We also have free demo for you, you can have a look at and decide which version you want to choose. We also have the live chat service and the live off chat service to answer all questions you have. If you failed to pass the exam, money back will be guaranteed, if you have another exam to attend, we will replace another I27001F Study Materials for you freely.

CertiProf Certified ISO/IEC 27001:2022 Foundation Sample Questions (Q18-Q23):

NEW QUESTION # 18

Within the ISMS, establishing, approving, and supporting compliance with the information security policy is a responsibility of:

- A. The IT Security Manager
- B. The implementation leader
- C. The quality management representative
- **D. Top management**

Answer: D

Explanation:

ISO/IEC 27001:2022 assigns accountability for the information security policy to top management. Top management must ensure that the policy and objectives are established and are compatible with the strategic direction of the organization. Top management is also responsible for promoting and supporting compliance with the ISMS requirements throughout the organization. Therefore, option B is correct.

NEW QUESTION # 19

According to ISO/IEC 27001:2022, who is required to carry out the ISMS review to ensure its suitability, adequacy, and effectiveness?

- A. Process owners
- B. The internal audit team
- **C. Top management**
- D. The external certification audit company

Answer: C

Explanation:

The standard requires top management to review the ISMS at planned intervals. This review is intended to confirm the continuing suitability, adequacy, and effectiveness of the ISMS. While auditors, process owners, and certification bodies may provide inputs or findings, the management review itself is a responsibility of top management. Therefore, option D is the correct answer.

NEW QUESTION # 20

What does ISO/IEC 27001:2022 require for information security risk assessment?

- A. A consultancy to perform the information security risk assessment professionally
- B. A person designated by top management
- C. Acquisition of a set of information security tools to automate the assessment using artificial intelligence
- **D. Applying an information security risk assessment process that establishes and maintains information security risk criteria**

Answer: D

Explanation:

ISO/IEC 27001:2022 does not require a specific tool, consultant, or named individual as the basis for compliance. What it does require is that the organization define and apply an information security risk assessment process that establishes and maintains risk criteria, ensures consistent, valid, and comparable results, identifies risks, analyzes risks, and evaluates risks. Therefore, option D is the correct answer.

NEW QUESTION # 21

How should top management provide evidence of its commitment to the Information Security Management System?

- A. By operating the Information Security Management System once it has been established
- B. By conducting an annual internal audit of the Information Security Management System
- **C. By communicating the importance of meeting ISMS requirements**
- D. By defining a risk assessment approach

Answer: C

Explanation:

One of the explicit leadership responsibilities in ISO/IEC 27001:2022 is for top management to communicate the importance of effective information security management and of conforming to the ISMS requirements.

This communication helps demonstrate visible commitment and organizational direction. Conducting internal audits and defining the risk assessment approach are important activities within the ISMS, but they are not the best direct expression of top management's evidence of commitment among the options listed. Therefore, option A is correct.

NEW QUESTION # 22

What is the purpose of management review in ISO/IEC 27001:2022?

- A. To ensure that the information security policy covers all controls indicated in ISO/IEC 27001
- B. To ensure that the information security policy matches all identified risks
- **C. To ensure the continuing suitability, adequacy, and effectiveness of the ISMS**
- D. To ensure that employees receive information about updates to information security policies

Answer: C

Explanation:

ISO/IEC 27001:2022 requires top management to review the organization's ISMS at planned intervals to ensure its continuing suitability, adequacy, and effectiveness. Management review is a formal requirement under performance evaluation and is intended to confirm that the ISMS continues to support the organization's objectives and strategic direction. It is broader than policy review alone and is not limited to communication or Annex A coverage. Therefore, option C is correct.

NEW QUESTION # 23

.....

TestKingIT I27001F study torrent is popular in IT candidates, why does this I27001F training material has attracted so many pros? Now, if you receive I27001F prep torrent, you will be surprised by available, affordable, updated and best valid CertiProf I27001F Download Pdf dumps. After using the I27001F latest test collection, you will never be fair about the I27001F actual test. The knowledge you get from I27001F dumps cram can bring you 100% pass.
