200-901 Sample Questions Answers | Valid 200-901 Test Blueprint

Itbraindumps provides the three most convenient formats to prepare for 200-901 exam dumps. It offers a desktop practice test, web based practice test and pdf file. Therefore, feel free to go through DevNet Associate Exam (200-901) exam dumps. Each of the three formats is downloaded to all android devices. Therefore, there's no reason to download an additional application to access web-based or desktop-based practice tests.

Cisco DevNet Associate Exam Sample Questions (Q193-Q198):

NEW QUESTION # 193

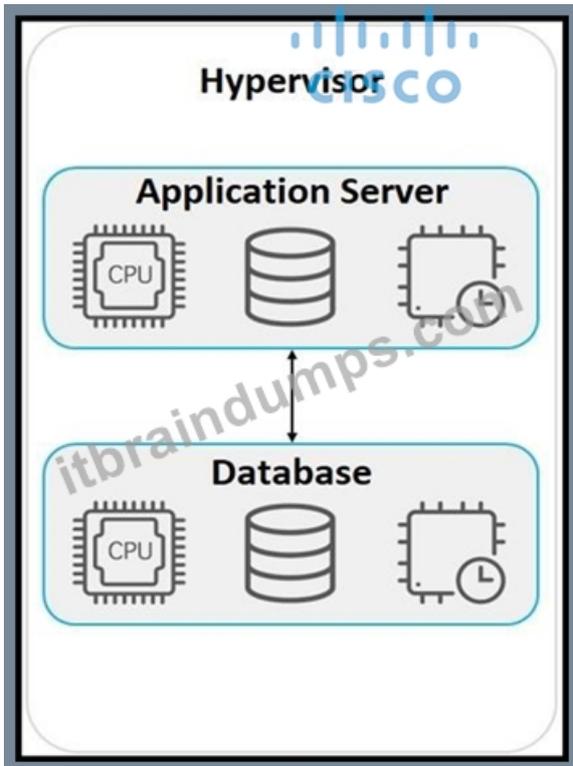

A developer creates an application that must provide an encrypted connection or API keys. The keys will be used to communicate with a REST API. Which command must be used for the secure connection?

- A. curl
-X PUSH 'http://username.app.com/endpoint/?api_key=12345abcdef'
- B. curl -v 'ftp://username.app.com/endpoint/?api_key=12345abcdef'
- C. curl
-X GET 'http://username.app.com/endpoint/?api_key=12345abcdef'
- D. curl -X GET 'https://username.app.com/endpoint/?api_key=12345abcdef'

Answer: D

NEW QUESTION # 194

Refer to the exhibit. An application must be deployed on a server that has other applications installed. The server resources are to be allocated based on the deployment requirements. The OS for each application must be independent. Which type of deployment is used?

- A. hybrid
- B. bare metal
- C. virtual machines
- D. containers

Answer: C

NEW QUESTION # 195

Which task is performed because the test-driven development approach is being used?

- A. writing code without committing any coding violations
- B. testing existing software before developing new code
- C. creating test scenarios based on continuous development
- D. refactoring code that is covered by existing tests

Answer: D

Explanation:

Test-Driven Development (TDD) is a software development approach where tests are written before writing the actual code. The steps involved in TDD are:

- * Write a test for the new functionality.
- * Run the test and see it fail (because the functionality is not yet implemented).
- * Write the minimum code necessary to make the test pass.
- * Refactor the code while keeping the test passing.

Option B is the correct answer because refactoring code while it is covered by existing tests is a key aspect of TDD. The existing tests ensure that the functionality remains correct even after refactoring.

References:

- * Cisco DevNet Associate Exam Topics: Software Development and Design (understanding TDD methodology)
- * "Test-Driven Development by Example" by Kent Beck (standard reference on TDD)

NEW QUESTION # 196

Refer to the exhibit.

```
>>> response_data = requests.get(base_url+ request_url, cookies=cookies)
Traceback (most recent call last):
  File "<stdin>", line 1, in <module>
NameError: name 'requests' is not defined
>>>
```

A Python code has been written to query a device. The executed code results in the error shown. Which action resolves the problem?

- A. requests("GET", base_url+ request_url, cookies=cookies)
- B. import json
- C. pip install requests
- D. import requests

Answer: D

NEW QUESTION # 197

A Company is looking for cloud deployment which will use the on-premise infrastructure, is user self-service, and easy to scale. Which cloud solution should be selected for these requirements?

- A. private
- B. hybrid
- C. multi
- D. public

Answer: A

NEW QUESTION # 198

.....

Itbraindumps Cisco 200-901 exam information is proven. We can provide the questions based on extensive research and experience. Itbraindumps has more than 10 years experience in IT certification 200-901 exam training, including questions and answers. On the Internet, you can find a variety of training tools. Itbraindumps 200-901 Exam Questions And Answers is the best training materials. We offer the most comprehensive verification questions and answers, you can also get a year of free updates.
