Whenever you have problems about our Workday-Pro-HCM-Core study materials, you can contact our online workers via email. We warmly welcome you to experience our considerate service.

Workday Pro HCM Core Certification Exam Sample Questions (Q48-Q53):

NEW QUESTION # 48

A member of the HR Partner Role-Based security group transfers to a different position on another team. What subprocess in Change Job will address their security group membership?

- A. Assign Pay Group
- **B. Assign Roles**
- C. Manage Business Processes for Worker
- D. Manage Job History

Answer: B

Explanation:

Comprehensive and Detailed Explanation (Paraphrased from Workday Pro HCM Core - Security and Business Process Framework Guide, 2023R2):

When a worker who is part of a Role-Based Security Group (RBSG) transfers to a different position, Workday automatically reviews the roles associated with their supervisory organization through the Assign Roles subprocess.

The Assign Roles subprocess within the Change Job business process ensures that role assignments (such as HR Partner, Manager, or Payroll Partner) are updated according to the new supervisory organization's configuration. This automation helps maintain proper security access and prevents users from retaining permissions tied to their previous role or organization.

Option A (Assign Pay Group) manages payroll assignment, not security.

Option B (Manage Job History) records past job data, unrelated to role security.

Option D (Manage Business Processes for Worker) handles process configurations, not security group updates.

Thus, Assign Roles is the correct subprocess to maintain accurate security group membership during position changes.

Reference (Paraphrased Source):

Workday Pro HCM Core - Security and Business Process Configuration Guide (2023R2), Section: "Role Assignments in Staffing Events."

NEW QUESTION # 49

You are updating a business process and need to exclude the initiator from completing a step. What task do you use?

- A. Maintain Step Help-Text
- B. Maintain Step Delay
- **C. Maintain Advanced Routing**
- D. Maintain Step Conditions

Answer: C

Explanation:

When configuring a business process, if the requirement is to exclude the initiator from completing a step, the correct configuration point is within Maintain Advanced Routing. This task allows administrators to control and customize routing restrictions and participant logic for each step.

Using the Maintain Advanced Routing task, you can define whether the initiator should be included or excluded as a potential assignee for the step. This ensures segregation of duties and compliance - for example, preventing an employee who initiated a Change Job event from approving or reviewing their own transaction.

Options A, B, and D are incorrect:

* Maintain Step Conditions (A) is used to apply condition rules to control whether a step executes but not who performs it.

* Maintain Step Help-Text (B) is used only to provide user instructions within the BP interface.

* Maintain Step Delay (D) controls timing between steps, not participant assignment.

Workday Pro HCM Core - Business Process Configuration Guide (2023R2), Section: "Advanced Routing and Participant Restrictions" and "Business Process Step Configuration Options."

NEW QUESTION # 50

What security group does Workday deliver that allows employees to change their home address?

- A. Employee-as-Self
- B. Manager
- C. Initiator
- D. All Users

Answer: A

Explanation:

The correct answer is A - Employee-as-Self.

Employee-as-Self is a delivered Workday user-based security group automatically assigned to all active workers within the tenant. This group allows employees to view and update their own personal data, such as home address, phone number, emergency contacts, and other self-service information.

The permissions for this group are defined in domain security policies related to personal data, such as Worker Data: Personal Information and Worker Data: Home Contact Information. Employees only have access to modify their own records, not those of others.

This self-service model is central to Workday's HCM design, empowering employees to maintain accurate personal information without administrator intervention.

Reference: Workday Pro HCM - Security and Self-Service Fundamentals, "Employee-as-Self Delivered Security Group" section.

NEW QUESTION # 51

When hiring a worker, you want the HR Partner to receive a task to review and update the company and cost center assigned to the new hire. What action do you add to the Hire business process to accomplish this?

- A. Review Employee Hire
- B. Change Organization Assignments
- C. Edit Workday Account
- D. Onboarding Setup

Answer: B

Explanation:

To ensure the HR Partner reviews and updates a new hire's Company and Cost Center, you add the Change Organization Assignments action step to the Hire business process.

This action allows the HR Partner (or assigned role) to validate and modify organizational assignments, such as Company, Cost Center, Region, or Location, before the Hire event is finalized. It is typically positioned after the Review Employee Hire step to confirm that all organization-level data aligns with the new worker's role and supervisory org defaults.

Option A (Review Employee Hire) is a completion-type review step and does not update organization data.

Option B (Onboarding Setup) prepares onboarding tasks, not organizational details.

Option C (Edit Workday Account) deals with account credentials and system access.

Thus, Change Organization Assignments is the correct step for updating or confirming company and cost center information during the hiring process.

Workday Pro HCM Core - Business Process Configuration Guide (2023R2), Section: "Adding and Configuring Organization Assignment Steps in Staffing BPs."

NEW QUESTION # 52

Your client frequently has special projects their employees work on. These projects are temporary and are staffed with existing employees. Your client needs a way to assign a temporary manager for each project and be able to see all the team members in the tenant. What organization type will allow them to accomplish this?

- A. Location Hierarchy
- B. Pay Group
- C. Supervisory
- D. Matrix

Answer: D

Explanation:

Comprehensive and Detailed Explanation (Paraphrased from Workday Pro HCM Core - Organization Types and Structures Guide, 2023R2):

The correct organization type for managing temporary project-based teams is a Matrix Organization.

Matrix organizations are designed to group employees from different supervisory organizations to work together on a temporary or functional basis, such as projects or task forces.

This structure allows the assignment of a temporary manager (Matrix Manager) who oversees project-related activities without changing employees' primary supervisory reporting relationships. The matrix manager gains visibility into all assigned members, enabling effective project oversight.

Options A (Location Hierarchy) manages physical work locations, not project teams.

Option B (Supervisory) defines permanent reporting structures.

Option D (Pay Group) organizes workers for payroll purposes only.

Thus, Matrix Organization provides the flexibility and visibility required for cross-functional, project-based staffing.
