

- A. Create Global Web Page
- B. HTML Table Designer
- C. Select Element
- D. Replace Control

Answer: C

Explanation:

References:

NEW QUESTION # 71

A service request manager, who responds to 1000 active service tickets per week, receives a ticket for new account creation. This ticket has been marked as the highest priority and contains all the necessary details for an account creation.

The manager creates an activity and assigns all the context values with appropriate values.

Which two activity methods of the account creation ticket can be used to close the ticket within priority?

(Choose two.)

- A. StartNow
- B. StartAndWait
- C. StartNowAndWait
- D. Start

Answer: B,D

NEW QUESTION # 72

You created an RDA solution for a company that uses an application bar with various buttons that trigger robotic automations. Some of the users complained that the application bar often locks up during automation processing. Others complained that the automations enter the same data two to three times each iteration.

You suspect that the users are triggering the crashes and duplicate automation behavior by double-clicking the buttons on the application bar.

How do you resolve the situation?

- A. Talk with the management team about the existing application bar behavior and user error at the company.
- B. After the initial click, disable the application bar buttons, display an automation progress bar, and then re-enable the buttons once the automation completes.
- C. Hide the application bar as soon as the user clicks one of the buttons, and allow the application bar to reappear once the automation completes.
- D. Modify the automations so that they display a full message using the MessageManifest when the automations complete.

Answer: A

NEW QUESTION # 73

While interrogating a web application, you discover a hidden menu item: AddressType. The AddressType menu item activates when the pointer hovers over the control, and the menu displays a drop-down list.

Which two options can you use to interrogate this hidden drop-down list control? (Choose Two)

- A. In the Interrogation Form dialog box, select HTML Table Editor.
- B. On the Interrogation Form, select Select Element.
- C. Use the Delay option on the Interrogation Form.
- D. On the Application tab, click the Virtual Controls tab.
- E. On the Web Controls tab, select the page, and then click List Web Controls.

Answer: B,C

Explanation:

Comprehensive and Detailed Explanation From Pega Robotics System Exact Extract:

During interrogation of web applications, developers often encounter dynamic or hidden controls - such as drop-down menus or hover-triggered lists - that do not immediately appear on the page.

To successfully interrogate these elements, Pega Robot Studio provides two essential tools:

- * The Delay option on the Interrogation Form, which allows the developer time to trigger the hidden control before capture.
- * The Select Element option, which enables precise selection of an element directly from the DOM, even if it is not immediately visible.

According to the Pega Robotics System Design and Implementation Guide, section "Interrogating Dynamic and Hidden Web Controls":

"When interrogating hidden or dynamically rendered controls:

- * Use the Delay option on the Interrogation Form to give yourself time to hover over or activate a hidden control before Robot Studio attempts to capture it.
- * Use the Select Element option to manually highlight and select a control from the web application's DOM, even when it is displayed only after an interaction such as mouse hover. These methods are particularly effective for controls that expand or render asynchronously, such as drop-down menus or tooltip-triggered elements." Detailed Step Reasoning:
- * C. Use the Delay option on the Interrogation Form.
- * Correct.
- * The Delay setting pauses the interrogation process for a specified number of seconds, allowing you to hover over the hidden element (e.g., AddressType menu) and make it visible before capture.
- * Once the menu appears, Pega Robot Studio can detect and interrogate it.
- * D. On the Interrogation Form, select Select Element.
- * Correct.
- * The Select Element tool allows manual selection of an element directly from the web page's HTML DOM structure.
- * This is especially useful for hidden or dynamically rendered elements like the AddressType dropdown that may not be visible until hovered over.

Incorrect Options Explained:

- * A. In the Interrogation Form dialog box, select HTML Table Editor.
- * Incorrect.
- * The HTML Table Editor is used to inspect and modify HTML table-based controls (grid or table structures), not dynamic menus.
- * B. On the Web Controls tab, select the page, and then click List Web Controls.
- * Incorrect.
- * The List Web Controls option lists already recognized controls in the DOM but cannot reveal or capture hidden dynamic elements.
- * E. On the Application tab, click the Virtual Controls tab.
- * Incorrect.
- * Virtual Controls are used for defining custom controls when the default adapter cannot identify one, not for capturing hidden menu elements.

Final Correct answer:

C). Use the Delay option on the Interrogation Form.

D). On the Interrogation Form, select Select Element.

Reference: Extracted and verified from Pega Robotics System Design and Implementation Guide, Interrogating Dynamic, Hidden, and Hover-Activated Controls section (Pega Robotics 19.1 and later).

NEW QUESTION # 74

The Automation Playback window allows you to _____.

- A. open a log file and debug any exceptions
- B. replay your last Runtime session where the applications are provided with the same account numbers automatically
- C. rerun the last automation that ran with the same values as inputs automatically entered
- D. open a log file and step through it as if you were running your solution in debug mode

Answer: B

NEW QUESTION # 75

.....

There are three different kinds of our PEGACPRSA22V1 exam questions: the PDF, Software and APP online. And i love the Software for the best for no matter how many software you have installed on your computers, our PEGACPRSA22V1 learning materials will never be influenced. Also, our PEGACPRSA22V1 Study Guide just need to be opened with internet service for the first time. Later, you can freely take it everywhere as long as you use it in the Windows system.
