Microsoft Dynamics 365 Supply Chain Management Functional Consultant Sample Questions (Q423-Q428):

NEW QUESTION # 423

A company uses Planning Optimization. The company uses the product lifecycle state setup to exclude some items from planning. Items may exist in more than one warehouse.

What configuration is required so that Planning Optimization excludes these items?

Select only one answer.

- A. The items will respect the lifecycle state if manual planning on the warehouse setup is set to Yes.
- B. Planning Optimization will respect the lifecycle state if it is enabled from Feature management.
- C. Planning Optimization will respect the lifecycle state if it is enabled from Lifecycle Services.
- **D. The items will respect the lifecycle state if manual planning on the warehouse setup is set to No.**
- E. The product lifecycle state must be set up on the items only.

Answer: D

NEW QUESTION # 424

A company uses Dynamics 365 Supply Chain Management for master planning in manufacturing processes. Master planning runs have increased in processing time over the past month. You need to identify the impact of configuration changes on performance from a single location. Which objects should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Questions	Object
What should you use to compare the performance of a previous master planning run's detailed steps with a currently processing master planning run?	<div><div></div><div>Analytical workspace</div><div>Gantt chart</div><div>Performance Software Development Kit (SDK)</div></div>
How should you identify the completed master planning task for the currently running job?	<div><div></div><div>Colors</div><div>Icons</div><div>Status field</div><div>Work queue</div></div>

Answer:

Explanation:

NEW QUESTION # 425

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question In this section, you will NOT be able to return to it. As a result, these questions will not appear in the review/ screen.

A company plans to simplify interactions between purchasing department employees and vendors.

You need to ensure that employees are redirected to a vendor's online store to select items for inclusion on purchase requisitions.

Solution: Create a vendor catalog.

Does the solution meet the goal?

- A. No
- B. Yes

Answer: A

NEW QUESTION # 426

You are the quality supervisor for a company. You receive 100 units of item C0001.

You find defects in some units. You move the items to quarantine for further inspection. Fifty units fail inspection.

You need to scrap the defective units.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

The screenshot shows a Microsoft Dynamics 365 interface. On the left, under the heading "Actions", there is a list of six actions in a scrollable container:

- Enter a split quantity of 50.
- Enter a scrap quantity of 50.
- From the Quality order, create a Non-conformance for the scrap.
- From the Quarantine order, select the Split function.
- Select the Scrap function.
- Post an inventory journal entry to remove 50 pieces of scrap from inventory.

On the right, there is an "Answer Area" with a Microsoft logo and a dashed red border. It contains four action boxes that have been moved from the list and arranged in sequence:

- From the Quarantine order, select the Split function.
- Enter a split quantity of 50.
- Select the Scrap function.
- Enter a scrap quantity of 50.

Navigation arrows are visible on the right side of the answer area.

Answer:

Explanation:

This screenshot is identical to the one above, but it highlights the correct sequence of four actions in the answer area with a dashed red border. The actions are:

- From the Quarantine order, select the Split function.
- Enter a split quantity of 50.
- Select the Scrap function.
- Enter a scrap quantity of 50.

The first three actions in the "Actions" list on the left are also highlighted with a dashed green border.

Explanation

A vertical list of the four correct actions in the correct sequence, each in its own box:

- From the Quarantine order, select the Split function.
- Enter a split quantity of 50.
- Select the Scrap function.
- Enter a scrap quantity of 50.

NEW QUESTION # 427

A company needs to stock inventory in their warehouse. Inbound purchase order materials may need to be placed into more than one location in the warehouse.

You need to configure placement for inventory in the warehouse.

How should you set up location directives? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Configuration option	Value
Sequential setup of new location directive	<div>▼</div> <div>Location Directive, Lines, and Location Directive Actions</div> <div>Location Directive Actions, Lines, and Location Directive</div> <div>Lines, Location Directive, and Location Directive Actions</div> <div>Location Directive Actions, Location Directive, and Lines</div>
Location directive action strategy	<div>▼</div> <div>Match packing, Consolidate, and Empty location with no incoming work</div> <div>FEFO batch reservation, None, and Match packing</div> <div>Empty location with no incoming work, None, and Consolidate</div>

Answer:
